International Journal of Cancer

June 1983

Human Cancer

- K. R. Cooke, D. C. G. Skegg and J. Fraser: Trends in malignant melanoma of skin in New Zealand.
- P. Burtin, G. Chavanel, J. M. Foidart and J. Andre: Alterations of the basement membrane and connective tissue antigens in human metastatic lymph nodes.
- D. Zagury, J. Bernard, D. A. Morgan, M. Fouchard and M. Feldman: Phenotypic diversity within clones of human normal T cells.
- D. Trichopoulos, C.-c. Hsieh, B. MacMahon, T.-m. Lin, C. R. Lowe, A. P. Mirra, B. Ravnihar, E. J. Salber, V. G. Valaoras and S. Yuasa: Age at any birth and breast cancer risk.
- A. M. Sincock and J. Middleton: A semiautomated procedure for aiding the diagnosis of cervical neoplasms based on the measurement of acid labile DNA in exfoliated cells.
- H. W. Thielmann, E. Fischer, R. T. Dzarlieva, D. Komitowski, O. Popanda and L. Edler: Spontaneous *in vitro* malignant transformation in a xeroderma pigmentosum fibroblast line.
- T. Nakajima, T. Mori and T. Iwaguchi: Emergence of low mobility T lymphocytes in cancer patients and its clinical significance.
- D. J. Moss, S. R. Burrows, D. J. Castelino, R. G. Kane, J. H. Pope, A. B. Rickinson, M. P. Alpers and P. F. Heywood: A comparison of Epstein-Barr virus-specific T-cell-immunity in malaria-endemic and -nonendemic regions of Papua New Guinea.

Experimental Cancer

- M. Huleihel, J. Marvit and M. Aboud: The mechanism of interferon effect on cell transformation by murine sarcoma virus.
- E. Hurwitz, R. Kashi, D. Burowsky, R. Arnon and J. Haimovich: Site-directed chemotherapy with a drug bound to anti-idiotypic antibody to a lymphoma cell surface IgM.
- S. Ansel: *In vitro* induction of tumor-specific immunity by highly purified VSV grown in SV40-transformed cells and tumor glycolipids incorporated into liposomes.
- J. S. Rhim, M. Kraus and P. Arnstein: Neoplastic transformation of fetal lamb kidney cells by bovine leukemia virus.
- H. Higashida, K. Kano-Tanaka, S. Natsuume-Sakai, K. Sudo, H. Fukami, Y. Nakagawa and N. Miki: Cytotoxic action of prostaglandin D₂ on mouse neuroblastoma cells.
- A. J. Likhachev, V. A. Alexandrov, V. N. Anisimov, V. G. Bespalov, M. N. Korsakov, A. I. Ovsyannikov, I. G. Popovic, N. P. Napalkov and L. Tomatis: Persistence of methylated purines in the DNA of various rat fetal and maternal tissues and carcinogenesis in the offspring following a single transplacental dose of *N*-methyl-*N*-nitrosourea.
- T. Morizane and H. O. Sjögren: A leukocyte adherence inhibition (LAI) assay of anti-tumor immunity in rats using selective radioimmunological assessment of adherence of T lymphocytes and monocytes.
- T. Morizane and H. O. Sjögren: Detection of different states of immunity to colon cancer in rats by a leukocyte adherence inhibition (LAI) assay assessing the adherence of T lymphocytes and monocytes selectively.
- R. Hentschel and E. Kölsch: Analysis of the growth characteristics of a primary BALB/c IgG plasmacytoma.
- K. Ogawa, K. Yokokawa, T. Tomoyori and M. Narasaki: Initiation of focal hyperplastic hepatic lesions by transplacental administration of ethylnitrosourea in rats of F1 generation, and no transmission of the effect to F2 and F3 generations.
- M. Prat, M. F. Di Renzo and P. M. Comoglio: Characterization of T-lymphocytes mediating *in vivo* protection against RSV-induced murine sarcomas.
- P. Puccetti, A. Giamprietri, F. Campanile, L. Romani and M. C. Fioretti: Antilymphoma graft responses in the mouse brain: a study of T-dependent functions.
