

Acknowledgements

I am grateful to Elsevier for having agreed to publish, as a special issue of the European Journal of Mechanics-B/Fluids, this collection of selected articles presented at Euromech Colloquium 364 'Dynamics and Statistics of Concentrated Vortices in Turbulent Flow'.

I would like to thank the Scientific Committee composed of Y. Couder (Paris), S. Kida (Kyoto), R. Klein (Wuppertal), J. Jimenez (Madrid), Y. Gagne (Grenoble), T. Lundgren (Minneapolis), H. K. Moffatt (Cambridge, Co-chairman), D. Pullin (Pasadena) and A. Tsinober (Tel-Aviv) for their help in the selection of the papers. They had the difficult task of keeping only one fourth of all the papers presented at the colloquium. Special thanks go to all my colleagues in the Institut de Recherche sur les Phénomènes Hors Equilibre who assisted in the preparation and the organisation of the colloquium, in particular the members of the organising committee (M. Abid, T. Leweke, A. Verga).

The success of the colloquium and the publication of the issue were made possible thanks to the financial support received from Conseil Régional Provence, Alpes, Côte d'Azur; Conseil Général des Bouches du Rhône; Commissariat à l'Energie Atomique; The European Commission; Délégation Générale pour l'Armement; Centre National de la Recherche Scientifique; Université de Provence; Association Universitaire de Mécanique; the city of Carry-le-Rouet; Ministère de l'Education Nationale, de l'Enseignement Supérieur et de la Recherche; The European Mechanics Society; and Institut de Recherche sur les Phénomènes Hors Equilibre. These institutions are gratefully acknowledged.

S. le Dizès
Chairman of the colloquium
