A Journal of

A union formed by chemical societies in Europe (ChemPubSoc Europe) has taken the significant step into the future by merging their traditional journals, to form two leading chemistry journals, the *European Journal of Inorganic Chemistry* and the *European Journal of Organic Chemistry*. Three further members of ChemPubSoc Europe (Austria, Czech Republic and Sweden) are Associates of the two journals.

## COVER PICTURE

The cover picture shows a dizinc phosphohydrolase model built on a *m*-terphenyl scaffold that binds pyrophosphate with concomitant displacement of complexometric indicators; this leads to dramatic color changes that can be detected visually and quantified spectroscopically. Details are discussed in the article by R. C. Smith et al. on p. 343ff.
