Human Cancer

G. B. Cannon, J. H. Dean, R. B. Herberman, M. Keels and C. Alford: Lymphoproliferative responses to autologous tumor extracts as prognostic indicators in patients with resected breast cancer.

I. Kruczek, E. Schwarz and H. zur Hausen: Mutant of adenovirus type 12 after adaptation to growth in tumor cell lines: II. Reproducible acquisition of additional sequences after adaptation to a human cervical cancer line.

R. G. Woodbury, J. P. Brown, S. M. Loop, K. E. Hellström and I. Hellström: Analysis of normal and neoplastic human tissues for the tumor-associated protein p97.

B. J. Gormus, M. L. Basara, M. M. Oken, S. H. Leech and M. E. Kaplan: Capping of peripheral blood lymphocyte C3 receptors in chronic lymphocytic leukemia: Relationship to chemotherapy.

H. Yamamoto, T. Katsuki, S. Harada and Y. Hinuma: Enhancement of outgrowth of EB virus-transformed cells from normal human peripheral blood by a tumor promoter, TPA.

J. Fraser, P. E. Hollings, P. H. Fitzgerald, W. A. Day, V. Clark, D. C. Heaton, J. W. Hamer and M. E. J. Beard: Acute promyelocytic leukemia: Cytogenetics and bone marrow culture.

G. D. Mathew, L. F. Qualtiere, H. R. Neel III and G. R. Pearson: IgA antibody, antibody dependent cellular cytotoxicity and prognosis in patients with nasopharyngeal carcinoma.

L. Einhorn and E. Klein: EBV infection of mitogen-stimulated human B lymphocytes.

C. A. Biron, L. M. Hutt-Fletcher, G. T. Wertz and J. S. Pagano: Interferon production and activation of non-specific effector cells by stimulation with lymphoblastoid cell lines *in vitro*.

S. M. Camiolo, G. Markus, J. L. Evers, G. H. Hobika, J. L. DePasquale, S. Beckley and J. P. Grimaldi: Plasminogen activator content of neoplastic and benign human prostate tissues: fibrin augmentation of an activator activity.

R. Becher, G. Zimmer and C. G. Schmidt: Sister chromatid exchange and growth kinetics in untreated acute leukemia.

Experimental Cancer

M. J. Brunda, R. B. Herberman and H. T. Holden: Antibody-induced augmentation of murine natural killer cell activity.

P. Scuderi and C. Rosse: Tumor neutralization by immune *in vitro* sensitized splenocytes depends on an interaction with bone marrow derived cells.

A. Mantovani: *In vitro* effects on tumor cells of macrophages isolated from an early passage chemically-induced murine sarcoma and from its spontaneous metastases.

S. Becker and S. Haskill: Kinetics of inflammation and sarcoma cell development in primary Moloney sarcoma virus induced tumors.

M. Kende, F. Veronese, J. Dobbs, M. Dinowitz and G. J. Kelloff: Naturally occurring humoral immunity to endogenous xenotropic and amphotropic type-C virus in the mouse.

J. M. Gerson, L. Varesio and R. B. Herberman: Systemic and *in situ* natural killer and suppressor cell activities in mice bearing progressively growing murine sarcoma virus-induced tumors.

W. E. Davis, Jr., D. C. L. Jones, V. J. Rosen and D. P. Sasmore: Rapid hepatoma induction in rats by dipentylnitrosamine and its modification by other carcinogens.
