

## Editorial

As of 1 January 1996 certain changes have been made with the aim of ensuring the quality of the *European Journal of Pharmacology* and of improving the accessibility of its contents per issue.

Articles will be grouped under headings to make it easier for readers to find articles of their interest. These headings are:

**Behavioural pharmacology**

**Neuropharmacology and analgesia**

**Cardiovascular pharmacology**

**Pulmonary, gastrointestinal and urogenital pharmacology**

**Endocrine pharmacology**

**Immunopharmacology and inflammation**

**Molecular and cellular pharmacology**

The section *Environmental Toxicology and Pharmacology* has been separated from the *European Journal of Pharmacology*; it continues as an independent journal entitled *Environmental Toxicology and Pharmacology*.

The section *Molecular Pharmacology* is no longer published as separate issues but continues under the heading *Molecular and cellular pharmacology* of the *European Journal of Pharmacology*.

We believe that these changes will benefit both authors and readers.
