EurJOC is co-owned by 11 societies of ChemPubSoc Europe, a union of European chemical societies for the purpose of publishing high-quality science. All owners merged their national journals to form two leading chemistry journals, the *European Journal of Organic Chemistry* and the *European Journal of Inorganic Chemistry*. Three further members of ChemPubSoc Europe (Austria, Czech Republic and Sweden) are Associates of the two journals.

Other ChemPubSoc Europe journals are *Chemistry – A European Journal*, *ChemBioChem*, *ChemPhysChem*, *ChemMedChem*, *ChemSusChem* and *ChemCatChem*.

COVER PICTURE

The cover picture shows how a bulky protecting group directs the intramolecular Nozaki–Hiyama–Kishi reaction to afford exclusively one stereo-isomer, whereas a small protecting group directs the reaction to afford both *anti* and *syn* isomers in a 2:1 ratio. Details are discussed in the article by D. K. Mohapatra, J. S. Yadav et al. on p. 4775ff.
