April 1983

Human Cancer

P. D. Markham, S. Z. Salahuddin, V. S. Kalyanaraman, M. Popovic, P. Sarin and R. C. Gallo: Infection and transformation of fresh human umbilical cord blood cells by multiple sources of human T-cell leukemia-lymphoma virus (HTLV).

J. Walrath and J. F. Fraumeni, Jr.: Mortality patterns among embalmers.

G. Kvåle, E. Bjelke and J. J. Gart: Dietary habits and lung cancer risk.

H. Tsukuma, T. Mishima and A. Oshima: Prospective study of "early" gastric cancer.

M. S. Dhady and R. A. Walker: The localisation of prolactin binding sites in human breast tissue.

D. Zagury, D. Morgan, G. Lenoir, M. Fouchard and M. Feldman: Human normal CTL clones: generation and properties.

Y. Zeng, C. H. Gong, M. G. Jan, Z. Fun, L. G. Zhang and H. Y. Li: Detection of Epstein-Barr virus IgA/EA antibody for diagnosis of nasopharyngeal carcinoma by immunautoradiography.

H. B. Marsden, S. Kumar, J. Kahn and B. J. Anderton: A study of glial fibrillary acidic protein (GFAP) in childhood brain tumours.

Experimental Cancer

G. Carbone, M. P. Colombo, M. L. Sensi, A. Cernuschi and G. Parmiani: *In vitro* detection of cell mediated immunity to individual tumor-specific antigens of chemically induced BALB/c fibrosarcomas.

R. Simantov, F. Marks and L. Sachs: Control of endogenous cell regulators by the second stage tumor promoter phorbol-12-retinoate 13-acetate.

L. C. J. M. Oomen, P. Demant, A. A. M. Hart and P. Emmelot: Multiple genes in the H-2 complex affect differently the numbers and growth rate of transplacentally induced lung tumour in mice.

M. F. Di Renzo, L. Doneda, L. Larizza and P. M. Comoglio: Metastatic clones selected from an RSV-induced mouse sarcoma share a common marker chromosome.

S. Rasheed and M. B. Gardner: Resistance of fibroblasts and hematopoietic cells to ecotropic murine leukemia virus infection: and Akvr-1^R gene effect.

W. A. Lerner, E. Pearlstein, C. Ambrogio and S. Karpatkin: A new mechanism for tumor-induced platelet aggregation. Comparison with mechanisms shared by other tumors with possible pharmacologic strategy toward prevention of metastases.

L. Romani, R. Bianchi, P. Puccetti and M. C. Fioretti: Systemic adoptive immunotherapy of a highly immunogenic murine lymphoma growing in the brain.

N. B. Varshaver, M. I. Marshak and N. I. Shapiro: The mutational origin of serum independence in Chinese hamster cells *in vitro*.

H. Hoshino, M. Miwa and H. Fujiki: A new tumor promoter, dihydroteleocidin B₁ enhances cell growth and the production of murine leukemia virus by fibroblasts.

G. Yogeewaran, A. Grönberg, R. M. Welsh and R. Kiessling: Interferon-induced increase in neuraminidase releasable sialic acid and glycosphingolipid metabolism in mouse lymphoma and L1210 leukemic cell lines: correlation with susceptibility to natural killer cell mediated lysis.
