

Erratum

What Does Halobacterium Tell us About Photoreception?

E. Hildebrand

Institut für Neurobiologie, Kernforschungsanlage Jülich,
Postfach 1913, D-5170 Jülich, Federal Republic of Germany

Biophys. Struct. Mechanism **3**, 69–77 (1977).

Legend of Figure 2 B at p. 71 should be changed to read:

B: Avoiding of uv light (370 nm) as a result of step up (direct) photophobic responses (on-responses) at the border to the light.
