The European Journal of Plant Pathology is an international journal that publishes original research articles dealing with fundamental and applied aspects of plant pathology. Thus, in addition to bacteriological, mycological, and virological topics, nematological and plant protection studies in general are also included. All contributions should be submitted in English and are subject to peer reviewing. Papers will be published within five months after acceptance, there are no page charges for publication, and fifty offprints will be supplied free of charge.
