

Brominated 4-(Trifluoromethyl)pyrimidines: A Convenient Access to Versatile Intermediates

Levente Ondi,^[a] Olivier Lefebvre,^[a] and Manfred Schlosser^{*,[a,b]}

Keywords: Pyrimidines / Trifluoromethyl groups / Bromination / Chlorination / Iodination / Reduction / 1,1,1-Trifluoro-4-methoxy-2-buten-3-one / Ethyl 4,4,4-trifluoroacetoacetate

Throughout this article^[1] the incorrect reagent names “phosphorus tribromide” and “phosphorus trichloride” should be replaced by the correct names “phosphoric tribromide” (POBr₃) and “phosphoric trichloride” (POCl₃).
