International Journal of Cancer

January 1979

Human Cancer

A. Al-Attar, H. Al-Mondhiry, Z. Al-Bahrani and T. Al-Saleem: Burkitt's lymphoma in Iraq. Clinical and pathologic study of 47 patients.

W.-S. Cheng, J. J. Mulvihill, M. H. Greene, L. W. Pickle, S. Tsai and J. Whang-Peng: Sister chromatid exchanges and chromosomes in chronic myelogenous leukemia and cancer families.

A. Mantovani, T. R. Jerrells, J. H. Dean and R. B. Herberman: Cytolytic and cytostatic activity on tumor cells of circulating human monocytes.

A. Mantovani, A. Tagliabue, J. H. Dean, T. R. Jerrells and R. B. Herberman: Cytolytic activity of circulating human monocytes on transformed and untransformed human fibroblasts.

F. Mitelman, G. Klein, M. Andersson-Anvret, N. Forsby and B. Johansson: 14q+ marker chromosome in an EBV-genome-negative lymph node without signs of malignancy in a patient with EBV-genome-positive nasopharyngeal carcinoma.

D. H. Crawford, B. G. Achong, N. M. Teich, S. Finerty, J. L. Thompson, M. A. Epstein and B. C. Giovanella: Identification of murine endogenous xenotropic retrovirus in cultured multicellular tumour spheroids from nude mouse-passaged nasopharyngeal carcinoma.

G. Klein, R. Hyman and I. Trowbridge: Correlated expression of a B lymphocyte specific glycoprotein (gp 27/35) and the EBV receptor/C3 receptor complex in sublines from the same Burkitt's lymphoma.

Experimental Cancer

J. R. P. Cabral, T. Mollner, F. Raitano and P. Shubik: Carcinogenesis of hexachlorobenzene in mice.

G. Eliopoulos, S. Andre, N. P. Anagnou, C. Matsis and B. Halpern: Effect of *Corynebacterium parvum* on hemopoietic stem cell kinetics.

S. S. Park, A. F. Gazdar, P. A. Lalley, J. D. Minna and U. Francke: Spontaneous expression of murine endogenous viruses in hamster x mouse hybrid cells.

L. Montagnier and J. Gruet: Cell density dependence for growth in agarose of two human lymphoma lines and its decrease after Epstein-Barr virus conversion.

M. J. Rogers and L. W. Law: Immunogenic properties of a soluble tumor rejection antigen (TSTA) from a Simian virus 40-induced sarcoma.

P. Phillips and S. Kumar: Tumour angiogenesis factor (TAF) and its neutralisation by a xenogeneic antiserum.

W. J. van Blitterswijk, P. Emmelot, H. A. M. Hilkmann, J. Hilgers and C. A. Feltkamp: Rigid plasma membrane-derived vesicles, enriched in tumour-associated surface antigens (MLr), occurring in the ascites fluid of a murine leukemia (GRSL).

O. Bulay, H. Urman, K. Patil, D. B. Clayson and P. Shubik: Carcinogenic potential of hycanthone in mice and hamsters.

S. J. Normann, M. Schardt and E. Sorkin: Cancer progression and monocyte inflammatory dysfunction: relationship to tumour excision and metastasis.

A. Pawlowski, H. F. Haberman and I. A. Menon: The effects of hyalurodinase upon tumor formation in BALB(c) mice painted with 7,12-dimethyl benz(a)anthracene.

B. C. Strnad, R. H. Neubauer and H. Rabin: Biochemical identification of primate lymphoid cell surface glycoproteins.

T. Hozumi, J. Nomura, M. Ishizawa and T. Ono: Induction of erythroid differentiation in murine erythroleukemia cells by N-substituted polymethylene diamides.

P. Puccetti and H. T. Holden: Cytolytic and cytostatic anti-tumor activities of macrophages from mice injected with murine sarcoma virus.

British Journal of Cancer

January 1979

G. E. Gray, M. C. Pike and B. E. Henderson: Breast-cancer incidence and mortality rates in different countries in relation to known risk factors and dietary practices.

J. A. Poiley, R. Raineri and R. J. Pienta: Two-stage malignant transformation in hamster embryo cells.

M. Kinjo, K. Oka, S. Naito, S. Kohga, K. Tanaka, S. Oboshi, Y. Hayata and K. Yasumoto: Thromboplastic and fibrinolytic activity of cultured human cancer cell lines.

P. L. Gutierrez and H. M. Swartz: Paramagnetic changes in cancer: growth of Walker 256 carcinoma studied in frozen and lyophilized tissues.

H. Wunderli, D. D. Mickey and D. F. Paulson: C-type virus particles in human urogenital tumours after heterotransplantation into nude mice.

K. Havemann, C. Gropp, A. Scheuer, T. Scherfe and M. Gramse: ACTH-like activity in immune complexes of patients with oat-cell carcinoma of the lung.

Y. Henin, E. Gomard, S. Gisselbrecht and J. P. Levy: Significance of the proline assay in the study of anti-MSV cell-mediated immune reactions.

T. Christensen, J. Moan, E. Wibe and R. Oftebro: Photodynamic effect of haematoporphyrin throughout the cell cycle of the human cell line NHIK 3025 cultivated *in vitro*.

H. Cuckle, D. A. G. Galton and R. Peto: Chemotherapy of acute myeloid leukaemia in adults.

Short Communications

J. A. Cooper, R. Saracci and P. Cole: Describing the validity of carcinogen screening tests.

M. J. Marshall, F. E. Neal and D. M. Goldberg: Effect of radiotherapy upon enzymes of the glycolytic and related pathways in human uterine cancer.

J. Overgaard: Effect of local hyperthermia in the acute toxicity of misonidazole in mice.

S. Robidoux, A. Kajdos, M. Tomana and C. W. Niedermeier: Rejection of murine mammary tumours in BALB/c mice.

Letter to Editor

R. Schoental: Variations in the incidence of "spontaneous tumours".
