

Synthesis of Galactofuranosides by Regioselective Ring Opening of a 1,4-Anhydrogalactopyranose Derivative: A Possible Chemical Model for an Unprecedented Enzymatic Reaction

José Kovensky and Pierre Sinaÿ*

Eur. J. Org. Chem. **2000**, 3523–3525

Erroneously, instead of the graphic for Scheme 1 the graphical abstract for the Table of Contents appears on page 3523 and vice versa. The correct graphic for Scheme 1 is given below.

Scheme 1. Regioselective ring opening of the benzylated bicyclic compound **1** by various nucleophiles under acidic conditions

P. Sinaÿ
[C O00156]
