# Drug Testing and Analysis

www.drugtestinganalysis.com

The cover of this launch issue of *Drug Testing and Analysis* features an illustration of the article 'Identification of the date rape drug GHB, and its precursor GBL by Raman spectroscopy' by Victoria. L. Brewster, Howell G. M. Edwards, Michael D. Hargreaves and Tasnim Munshi. The image depicts 'in the field' analysis of a spiked beverage by a *Delta Nu Inspector Raman FSX* portable spectrometer, just one of the portable Raman spectrometers used in the study.
