Erratum

Erratum to “Novel mono- and bis-azo dyes containing the azulen-1-yl moiety: Synthesis, characterization, electronic spectra and basicity” [*Dyes and Pigments* 2009, 80, 337–42]

Alexandru C. Razus, Liviu Birzan*, Mihaela Cristea, Victorita Tecuceanu, Liliana Blanariu, Cristian Enache

Institute of Organic Chemistry “C. D. Nenitzescu” of Romanian Academy, Spl. Independentei 202 B, P.O. Box 108, 060023 Bucharest 35, Romania

Unfortunately, the UV-Viz spectra for the isomers *meta* bis-azocompounds, **4 Rn**, are interchanged with those for *para* isomers **5 Rn**. Therefore, the UV-Viz spectra of the compounds **4** (Rn = H, 4,6,8-Me₃, 4,8-Me₂-6-tBu and 3,8-Me₃-5-iPr) must be considered as UV-Viz spectra belonging to the corresponding compounds **5** (Rn = H, 4,6,8-Me₃, 4,8-Me₂-6-tBu and 3,8-Me₃-5-iPr) and vice versa.
