

The *European Journal of Cancer* would like to announce:

A forthcoming Special Issue entitled:

**“Gene transcription and cancer,
from the Genome Project to practical
achievements in diagnosis and therapy”**

Titles include:

- The Human Genome Project and the discovery of genetic determinants of cancer susceptibility
- Transcription profiling of gene expression in drug discovery and development: the NCI experience
- Improvement of the selectivity of cancer treatment by interfering with cell response pathways
- Gene expression microarray technologies in the development of new therapeutic agents
- Biomarkers of ovarian tumours
- Circulating biomarkers from tumour bulk to tumour machinery: promises and pitfalls
- Genomic and proteomic technologies for individualisation and improvement of cancer treatment
- Interpretation of expression profiling results obtained from different platforms and tissue sources: an example from prostate cancer data

Guest Editors:

Professor Renato Dulbecco and Dr Maurizio D’Incalci
