

**A Third Series of Paediatric Updates
will be launched in 2003**

Following on from the success of the first two Series of “Updates”, the *EJC* is now commissioning a series of articles collectively entitled:

HOT TOPICS IN PAEDIATRIC ONCOLOGY

Titles include:

- Is Child Cancer on the increase?
- Inherited Cancer in children – practical and ethical challenges
- How to get the best from your Pathologist
- Has Chemotherapy reached its limits?
- Role of the Nurse Consultant
- Funding streams for Child Cancer
- New radiotherapy techniques
- Outcome of child Cancer treatment – an uneven playing field?
- The promise of “targeted therapy”
- Cost-effective radiology in paediatric oncology
- Role of the surgeon in contemporary Paediatric Oncology
- Childhood Cancer – a “chronic disease”?
- Aetiology of Childhood Cancer
- CNS-directed treatment in ALL – most gain, least damage

We already have an array of distinguished, invited authors with their pens poised so... watch out for this Series which, the Editors expect, will be both challenging and controversial.

Editor Paediatric Oncology: *Jon Pritchard*
