

## Editorial

As of 1 January 1996 certain changes will be made with the aim of ensuring the quality of the *European Journal of Pharmacology* and of improving the accessibility of its contents per issue.

Articles will be grouped under headings to make it easier for readers to find articles of their interest. These headings will be:

**Behavioural pharmacology**

**Neuropharmacology and analgesia**

**Cardiovascular pharmacology**

**Pulmonary, gastrointestinal and urogenital pharmacology**

**Endocrine pharmacology**

**Immunopharmacology and inflammation**

**Molecular and cellular pharmacology**

The section *Environmental Toxicology and Pharmacology* will be separated from the *European Journal of Pharmacology* and will continue as an independent journal entitled *Environmental Toxicology and Pharmacology*.

The section *Molecular Pharmacology* will no longer be published as separate issues but will continue under the heading *Molecular and cellular pharmacology* of the *European Journal of Pharmacology*.

We believe that these changes will benefit both authors and readers.
