

Pseudorotaxanes and Rotaxanes Incorporating Cycloheptatrienyl Stations – Synthesis and Co-Conformation

Lutz Grubert, Dirk Jacobi, Karin Buck, Werner Abraham,* Clemens Mügge,
and Eberhard Krause

Eur. J. Org. Chem. **2001**, 3921–3932

The first two sentences of the first full paragraph in the right-hand column of page 3921 are misprinted. The correct version is:

Stoddart and Balzani^[5] have very recently reported a light-controlled rotaxane. It only works, however, in the presence of external redox compounds.
