Aims and Scope

The *European Journal of Pharmaceutics and Biopharmaceutics* provides a medium for publication of novel and innovative research from the areas of Pharmaceutical Technology, Pharmaceutical Biotechnology and Biopharmaceutics.

Topics covered include: • Drug and pro-drug design, drug stability and drug development • Development, formulation and manufacturing of pharmaceuticals and biopharmaceuticals • Physical pharmacy, drug delivery systems, controlled release systems and drug targeting • Biopharmaceutics • Pharmaceutical analysis and pharmaceutical packaging • Quality control, GMP and regulatory aspects • Medical devices.

The following types of papers are considered by the Editors: Research Papers, Review Articles, Short Reviews (Expert Opinions) and Notes.

The Rules of 3

The Editors and Editorial board have developed the “**Rules of 3**”. Authors must consider the following three criteria before they submit a manuscript and set the whole process of editing and reviewing at work:

1. The paper must report on recent advances in pharmaceutical technology, biopharmaceutics and pharmaceutical biotechnology of major importance.
2. A paper must be based on a thorough and extensive study, using established or well-described methods and including proper controls. Research must be hypothesis-driven and conclusions must be supported by the data presented.
3. The study described in the manuscript must represent a novel approach.

The rules are also used as guidelines for the peer review of manuscripts and are detailed on the journal homepage www.elsevier.com/locate/ejpb
