

CORRIGENDUM

A. Etxeberria, J. M. Elorza, J. J. Iruin, C. Marco, M. A. Gómez and J. G. Fatou.
Miscibility of poly(vinyl chloride)/poly(ethylene oxide) blends—II. An inverse gas
chromatography study. *Eur. Polym. J.* **29**, 1483 (1993).

The B_{23} value of the 80/20 PEO/PVC composition in Table 5 on p. 1486 is incorrect (the sign has been changed). The correct value is 2.429 (± 0.038).

On p. 1487 (first paragraph, fourth line) PVC must be substituted by PEO.
