ACCREDITATION COUNCIL OF
ONCOLOGY IN EUROPE

The Accreditation Council of Oncology in Europe (ACOE) has reviewed and approved the scientific quality and educational value of the events listed below.

Following the recommendation of both ACOE and the CME national authority or national scientific society from the hosting country, the European Accreditation Council for CME (EACCME) operated by the European Union of Medical Specialists (UEMS) has granted European accreditation to these events.

European accreditation entitles delegates to gain European CME credits (ECMEC's) from participating in the scientific programme (i.e. satellite symposia excluded) of the concerned activities. These credits can be exchanged against national CME credits in the countries adhering to the European system put in place by the UEMS as well as in the United States, following an agreement of mutual recognition with the American Medical Association (AMA).
