Photochromic Azobenzene–Phosphanes

A Journal of

WILEY-VCH

www.eurjic.org

EurJIC is co-owned by 11 societies of ChemPubSoc Europe, a union of European chemical societies for the purpose of publishing high-quality science. All owners merged their national journals to form two leading chemistry journals, the *European Journal of Inorganic Chemistry* and the *European Journal of Organic Chemistry*. Three further members of ChemPubSoc Europe (Austria, Czech Republic and Sweden) are Associates of the two journals.

Other ChemPubSoc Europe journals are *Chemistry – A European Journal*, *ChemBioChem*, *ChemPhysChem*, *ChemMedChem*, *ChemSusChem* and *ChemCatChem*.

COVER PICTURE

The cover picture shows the light-induced isomerization of (*E,E,E*)-tris(azobenzene)–phosphane to the (*Z,E,E*), (*Z,Z,E*) and (*Z,Z,Z*) conformers. This photo-triggered skeletal change has been illustrated by the natural umbrella-like shape and movements of jellyfish. Details of the synthesis and switchability of this type of ligands and their platinum complexes are discussed in the Short Communication by Z. Freixa et al. on p. 2075 ff.
