

## ANNOUNCEMENT

### EUROPEAN JOURNAL OF CANCER IMPACT FACTOR

An error in the recently issued 1994 Journal Citation Reports (R) has been brought to our attention. In this, the citation impact factor for the *European Journal of Cancer* (Part A) is given as 0.789. ISI, who publish the Journal Citation Reports, have calculated a revised 1994 impact factor for *European Journal of Cancer*:

*Impact Factor (1994)*

*European Journal of Cancer* (Part A): 2.141 (not 0.789 as published).

The Editors and all the associated organisations (EORTC, ESO, EACR, FECS) have always striven for quality in the *European Journal of Cancer*. We hope that the above clarification will prevent any misunderstanding otherwise.
