

The EUChemSoc Societies have taken the significant step into the future by merging their traditional journals, to form two leading chemistry journals, the *European Journal of Inorganic Chemistry* and the *European Journal of Organic Chemistry*. Three further EUChemSoc Societies (Austria, Czech Republic and Sweden) are Associates of the two journals.

## COVER PICTURE

The cover picture shows at the center the long tail-substituted trefoil knot species synthesized and investigated in this publication. The three peripheric segments show on the upper left side the enantiomers of these topologically chiral compounds, on the upper right side the detected triply bridged double knot and on the bottom a schematical illustration of the obtained Langmuir–Blodgett films. Details are discussed in the article by F. Vögtle et al. on p. 45ff.
