

Volume contents

Volume 110 No. 1 January 2004

Interaction between Likubin bacterium and <i>Phytophthora parasitica</i> in citrus hosts	1–6
P.-J. Ann, W.-H. Ko and H.-J. Su	
Development of PCR primers for a new <i>Fusarium oxysporum</i> pathogenic on Paris daisy (<i>Argyranthemum frutescens</i> L.)	7–11
M. Pasquali, A. Acquadro, V. Balmas, Q. Migheli, M.L. Gullino and A. Garibaldi	
Resistance to <i>Botrytis cinerea</i> in <i>Solanum lycopersicoides</i> is dominant in hybrids with tomato, and involves induced hyphal death	13–23
R.L. Guimarães, R.T. Chetelat and H.U. Stotz	
Specific detection of <i>Ralstonia solanacearum</i> 16S rRNA sequences by AmpliDet RNA	25–33
J.M. Van der Wolf, J.R.C.M. Van Beckhoven, E.G. De Haan, G.W. Van den Bovenkamp and G.O.M. Leone	
Selection and screening of endorhizosphere bacteria from solarized soils as biocontrol agents against <i>Verticillium dahliae</i> of solanaceous host	35–44
E.C. Tjamos, D.I. Tsitsigiannis, S.E. Tjamos, P.P. Antoniou and P. Katinakis	
Detection and tentative grouping of <i>Strawberry crinkle virus</i> isolates	45–52
M.M. Klerks, J.L. Lindner, D. Vaškova, J. Špak, J.R. Thompson, W. Jelkmann and C.D. Schoen	
Characterisation of <i>Rhizoctonia solani</i> anastomosis groups causing bottom rot in field-grown lettuce in Germany	53–62
R. Grosch, J.H.M. Schneider and A. Kofoet	
Competition effects among isolates of <i>Fusarium culmorum</i> differing in aggressiveness and mycotoxin production on heads of winter rye	63–70
T. Miedaner, A.G. Schilling and H.H. Geiger	
The potential for the rapid screening of potato cultivars (<i>Solanum tuberosum</i>) for resistance to powdery scab (<i>Spongospora subterranea</i>) using a laboratory bioassay	71–77
U. Merz, V. Martinez and R. Schwärzel	
Evaluation of olive cultivars for resistance to <i>Verticillium dahliae</i>	79–85
F.J. López-Escudero, C. del Río, J.M. Caballero and M.A. Blanco-López	
<i>Short communication</i>	
A new method for producing mycelium-free conidial suspensions from cultures of <i>Microdochium nivale</i>	87–90
R.A. Browne and B.M. Cooke	
Development and evaluation of an <i>in vitro</i> detached leaf assay for pre-screening resistance to <i>Fusarium</i> head blight in wheat	91–102
R.A. Browne and B.M. Cooke	
<i>Short communication</i>	
Possible root infection of <i>Cercospora beticola</i> in sugar beet	103–106
J. Vereijssen, H.J.H.M. Schneider and A.A.J. Termorshuizen	

Instructions to authors	107–110
-------------------------	---------

Contents Volume 110 No. 2 February 2004

Compatible biological and chemical control systems for <i>Rhizoctonia solani</i> in potato	111–118
P.H.J.F. van den Boogert and A.J.G. Luttikholt	
Interactive effects of host, pathogen and mineral nutrition on grey leaf spot epidemics in Uganda	119–128
P. Okori, P.R. Rubaihayo, E. Adipala and C. Dixelius	
Cytology of cork layer formation of citrus and limited growth of <i>Elsinoe fawcettii</i> in scab lesions	129–138
K.W. Kim, J.-W. Hyun and E.W. Park	
Pathogenic and genetic diversity of soilborne isolates of <i>Cylindrocladium</i> from banana cropping systems	139–154
J.-M. Risède and P. Simoneau	
Effect of irrigation regimes on disease expression in melon plants infected with <i>Monosporascus cannonballus</i>	155–161
S. Pivonia, R. Cohen, S. Cohen, J. Kigel, R. Levita and J. Katan	
Chromosomal and plasmid diversity of agrobacterium strains isolated from <i>Ficus benjamina</i> tumors	163–174
A. Raio, R. Peluso, X. Nesme and A. Zoina	
Detection of citrus leaf blotch virus using digoxigenin labeled cDNA probes and RT-PCR	175–181
L. Galipienso, M.C. Vives, L. Navarro, P. Moreno and J. Guerri	
Methods for sampling and assessment in relation to the spatial pattern of phoma stem canker (<i>Leptosphaeria maculans</i>) in oilseed rape	183–192
J.-N. Aubertot, J.-J. Schott, A. Penaud, H. Brun and T. Doré	
Detection of a phytoplasma associated with grapevine <i>Flavescence dorée</i> in <i>Clematis vitalba</i>	193–201
E. Angelini, F. Squizzato, G. Lucchetta and M. Borgo	
Activation of defense pathways: synergism between reactive oxygen species and salicylic acid and consideration of field applicability	203–212
K.A. Blee, K.-Y. Yang and A.J. Anderson	
Real-time NASBA for detection of Strawberry vein banding virus	213–221
D. Vašková, J. Špak, M.M. Klerks, C.D. Schoen, J.R. Thompson and W. Jelkmann	
<i>Short communication</i>	
Nucleotide sequence and organization of copper resistance genes from <i>Pseudomonas syringae</i> pv. <i>actinidiae</i>	223–226
N. Masami, G. Masao, A. Katsumi and H. Tadaaki	

Contents Volume 110 No. 3 March 2004

Plant phenology influences the effect of mycorrhizal fungi on the development of <i>Verticillium</i>-induced wilt in pepper	227–238
G. Idoia, G. Nieves and A. Jone	
Prehaustorial resistance against alfalfa rust (<i>Uromyces striatus</i>) in <i>Medicago truncatula</i>	239–243
D. Rubiales and A. Moral	

Laboratory evaluation of citrus cultivars susceptibility and influence of fruit size on Fortune mandarin to infection by <i>Alternaria alternata</i> pv. <i>citri</i>	245–251
A. Vincent, J. Badal, M.J. Asensi, N. Sanz, J. Armengol and J. García-Jiménez	
Virulence and molecular diversity within <i>Colletotrichum lindemuthianum</i> isolates from Andean and Mesoamerican bean varieties and regions	253–263
G.S. Mahuku and J.J. Riascos	
Analysis of a secreted aspartic peptidase disruption mutant of <i>Glomerella cingulata</i>	265–274
K.M. Plummer, S.J. Clark, L.M. Ellis, A. Loganathan, T.H. Al-Samarrai, E.H.A. Rikkerink, P.A. Sullivan, M.D. Templeton and P.C. Farley	
Development of a non-radioactive dot-blot hybridization assay for the detection of Pelargonium flower break virus and Pelargonium line pattern virus	275–283
P. Ivars, M. Alonso, M. Borja and C. Hernández	
Characterization and PCR-based typing of <i>Xanthomonas campestris</i> pv. <i>vesicatoria</i> from peppers and tomatoes in Serbia	285–292
A. Obradovic, A. Mavridis, K. Rudolph, J.D. Janse, M. Arsenijevic, J.B. Jones, G.V. Minsavage and J.-F. Wang	
Increased incidence of <i>Erwinia</i> soft-rot on calla lilies in the presence of phosphorous	293–298
J.A. Gracia-Garza, T.J. Blom, W. Brown, D.P. Roberts, K. Schneider, M. Freisen and D. Gombert	
The effect of inoculation treatment and long-term application of moisture on Fusarium head blight symptoms and deoxynivalenol contamination in wheat grains	299–308
M. Lemmens, H. Buerstmayr, R. Krska, R. Schuhmacher, H. Grausgruber and P. Ruckenbauer	
Characterisation of <i>Meloidogyne</i> species from China using isozyme phenotypes and amplified mitochondrial DNA restriction fragment length polymorphism	309–315
J. Xu, P. Liu, Q. Meng and H. Long	
<i>Short communications</i>	
Identification and characterisation of bacteria causing soft-rot in <i>Agave tequilana</i>	317–331
I. Jiménez-Hidalgo, G. Virgen-Calleros, O. Martínez-de la Vega, G. Vandemark and V. Olalde-Portugal	
Requirement of host signaling mechanisms for the action of Ptr ToxA in wheat	333–335
J.B. Rasmussen, C.Y. Kwon and S.W. Meinhardt	

Contents Volume 110 No. 4 April 2004

Identification and discrimination of <i>Pseudomonas syringae</i> isolates from wild cherry in England	337–351
J.G. Vicente, J.P. Alves, K. Russell and S.J. Roberts	
Molecular identification of a new member of the clover proliferation Phytoplasma group (16SrVI) associated with <i>Centaurea solstitialis</i> virescence in Italy	353–360
F. Faggioli, G. Pasquini, V. Lumia, G. Campobasso, T.L. Widmer and P.C. Quimby, Jr.	
<i>Trichoderma</i> biocontrol of <i>Colletotrichum acutatum</i> and <i>Botrytis cinerea</i> and survival in strawberry	361–370
S. Freeman, D. Minz, I. Kolesnik, O. Barbul, A. Zveibil, M. Maymon, Y. Nitzani, B. Kirshner, D. Rav-David, A. Bilu, A. Dag, S. Shafir and Y. Elad	

Volatile metabolite profiling for the discrimination of onion bulbs infected by <i>Erwinia carotovora</i> ssp. <i>carotovora</i>, <i>Fusarium oxysporum</i> and <i>Botrytis allii</i>	371–377
B. Prithiviraj, A. Vikram, A.C. Kushalappa and V. Yaylayan	
Genetic dissection of <i>Plasmopara viticola</i> population from a Greek vineyard in two consecutive years	379–392
A. Rumbou and C. Gessler	
Tracing latent infections of <i>colletotrichum acutatum</i> on strawberry by PCR	393–398
P. Parikka and A. Lemmetty	
Variability of Cuban and international populations of <i>Alternaria solani</i> from different hosts and localities: AFLP genetic analysis	399–409
S.P. Martínez, R. Snowdon and J. Pons-Kühnemann	
Arbuscular mycorrhizal fungi reduce development of pea root-rot caused by <i>Aphanomyces euteiches</i> using oospores as pathogen inoculum	411–419
K. Thygesen, J. Larsen and L. Bødker	
Characterisation of the saponin hydrolysing enzyme avenacoside-α-L-rhamnosidase from the fungal pathogen of cereals, <i>Stagonospora avenae</i>	421–427
H.B. Hughes, J.P. Morrissey and A.E. Osbourn	
Isolation of two strains of a new Tombusvirus (<i>Havel river virus</i>, HaRV) from surface waters in Germany	429–433
R. Koenig, E. Pfeilstetter, H. Kegler and D.E. Lesemann	
<i>Short communications</i>	
<i>Erwinia carotovora</i> infection enhances the expression of two novel abiotic stress-inducible genes in potato	435–439
A. Sós-Hegedüs, D.Žvingila, Z. Bánfalvi and G. Dallmann	
Footsteps from insect larvae damage leaf surfaces and initiate rapid responses	441–447
D.E. Hall, K.B. MacGregor, J. Nijse and A.W. Bown	

Contents Volume 110 No. 5–6 June 2004

Foreword	vii
Phylogeny and molecular diagnosis of mycotoxigenic fungi	449–471
K.A. Seifert and C.A. Lévesque	
FUSARIUM-ID v. 1.0: A DNA sequence database for identifying <i>Fusarium</i>	473–479
D.M. Geiser, M. del Mar Jiménez-Gasco, S. Kang, L. Makalowska, N. Veeraraghavan, T.J. Ward, N. Zhang, G.A. Kulda and K. O'Donnell	
Quantitative detection of <i>Fusarium</i> species in wheat using TaqMan	481–494
C. Waalwijk, R. van der Heide, I. de Vries, T. van der Lee, C. Schoen, G. Costrel-de Corainville, I. Häuser-Hahn, P. Kastelein, J. Köhl, P. Lonnet, T. Demarquet and G.H.J. Kema	
A species-specific PCR assay based on the calmodulin partial gene for identification of <i>Fusarium verticillioides</i>, <i>F. proliferatum</i> and <i>F. subglutinans</i>	495–502
G. Mulè, A. Susca, G. Stea and A. Moretti	
Detection and differentiation of trichothecene and enniatin-producing <i>Fusarium</i> species on small-grain cereals	503–514
P. Nicholson, D.R. Simpson, A.H. Wilson, E. Chandler and M. Thomsett	

Differentiation of <i>Fusarium verticillioides</i> from banana fruits by IGS and EF-1α sequence analyses	515–523
S. Mirete, C. Vázquez, G. Mulè, M. Jurado and M.T. González-Jaén	
Genetic markers for the analysis of variability and for production of specific diagnostic sequences in fumonisin-producing strains of <i>Fusarium verticillioides</i>	525–532
M.T. González-Jaén, S. Mirete, B. Patiño, E. López-Errasquín and C. Vázquez	
Synteny in toxigenic <i>Fusarium</i> species: The fumonisin gene cluster and the mating type region as examples	533–544
C. Waalwijk, T. van der Lee, I. de Vries, T. Hesselink, J. Arts and G.H.J. Kema	
Mitochondrial DNA diversity and lineage determination of European isolates of <i>Fusarium graminearum</i> (<i>Gibberella zeae</i>)	545–550
M. Ládai, Á. Juhász, G. Mulè, A. Moretti, Á. Szécsi and A. Logrieco	
Genetic diversity of <i>Fusarium graminearum</i> in Europe and Asia	551–562
T.Yu. Gagkaeva and T. Yli-Mattila	
Mitochondrial DNA variability in <i>Fusarium proliferatum</i> (<i>Gibberella intermedia</i>)	563–571
M. Ládai, G. Mulè, A. Moretti, Z. Hamari, Á. Juhász, Á. Szécsi and A. Logrieco	
Molecular and morphological diversity of <i>Fusarium</i> species in Finland and northwest Russia	573–585
T. Yli-Mattila, S. Paavanen-Huhtala, P. Parikka, P. Konstantinova and T.Y. Gagkaeva	
Mycotoxin production and molecular variability of European and American isolates of <i>Fusarium culmorum</i>	587–599
B. Tóth, Á. Mesterházy, P. Nicholson, J. Téren and J. Varga	
Toxin profile, fertility and AFLP analysis of <i>Fusarium verticillioides</i> from banana fruits	601–609
A. Moretti, G. Mulè, A. Susca, M.T. González-Jaén and A. Logrieco	
Interfertility of two mating populations in the <i>Gibberella fujikuroi</i> species complex	611–618
J.F. Leslie, K.A. Zeller, M. Wohler and B.A. Summerell	
Identification of growth stage specific transcript profiles in <i>Fusarium proliferatum</i> (<i>Gibberella fujikuroi</i>, mating population D) by cDNA-AFLP analysis	619–625
A. Jeney, E. Béki, G. Mulè and L. Hornok	
Molecular diversity of agriculturally important <i>Aspergillus</i> species	627–640
J. Varga, Á. Juhász, F. Kevei and Z. Kozakiewicz	
PCR assay for identification of <i>Aspergillus carbonarius</i> and <i>Aspergillus japonicus</i>	641–649
G. Perrone, A. Susca, G. Stea and G. Mulè	
Production of ochratoxin A by <i>Aspergillus ochraceus</i>	651–659
E. Mühlencoert, I. Mayer, M.W. Zapf, R.F. Vogel and L. Niessen	
Analysis of differentially-expressed ochratoxin A biosynthesis genes of <i>Penicillium nordicum</i>	661–669
P. Färber and R. Geisen	

Contents Volume 110 No. 7 August 2004

A tribute and an introduction	III
M. Cooke	
<i>Pseudomonas fluorescens</i> UP61 isolated from birdsfoot trefoil rhizosphere produces multiple antibiotics and exerts a broad spectrum of biocontrol activity	671–681
L. De La Fuente, L. Thomashow, D. Weller, N. Bajsa, L. Quagliotto, L. Chernin and A. Arias	

<i>Armillaria</i> species infesting vineyards in northwestern Spain	683–687
O. Aguin-Casal, M.J. Sáinz-Osés and J.P. Mansilla-Vázquez	
A combination of baiting and different PCR formats, including measurements of real-time quantitative fluorescence, for the detection of <i>Phytophthora fragariae</i> in strawberry plants	689–702
P.J.M. Bonants, M.P.E. van Gent-Pelzer, R. Hooftman, D.E.L. Cooke, D.C. Guy and J.M. Duncan	
Accumulation of pathogenesis-related proteins in the apoplast of a susceptible cultivar of apple (<i>Malus domestica</i> cv. Elstar) after infection by <i>Venturia inaequalis</i> and constitutive expression of PR genes in the resistant cultivar Remo	703–711
A.E. Gau, M. Koutb, M. Piotrowski and K. Klopstech	
Endophytic-host selectivity of <i>Discula umbrinella</i> on <i>Quercus alba</i> and <i>Quercus rubra</i> characterized by infection, pathogenicity and mycelial compatibility	713–721
S.D. Cohen	
A <i>Botrytis cinerea</i> putative 3-keto reductase gene (<i>ERG27</i>) that is homologous to the mammalian 17β-hydroxysteroid dehydrogenase type 7 gene (17β-HSD7)	723–733
C. Albertini and P. Leroux	
Effect of trichothecenes produced by <i>Fusarium graminearum</i> during Fusarium head blight development in six cereal species	735–746
F. Langevin, F. Eudes and A. Comeau	
Detection of <i>Citrus psorosis virus</i> by ELISA, molecular hybridization, RT-PCR and immunosorbent electron microscopy and its association with citrus psorosis disease	747–757
S. Martín, D. Alioto, R.G. Milne, S.M. Garnsey, M. L. García, O. Grau, J. Guerri and P. Moreno	
<i>Short communications</i>	
Daamen's incidence-severity relationship revisited	759–761
G. Hughes, N. McRoberts and L.V. Madden	
Both mating types of <i>Phaeosphaeria</i> (anamorph <i>Staganospora</i>) <i>nodorum</i> are present in Western Australia	763–766
P.S. Solomon, K. Parker, R. Loughman and R.P. Oliver	

Contents Volume 110 No. 8 October 2004

Cloning of β-tubulin and succinate dehydrogenase genes from <i>Uromyces fabae</i> and establishing selection conditions for their use in transformation	767–777
S.G.R. Wirsal, R.T. Voegelé, R. Bänninger and K.W. Mendgen	
Validation of the specificity and sensitivity of species-specific primers that provide a reliable molecular diagnostic for <i>Xiphinema diversicaudatum</i>, <i>X. index</i> and <i>X. vuittenezi</i>	779–788
J. Hübschen, L. Kling, U. Ipach, V. Zinkernagel, N. Bosselut, D. Esmenjaud, D.J.F. Brown and R. Neilson	
Segregation for aggressiveness and deoxynivalenol production of a population of <i>Gibberella zeae</i> causing head blight of wheat	789–799
C.J.R. Cumagun and T. Miedaner	
Molecular characterization and PCR detection of the melon pathogen <i>Acremonium cucurbitacearum</i>	801–809
P.V. Martínez-Culebras, P. Abad-Campos and J. García-Jiménez	

Development and use of detection methods specific for <i>Cucumber vein yellowing virus</i> (CVYV)	811–821
B. Martínez-García, C.F. Marco, E. Goytia, D. López-Abella, M.T. Serra, M.A. Aranda and J.J. López-Moya	
Natural infections of tomato by <i>Citrus exocortis viroid</i>, <i>Columnnea latent viroid</i>, <i>Potato spindle tuber viroid</i> and <i>Tomato chlorotic dwarf viroid</i>	823–831
J.Th.J. Verhoeven, C.C.C. Jansen, T.M. Willemen, L.F.F. Kox, R.A. Owens and J.W. Roenhorst	
Real-time detection of <i>Phytophthora nicotianae</i> and <i>P. citrophthora</i> in citrus roots and soil	833–843
A. Ippolito, L. Schena, F. Nigro, V.S. Ligorio and T. Yaseen	
Genetic relationships among strains of <i>Xanthomonas campestris</i> pv. <i>campestris</i> revealed by novel rep-PCR primers	845–853
S.V. Tsygankova, A.N. Ignatov, E.S. Boulygina, B.B. Kuznetsov and E.V. Korotkov	
<i>Short communications</i>	
A PCR test to detect the cereal root-knot nematode <i>Meloidogyne naasi</i>	855–860
C. Zijlstra, R. van Hoof and D. Donkers-Venne	
Carbon fixation and partitioning in coffee seedlings infested with <i>Pratylenchus coffeae</i>	861–865
P. Mazzafera, R.K. Kubo and M.M. Inomoto	
Instructions to Authors	867–870

Contents Volume 110 No. 9 November 2004

The ability of <i>Papaya ringspot virus</i> strains overcoming the transgenic resistance of papaya conferred by the coat protein gene is not correlated with higher degrees of sequence divergence from the transgene	871–882
S. Tripathi, H.-J. Bau, L.-F. Chen and S.-D. Yeh	
Development and validation of species-specific primers that provide a molecular diagnostic for virus-vector longidorid nematodes and related species in German viticulture	883–891
J. Hübschen, L. Kling, U. Ipach, V. Zinkernagel, D.J.F. Brown and R. Neilson	
Real-time quantitative PCR: a new technology to detect and study phytopathogenic and antagonistic fungi	893–908
L. Schena, F. Nigro, A. Ippolito and D. Gallitelli	
Genetic structure of Iranian <i>Pyricularia grisea</i> populations based on rep-PCR fingerprinting	909–919
M. Javan-Nikkhah, B.A. McDonald, S. Banke and G.-A. Hedjaroude	
Factors affecting the development of disease symptoms in potatoes infected by <i>Tobacco rattle virus</i>	921–928
D.J. Robinson, M.F.B. Dale and D. Todd	
Can phyllosphere yeasts explain the effect of scab fungicides on russetting of Elstar apples?	929–937
P.R. Gildemacher, B. Heijne, J. Houbaken, T. Vromans, E.S. Hoekstra and T. Boekhout	
Persistence of <i>Xanthomonas axonopodis</i> pv. <i>vignicola</i> in weeds and crop debris and identification of <i>Sphenostylis stenocarpa</i> as a potential new host	939–947
R. Sikirou and K. Wydra	
Comparison of the sequences of the D3 expansion of the 26S ribosomal genes reveals different degrees of heterogeneity in different populations and species of <i>Pratylenchus</i> from the Mediterranean region	949–957
F. De Luca, E. Fanelli, M. Di Vito, A. Reyes and C. De Giorgi	

- Relationship between the incidences of ear and spikelet infection of *Fusarium* ear blight in wheat** 959–971
 X.-M. Xu, D.W. Parry, S.G. Edwards, B.M. Cooke, F.M. Doohan, A. van Maanen,
 J.M. Brennan, S. Monaghan, A. Moretti, G. Tocco, G. Mulè, L. Hornok, G. Giczey,
 J. Tatnell, P. Nicholson and A. Ritieni

Contents Volume 110 No. 10 December 2004

- Direct detection of *Taphrina deformans* on peach trees using molecular methods** 973–982
 S. Tavares, J. Inácio, Á. Fonseca and C. Oliveira
- Natural occurrence and distribution of stem cankers caused by *Phytophthora megakarya* and *Phytophthora palmivora* on cocoa** 983–990
 A.A. Appiah, I.Y. Opoku and A.Y. Akrofi
- A diagnostic medium for the semi-selective isolation and enumeration of *Xanthomonas axonopodis* pv. *vignicola*** 991–1001
 K. Wydra, G. Khatri-Chhetri, A. Mavridis, R. Sikirou and K. Rudolph
- Cladosporium tenuissimum* Cooke (Deuteromycotina: Hyphomycetes) as a causal organism of new disease on cucumber fruits** 1003–1007
 Y.A. Batta
- A survey of tobacco viruses in tobacco crops and native flora in Greece** 1011–1023
 E.K. Chatzivassiliou, K. Efthimiou, E. Drossos, A. Papadopoulou, G. Poimenidis and N.I. Katis
- Influence of soil type and pH on the colonisation of sugar beet seedlings by antagonistic *Pseudomonas* and *Bacillus* strains, and on their control of *Pythium* damping-off** 1025–1046
 C.S. Schmidt, F. Agostini, A.-M. Simon, J. Whyte, J. Townsend, C. Leifert, K. Killham and C. Mullins
- Short communication*
- Citrus viroid II variants associated with ‘Gummy Bark’ disease** 1047–1052
 N. Önelge, A. Cinar, J.A. Szychowski, G. Vidalakis and J.S. Semancik
- Volume Contents** 1053–1060
- Author Index** 1061–1063
