

ANNUAL CONTENTS

(6 issues)

P. Barthelet, F. Charru. – Benjamin-Feir and Eckhaus instabilities with galilean invariance: the case of interfacial waves in viscous shear flows	1
D. Daboussy, F. Dias, J.-M. Vanden-Broeck. – Gravity flows with a free surface of finite extent	19
M. Nagata. – Nonlinear analysis on the natural convection between vertical plates in the presence of a horizontal magnetic field	33
R. Monti, R. Savino, S. Tempesta. – Wetting prevention by thermal Marangoni effect. Experimental and numerical simulation	51
S. Colin, C. Aubert, R. Caen. – Unsteady gaseous flows in rectangular microchannels: frequency response of one or two pneumatic lines connected in series	79
L. Jourdan, Y. Knapp, F. Oliver, J. P. Guibergia. – effect of drag-reducing polymer additives on wall-pressure fluctuations in turbulent channel flows ..	105

D. A. Hammond, L. G. Redekopp. – Local and global instability properties of separation bubbles	145
D. W. Lim, L. G. Redekopp. – Absolute instability conditions for variable density, swirling jet flows	165
R. P. Roger, P. D. Weidman. – Axisymmetric Stokes drag on hollow cylinders: Computation and comparison with experiment	187
B. S. Tilley, P. D. Weidman. – Oblique two-fluid stagnation-point flow	205
J. J. Healey. – Characterizing boundary-layer instability at finite Reynolds numbers	219
L. Martin Witkowski, P. Marty. – Effect of a rotating magnetic field of arbitrary frequency on a liquid metal column	239
L. Popken. – Grid-free particle method for the inhomogeneous Enskog equation and its application to a Riemann-problem	255

Y. Sone, F. Golse, T. Ohwada, T. Doi. – Analytical study of transonic flows of a gas condensing onto its plane condensed phase on the basis of kinetic theory	277
C. Roget, J. Ph. Brazier, J. Cousteix, J. Mauss. – A contribution to the physical analysis of separated flows past three-dimensional humps ..	307
P. Laplace, É Arquis. – Boundary layer over a slotted plate	331
P. E. Hancock. – Plane multiple screens in non-uniform flow, with particular application to wind tunnel settling chamber screens	357
G. A. Shugai, P. A. Yakubenko. – Spatio-temporal instability in free ultra-thin films	371

J. Jiménez. – Small scale intermittency in turbulence	405
A. Tsinober. – Is concentrated vorticity that important?	421
B. Andreotti, J. Maurer, Y. Couder, S. Douady. – Experimental investigation of turbulence near a large scale vortex	451
S. Kida, H. Miura. – Identification and analysis of vortical structures	471
H. Willaime, F. Belin, P. Tabeling. – Structures and transition in a high Reynolds number experiment	489
F. O. Minotti, C. Ferro-Fontán. – Navier–Stokes probability density function ..	505
M. J. Giles. – Is the renormalisation group useless in turbulence?	519
J. F. Pinton, F. Chillà, N. Mordant. – Intermittency in the closed flow between coaxial corotating disks	535
P. Petitjeans, J. H. Robres, J. E. Wesfreid, N. Kevlahan. – Experimental evidence for a new type of stretched vortex	549
H. C. Kuhlmann, M. Wanschura, H. J. Rath. – Elliptic instability in two-sided lid-driven cavity flow	561
T. Leweke, C. H. K. Williamson. – Three-dimensional instabilities in wake transition	571
D. C. Samuels. – A finite-length instability of vortex tubes	587
S. Arendt, D. C. Fritts, Ø. Andreassen. – Kelvin twist waves in the transition to turbulence	595
A. Lifschitz, T. Miyazaki, B. Fabijonas. – A new class of instabilities of rotating flows	605
P. Comte, J. H. Silvestrini, P. Bégou. – Streamwise vortices in Large-Eddy simulations of mixing layers	615
J. E. Martín, E. Meiburg. – The growth and nonlinear evolution of helical perturbations in a swirling jet model	639
K. Bajer. – Flux expulsion by a point vortex	653
M. Abid, M. E. Brachet, J. Maurer, C. Nore, P. Tabeling. – Experimental and numerical investigations of low-temperature superfluid turbulence	665

L. D. Söderberg, P. H. Alfredsson. – Experimental and theoretical stability investigations of plane liquid jets	689
M. Hărăguș-Courcelle, A. Il'ichev. – Three-dimensional solitary waves in the presence of additional surface effects	739
D. Benedetto, E. Caglioti. – A Stationary Action Principle for the water sheet	769
R. M. Barron, B. S. Dandapat. – Steady thermocapillary and buoyancy driven flow in two-dimensional slots	773

S. Le Dizès, A. Verga, B. K. Moffatt, P. Huerre. – Erratum. Dynamics and statistics of concentrated vortices in turbulent flows	789
R. Debuchy, A. Dymont, H. Muhe, P. Mischeau – Radial inflow between a rotating and a stationary disc	791
J. Asavanant, J.-M. Vanden-Broeck – Free-surface supercritical splashless flows past a two-dimensional symmetrical rectilinear body ...	811
K. J. A. Westin, A. A. Bakchinov, V. V. Kozlov, P. H. Alfredsson. – Experiments on localized disturbances in a flat plate boundary layer. Part 1. The receptivity and evolution of a localized free stream disturbance	823
A. A. Bakchinov, K. J. A. Westin, V. V. Kozlov, P. H. Alfredsson. – Experiments on localized disturbances in a flat plate boundary layer. Part 2. Interaction between localized disturbances and TS-waves	847
C. Nouar, D. C. Desaubry, E. H. Zenaidi. – Numerical and experimental investigation of thermal convection for a thermodependent Herschel-Bulkley fluid in an annular duct with rotating inner cylinder	875
