

The EUChemSoc Societies have taken the significant step into the future by merging their traditional journals, to form two leading chemistry journals, the *European Journal of Inorganic Chemistry* and the *European Journal of Organic Chemistry*. Three further EUChemSoc Societies (Austria, Czech Republic and Sweden) are Associates of the two journals.

COVER PICTURE

The cover picture shows how aminoguanidine may behave as either a monodentate or bidentate ligand in square-planar complexes of platinum or palladium. In each case, the coordinating ligands can participate in extensive hydrogen-bonding networks. Details are discussed in the article by D. J. Aitken, J. Kozelka et al. on p. 3327 ff.
