

**EDITORIAL:  
SOFTWARE SURVEY SECTION**

The purpose of the Software Survey Section in EUROPEAN JOURNAL OF CANCER & CLINICAL ONCOLOGY is to encourage the open exchange of information on software programs unique to our professional field. With the rapid penetration of computers into academic and industrial institutions has come a parallel increase in the number of scientists and researchers designing their own software. The existence of much of this software remains unknown to even those of us who could most benefit from its use. We believe that it is of vital importance to our readers that such information be made available. We believe also that a professional journal is the best place to share such information. Your contribution would be most welcome.

The questionnaire on the following pages is designed to assist you in reporting on software that you may have developed or be in the process of developing. By completing this form, your information will reach thousands of your colleagues who may benefit from your work and may possibly offer suggestions for further enhancements to your software. Please complete the enclosed form and return it to:

Professor H. Tagnon  
Institut Jules Bordet  
Centre des Tumeurs  
1 rue Heger-Bordet  
B-1000 Bruxelles, Belgium

We do not intend to review or comment on the contents of the questionnaire. It will be published as is in order to expedite the information cycle process. I would welcome any comments you may have.
