

Seminars and Posters Sessions on:  
 Cellular oncogenes and transforming proteins  
 Chromosomes and cancer genetics  
 Viral carcinogenesis  
 Growth factors hormones and cancer  
 Cancer and cell differentiation  
 Tumour promotion and progression  
 Invasion and metastasis  
 Host defence  
 Antineoplastic agents  
 Monitoring of carcinogenic exposure  
 Susceptibility to cancer  
 Epidemiological approaches to carcinogenesis

For further details and to ensure receipt of the second announcement, please apply to the following: EACR-87, IX EACR Meeting, Duodecim, Kalevankatu 11, 00100 Helsinki, Finland.

#### EACR—ITALIAN FELLOWSHIP PROGRAMME IN CANCER RESEARCH

This fellowship programme is sponsored by the Italian Association for Cancer Research (Associazione Italiana per la Ricerca sul Cancro, AIRC).

Applications are invited from scientists and clinicians specifically in Europe to undertake cancer research projects in Italy. The Fellowships are designed to provide financial support for researchers to spend from 3 months to 1 year in Italian research institutions and the awards will include travel expenses to and from the host institution. The stipend will be related to age and experience and based upon national pay scales for academic research workers in Italy.

Proposed projects may be concerned with any aspect of research in cancer including chemical and viral carcinogenesis, epidemiology, tumour biology, biochemistry, genetics, immunology, immunotherapy, chemotherapy and radiotherapy. However, preference will be given to investigations on basic topics in cancer research.

Applicants should have worked actively in cancer research for at least 2 years and they should possess a doctorate degree or the equivalent. Applications should contain a curriculum vitae including a description of the proposed research project, details of travel expenses requested and a letter of approval of the proposed research project and invitation from the host institution in Italy.

The closing date for application will be 1 April and 1 October of each year and the applicants will be notified of the award about 3 months following each closing date.

Please apply to the Secretariat of EACR at the following address for further details and application forms: Dr. M.R. Price, Secretariat of EACR, Cancer Research Campaign Laboratories, University of Nottingham, Nottingham NG7 2RD, U.K.

National Cancer Institute – National Institutes of Health

and

The European Organization for Research and Treatment of Cancer

#### THE FIRST CONFERENCE ON DNA TOPOISOMERASES IN CANCER CHEMOTHERAPY

Wednesday and Thursday, 19 and 20 November 1986

This Conference will be the first symposium focused on the role that DNA topoisomerases play in cancer cell biology and in cancer chemotherapy. The importance of the enzymes as mediators of drug-related DNA damage has become well established. Topoisomerases are very likely the principal target of some of the most valuable anticancer drugs such as anthracyclines, amsacrine and epipodophyllotoxins.

The goal of the meeting is to assess present accomplishments, discuss future directions in this new field of cancer research, and to accelerate the information transfer into clinical studies.

Registrants in fields of biochemistry, cancer research and clinical oncology are invited to participate in panel discussions following formal lectures and in a proffered poster-discussion session.

#### Faculty

A. Bodley, Baltimore	K. W. Kohn, Bethesda	M. Potmesil, New York
D. S. Coffey, Baltimore	G. C. Li, San Francisco	W. Ross, Gainesville
S. C. R. Elgin, St. Louis	L. F. Liu, Baltimore	T. C. Rowe, Gainesville
