A Journal of

(ChemPubSoc Europe) has taken the significant step into the future by merging their traditional journals, to form two leading chemistry journals, the European Journal of Inorganic Chemistry and the European Journal of Organic Chemistry. Three further members of ChemPubSoc Europe (Austria, Czech Republic and Sweden) are Associates of the two journals.

A union formed by chemical societies in Europe

COVER PICTURE

The cover picture shows the reaction between fluoro alcohols and arvl halides in the presence of copper iodide to afford fluoro ethers. The incorporation of the trifluoroethoxy moiety generally brings lipophilicity and metabolic stability to the substrate, and this group is found in numerous pharmaceuticals such as Flecainide. Details are discussed in the article by J. Legros, B. Crousse et al. on p. 3513ff. The Région Ile-de-France is kindly acknowledged for support.
