Human Cancer

R. B. Herberman, M. Bordes, P. H. Lambert, H. S. Luthra, R. A. Robins, P. Sizaret and A. Theofilopoulos: Special Report. Report on international comparative evaluation of possible value of assays for immune complexes for diagnosis of human breast cancer.

D. Metcalf: Induction of differentiation in murine myelomonocytic leukemic cells by the serum of patients with acute myeloid leukemia and other diseases.

P. Pantazis, P. S. Sarin and R. C. Gallo: Detection of a histone 2A related polypeptide in differentiated human myeloid cells (HL60) and its distribution in human acute leukemia.

A. B. Rickinson, D. J. Moss, D. J. Allen, L. E. Wallace, M. Rowe and M. A. Epstein: Reactivation of Epstein-Barr virus-specific cytotoxic T cells by *in vitro* stimulation with the autologous lymphoblastoid cell line.

G. Haemmerli and P. Sträuli: *In vitro* motility of cells from human epidermoid carcinomas. A study by phase contrast and reflection contrast cinematography.

P. H. Levine, N. Mourali, F. Tabbane, J. Loon, P. Terasaki, P. Tsang and J. K. Bekesi: Studies on the role of the cellular immunity and genetics in the etiology of rapidly progressing breast cancer in Tunisia.

S. Harada, T. Katsuki, H. Yamamoto and Y. Hinuma: Mechanism of enhancement of Epstein-Barr virus-induced transformation of peripheral blood lymphocytes by a tumor promoter, TPA, with special reference to lowering of cytotoxicity of T cells.

D. M. Peehl and E. J. Stanbridge: Characterization of human keratinocyte X HeLa somatic cell hybrids.

F. J. Benham, J. Fogh and H. Harris: Alkaline phosphatase expression in human cell lines derived from various malignancies.

H. Pfister, F. Nürnberger, L. Gissmann and H. zur Hausen: Characterization of a human papillomavirus from epidermodysplasia verruciformis lesions of a patient from Upper-Volta.

J. K. Roche, K.-S. Cheung, I. Boldogh, E.-S. Huang and D. L. Lang: Cytomegalovirus: Detection in human colonic and circulating mononuclear cells in association with gastrointestinal disease.

L. N. Mendis, J. M. Best and J. E. Banatvala: Class specific antibodies (IgG and IgA) to membrane antigens of herpes simplex type 2 infected cells in patients with cervical dysplasia and neoplasia.

Experimental Cancer

R. M. Brodskaya, A. A. Stavrovskaya, T. P. Stromskaya and J. M. Vasiliev: Clonal analysis of the ability of tumor cells to form colonies in semisolid medium.

F. Breitburd, M. Favre, R. Zoorob, D. Fortin and G. Orth: Detection and characterization of viral genomes and search for tumoral antigens in two hamster cell lines derived from tumors induced by bovine papillomavirus type 1.

D. A. Chow, L. B. Wolosin and A. H. Greenberg: Murine natural anti-tumor antibodies. II. The contribution of natural antibodies to tumor surveillance.

S. H. Lee, L. K. Thomas, F. M. Unger, R. Christian and A. C. Sartorelli: Comparative antineoplastic activity against P388 leukemia of 9- β -D-arabinofuranosyladenine (araA) and 9- β -(2'-azido-2'-deoxy-D-arabinofuranosyl)adenine (arazide).

E. Gorelik and R. B. Herberman: Radioisotope assay for evaluation of *in vivo* natural cell-mediated resistance of mice to local transplantation of tumor cells.

P. Stern, M. Gidlund, A. Kimura, K.-O. Grönvik and H. Wigzell: Murine embryonal carcinoma cells: universal targets for mammalian NK cells?
