

Synthesis, Crystal Structures and Electrical Conductivities of the Ionic Liquid Compounds Butyldimethylimidazolium Tetrafluoroborate, Hexafluorophosphate and Hexafluoroantimonate

Philipp Kölle^[a] and Richard Dronskowski^{*[a]}

Keywords: Electrochemistry / Ionic liquids / Packing efficiency / X-ray diffraction

The unit of the conductivities in Figure 7 on p. 2317 and in Table 3 on p. 2318 of the original article^[1] is incorrect; the correct unit is mS cm^{-1} .
