International Journal of Cancer

January 1980

Human Cancer

- J. K. McDougall, D. A. Galloway and C. M. Fenoglio: Cervical carcinoma: Detection of herpes simplex virus RNA in cells undergoing neoplastic change.
- H. Gadler, K. Bremme and B. Wahren: Distribution of tumor-associated antigen CEA and cross-reacting NCA in fetal organs.
- A. Houghton, J. Flannery and M. V. Viola: Malignant melanoma in Connecticut and Denmark.
- U. Galili, E. Klein, G. Klein and I. S. Bal: Activated T lymphocytes in infiltrates and draining lymph nodes of nasopharyngeal carcinoma.
- J. E. de Vries, J. Mendelsohn and W. S. Bont: The requirement for monocytes in spontaneous cytotoxicity by lymphocytes from healthy donors and melanoma patients.
- M. Arsenakis, G. M. Georgiou, J. K. Welsh, M. N. Cauchi and J. T. May: AG-4 complement fixing antibodies in cervical cancer and herpes-infected patients using local herpes simplex virus type 2.
- A. B. Rickinson, D. J. Moss, J. H. Pope and N. Ahlberg: Long-term T-cell-mediated immunity to Epstein-Barr virus in man. IV. Development of T-cell memory in convalescent infectious mononucleosis patients.
- W. Lubitz, B. Westermarck and P. A. Peterson: Surface glycoproteins of normal and neoplastic glia in culture.
- M. Troye, M. Vilien, G. R. Pape and P. Perlmann: Cytotoxicity *in vitro* of blood lymphocytes from bladder cancer patients and controls to allogeneic or autologous tumor cells, derived from established cell lines or short term cultures.
- M. Troye, Y. Hansson, S. Paulie, P. Perlmann, H. Blomgren and B. Johansson: Lymphocyte mediated lysis of tumor cells *in vitro* (ADCC), induced by serum antibodies from patients with urinary bladder carcinoma or controls.
- J. Zeuthen, J. O. R. Nørgaard, P. Avner, M. Fellous, J. Wartiovaara, A. Vaheri, A. Rosén and B. C. Giovanella: Characterization of a human ovarian teratocarcinoma derived cell line.
- A. Nomura, G. A. Globler, P. I. Terasaki and G. N. Stemmermann: HL-A antigens in stomach cancer.
- G. B. Cannon, J. H. Dean, R. B. Herberman, E. Perlin, J. Reid, C. Miller and N. P. Lang: Association of depressed postoperative lymphoproliferative responses to alloantigens with poor prognosis in patients with stage I lung cancer.

Experimental Cancer

- M. J. Rogers, L. W. Law, M. A. Pierrotti and G. Parmiani: Separation of the tumor associated transplantation antigen (TATA) from the alien H-2^k antigens expressed on a methylcholanthrene induced tumor.
- P. Puccetti, A. Santoni, C. Riccardi and R. B. Herberman: Cytotoxic effector cells with the characteristics of natural killer cells in the lungs of mice.
- D. Levy, L. Deshayes, A. L. Parodi and J. P. Levy: Bovine leukemia virus specific antibodies in French cattle. III. Interest of the BLV-gp51 and BLV-p24 radioimmunoassays in the detection of BLV infected animals.
- R. W. Veltri, J. R. McKolanis, S. D. Rockoff and K. R. McIntire: Protein-A antibody binding (PAAB) technique for detection of tumor associated membrane antigen (TAMA) of Lewis lung carcinoma.
- H. Tsuda and E. Farber: Resistant hepatocytes as early changes in liver induced by polycyclic aromatic hydrocarbons.

T. Tsuruo, H. Iida, S. Tsukagoshi and Y. Sakurai: Suppression of Friend leukemia virus of Bacillus Calmette–Guerin and a streptococcal preparation, OK-432.

L. Griciute and L. Tomatis: Carcinogenicity of dapsone in mice and rats.

G. A. Carlson, D. Melnychuk and M. J. Meeker: H-2 associated resistance to leukaemia transplantation: natural killing *in vivo*.
