

Welcome

On behalf of the European School of Oncology and of the Scientific Committee, I have the pleasure in presenting the 2010 edition of the Educational Cancer Convention Lugano.

ECCLU 2010 has been devoted to haemato-oncology with a programme developed in co-operation with the International Conference on Malignant Lymphoma and the International Extranodal Lymphoma Study Group. The synergy between these entities has been devised to provide an overview of the latest developments in the field.

In particular, the internationally renowned faculty will offer:

- 3 keynote lectures dealing with relevant biological and clinical aspects of leukaemias and lymphomas;
- 4 main sessions addressing malignant lymphomas in general, extranodal lymphomas in particular, myeloma and chronic and acute leukaemias;
- Ample time to discuss clinical cases presented both by the faculty and the participants;
- Enhanced interactivity during poster discussion sessions.

I look forward to meet our active participants,

Franco Cavalli
ECCLU 2010 Chair
