Editorial

Oral Oncology: 5 Years' Progress

Crispian Scully

Eastman Dental Institute and Hospital, University of London, 256 Gray's Inn Road,
London WC1X 8LD, U.K.

Since the inception in 1991, *Oral Oncology* has grown from strength to strength. *Oral Oncology* is increasingly recognised as a leader in the field. The very encouraging developments, with over 1000 subscriptions and citation in *Medline* and in *Current Contents* appear to relate to the

- high quality science
- consistent rapid processing of papers—a median time to publication decision of 31 days after receipt
- consistent fast publication—a median time from acceptance to publication of 6 months
- up-to-date and in-depth reviews
- broad coverage of all aspects of cancer of the head and neck

Changes in the Editorial Board to include other active research workers from the U.S.A., Japan, India, South America and Europe will undoubtedly enhance the international nature of the Journal.

Announcement

Oral Oncology, European Journal of Cancer Impact Factor

An error in the recently issued 1994 Journal Citation Reports[®] has been brought to our attention. In this the citation impact factor for *Oral Oncology, European Journal of Cancer* is given as 0.108. ISI, who publish the Journal Citation Reports, have calculated a revised 1994 impact factor for *Oral Oncology, European Journal of Cancer*:

Impact Factor (1994)

Oral Oncology, European Journal of Cancer 1.311 (Not 0.108 as published)

The Editors and all the associated organisations (EORTC, ESO, EACR, FECS) have always striven for quality in *Oral Oncology, European Journal of Cancer*. We hope that the above clarification will prevent any misunderstanding otherwise.

Thanks to Referees

Success would not be possible without the efficient and rapid processing of papers by referees. We thank the following for their help.
