International Journal of Cancer

October 1980

Human Cancer

S. Ingimarsson, G. Carlström, K. Cantell and H. Strander: Virus infections and recurrence of osteosarcoma in patients receiving human leukocyte interferon.

A. Uchida and T. Hoshino: Reduction of suppressor cells in cancer patients treated with OK-432 immunotherapy.

F. Vánky and S. Argov: Human tumor lymphocyte interaction *in vitro*. VII. Blastogenesis and generation of cytotoxicity against autologous tumor biopsy cells are inhibited by interferon.

Q. V. Saxena, E. Mezey and W. H. Adler: Regulation of natural killer activity *in vivo*. II. The effect of alcohol consumption on human peripheral blood natural killer activity.

S. Einhorn, H. Blomgren and H. Strander: Interferon and spontaneous cytotoxicity in man. V. Enhancement of spontaneous cytotoxicity in patients receiving human leukocyte interferon.

H. Westerberg, S. A. Gustafson, B. Nordenskjöld, C. Silfverswärd and A. Wallgren: Estrogen receptor level and other factors in early recurrence of breast cancer.

Experimental Cancer

T. Yamashita, K. Yamamoto, K. Shoroki, G. Kimura, K. Matsui, T. Osato, H. Shimojo and K. Fujinaga: Chromosomal alterations of rat cell lines transformed by human adenovirus type 12 virion, whole DNA and left-end DNA fragments.

N. R. Pellis, H. Yamagishi, C. M. Macek and B. D. Kahan: Specificity and biological activity of extracted murine tumor specific transplantation antigens.

C. J. Der and E. J. Stanbridge: Alterations in the extracellular matrix organization associated with the reexpression of tumorigenicity in human cell hybrids.

G. Parmiani, M. Colombo and D. Ballinari: Expression of alien minor histocompatibility antigens distinct from tumor-specific transplantation antigen on a murine fibrosarcoma.

P. L. Grover, A. D. MacNicol, P. Sims, G. C. Easty and A. M. Neville: Polycyclic hydrocarbon activation and metabolism in epithelial cell aggregates prepared from human mammary tissue.

A. Watson and F. H. Bach: The role of gp70 in the target antigen recognized by murine leukemia virus immune cytotoxic T-lymphocytes.

J. Wright, L. A. Falk, L. G. Wolfe and F. Deinhardt: Herpesvirus saimiri: protective effect of attenuated strain against lymphoma induction.

Z. Malik and M. Djaldetti: Destruction of erythroleukemia, myelocytic leukemia and Burkitt lymphoma cells by photoactivated protoporphyrin.

D. Brouty-Boyé, R. W. Tucker and J. Folkman: Transformed and neoplastic phenotype: Reversibility during culture by cell shape.

M. Cottler-Fox, W. Ryd, B. Hagmar and C. H. Fox: Adhesion of metastatic and non-metastatic carcinoma cells to glass surfaces.

M. Lewitt, D. Shungu and E. Henderson: Colony morphology, cell growth and viral radiosensitivity as parameters for detecting strain differences in Epstein-Barr virus (EBV).

A. Gentil, G. Renault and A. Margot: The effect of the tumour promoter 12-*O*-tetradecanoyl-phorbol-13-acetate (TPA) on UV- and MNNG-induced sister chromatid exchanges in mammalian cells.

T. J. Hamblin, A. K. Abdul Ahad, J. Gordon, F. K. Stevenson and G. T. Stevenson: Preliminary experience in treating lymphocytic leukaemia with antibody to immunoglobulin idiotypes on the cell surface.

J. M. MacSween and S. L. Eastwood: Immunoglobulins associated with human tumours *in vivo*: IgG concentrations in eluates of colonic carcinomas.

D. Norfolk, J. A. Child, E. H. Cooper, S. Kerruish and A. Milford Ward: Serum β_2 microglobulin in myelomatosis: Potential value in stratification and monitoring.

S. Matzku, M. Zöller, U. Ikinge and M. R. Price: Organ-related and malignancy associated reactivity of cancer patients' leucocytes: A leucocyte migration study with tumour and foetal extracts.

M. J. Bailey, J.-C. Gazet and M. J. Peckham: Human breast cancer xenografts in immune-suppressed mice.

M. J. Bailey, J.-C. Gazet, I. E. Smith and G. G. Steel: Chemotherapy of human breast-carcinoma xenografts.

L.-J. van Bogaert, Ch. de Muylder, P. Maldague and H. Maisin: Prognostic implications of mean nuclear diameter in breast cancer.

J. Hilgers, A. Sonnenberg and R. Nüsse: Antigenic modulation of mammary tumour virus envelope antigen on GR thymic lymphoma cells in relation to expression of H-2, TL and Thy 1-2 cell-surface antigens.

A. Gabizon and N. Trainin: Enhancement of growth of a radiation induced lymphoma by T cells from normal mice.

R. Kearney and P. Harrop: Potentiation of tumour growth by endotoxin in serum from syngeneic tumour-bearing mice.

E. Smith, I. J. Stratford and G. E. Adams: Cytotoxicity of Adriamycin on aerobic and hypoxic Chinese hamster V79 cells *in vitro*.

J. M. Yuhas, J. M. Spellman, S. W. Jordan, M. C. Pardini, S. M. J. Afzal and F. Culo: Treatment of tumours with the combination of WR 2721 and *cis*-dichlorodiammineplatinum (II) or cyclophosphamide.

R. Rowley, H. A. Hopkins, W. L. Betsill, Jr., E. R. Ritenour and W. B. Looney: Response and recovery kinetics of a solid tumour after irradiation.

G. A. Bannilov, L. Saint Vincent and R. Montesano: Surface proteins in normal and transformed rat liver epithelial cells in culture.

Short Communications

N. A. Sheth, M. A. Adil, S. R. Shinde and A. R. Sheth: Paraendocrine behaviour of tumours of the gastrointestinal tract with reference to human placental lactogen.

C. R. Pinkerton, S. G. Welshman, S. I. Dempsey, J. M. Bridges and J. F. T. Glasgow: Absorption of methotrexate under standardized conditions in children with acute lymphoblastic leukaemia.

R. J. Grieve, K. L. Woods, P. R. Mann, S. C. H. Smith, G. D. Wilson and A. Howell: Effect of sodium butyrate on synthesis of specific proteins by human breast-carcinoma cells.

R. Saracci and F. Repetto: Breast cancer mortality trends in Italy.

T. Nomura, S. Hata, T. Enomoto, H. Tanaka and K. Shibata: Inhibiting effects of antipain on urethane-induced lung neoplasia in mice.
