EUChemSoc

The EUChemSoc Societies have taken the significant step into the future by merging their traditional journals, to form two leading chemistry journals, the *European Journal of Inorganic Chemistry* and the *European Journal of Organic Chemistry*. Three further EUChemSoc Societies (Austria, Czech Republic and Sweden) are Associates of the two journals.

COVER PICTURE

The cover picture shows the crystal structure of a novel intermediate in the *p*-nitroacetophenone 4-methylthiosemicarbazone platination, [PtL1(L1H₂)], with potential application as an antitumoral drug. The complex is above an NCI-H460 cell culture background labelled to discriminate between live and dead cells by confocal microscopy. Details are discussed in the Short Communication by A. G. Quiroga et al. on p. 1183ff.
