

Corrigendum

Corrigendum to “In vitro evaluation of liposomes containing bio-enhancers for the oral delivery of macromolecules”

Johannes Parmentier*, Felix J. Hartmann, Gert Fricker

Department of Pharmaceutical Technology and Biopharmacy, University of Heidelberg, Heidelberg, Germany

The Authors regret that an incorrect figure file was supplied for Fig. 6 when this article was submitted and published originally. The correct figure is reproduced below.

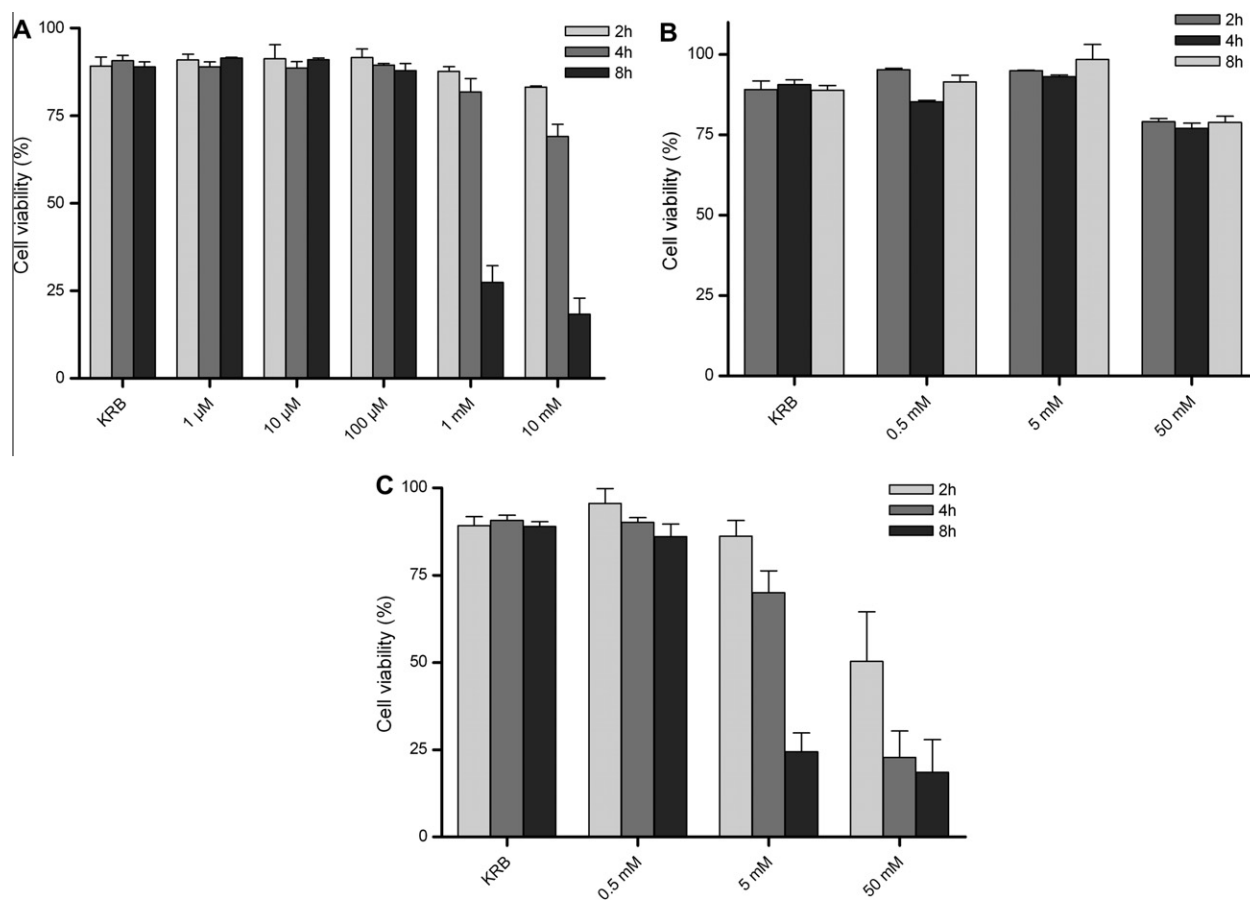

Fig. 6. Cell viability in the LDH assay after 2-, 4- and 8-h incubation with (A) TPGS 1000 in KRB, (B) liposomes with 10% CS and 2.5% SA in KRB and (C) liposomes with 25% CpCl in KRB. Bars represent cell viability in% and are given as means \pm SEM with $n = 3$.
