

8th World Meeting on Pharmaceutics, Biopharmaceutics and Pharmaceutical Technology

Istanbul

Turkey 19th to 22nd March 2012

With hot topic lectures on:

- Quality by Design/PAT
- Continuous Production
- Industrial Scale Production of Smallest Batches
- Vaccine Development/Therapeutic Vaccination
- Innovative Parenteral Preparations
- Counterfeiting of Drugs and Drug Products
- Dosage Forms for Paediatrics and Geriatrics
- Oral Products for Poorly Water Soluble Drugs
- Polymeric Excipients for Oral and Parenteral Applications
- Orphan Application Sites for Drugs: Ear, Nose, Eye
- Therapeutic Protein Modifications and Biological Relevance
- Drug Regulatory Affairs
- Solid dosage forms
- Dissolution Testing/Quality Control

Turkey Istanbul

19th – 22nd March 2012

Dear Colleagues,

The development of medicines has become increasingly challenging in recent years. Our continuous progress towards a better understanding of many diseases has led us to new therapies, new targets and finally new drugs that are extremely demanding. On the one hand small molecules and biologics require new technologies to make them available to the patient. On the other hand new products and generics need to be affordable which is putting a tremendous pressure on their industrial production. This development is posing not only major challenges to research, development and manufacturing but also to all aspects related to the safety of products from quality control to regulatory affairs. APGI (French "Association de Pharmacie Galénique Industrielle"), APV (German "International Association for Pharmaceutical Technology") and A.D.R.I.T.E.L.F. (Italian "Associazione Docenti Ricercatori Italiani di Tecnologie e Legislazione Farmaceutiche") invite you to discuss the risks, opportunities and challenges of this development.

The outstanding success of the previous World Meetings was achieved by the joint effort of the organizing societies. Due to the great interest in symposia on industry related topics in the past, this concept will be continued, two of four parallel oral presentation sessions will be provided by invited speakers from industry and academia.

In addition to two parallel sessions on industry related topics, the 8th World Meeting, like its predecessors, will have two more parallel symposia tracks that provide ample room for a great number of oral presentations. Young and established scientists from all over the world will be provided with the opportunity to present their work, discuss new scientific findings and share their experience with colleagues on a broad range of topics related to Pharmaceuticals, Biopharmaceutics and Pharmaceutical Technology. Along with the poster presentation the exhibition ResearchPharm will take place presenting the newest trends and novel products in the area of pharmaceutical ingredients, processing equipment, analytical technologies, medicinal products, medical devices, contract manufacturing and recent publishing.

We cordially invite you to join the 8th World Meeting and would be glad to welcome you in Istanbul!

On behalf of the organizing committee

Prof. Achim Göpferich

Chair of the Program Committee

Prof. Jürgen Siepmann
President APGI

Prof. Jörg Breitzkreutz
President APV

Prof. Franco Alhaique
President A.D.R.I.T.E.L.F.
