

G.S.Drummond, E.E.Smith, W.J.Whelan and Han Tai, Mechanism of action of pullulanase, 5 (1969) 85–88

p. 86, second line of 3. Experimental should read:  
in a digest (125 ml) containing 80 mM-

A.Sarasin, Particules ribonucléoprotéiques 40 S des noyaux de foie de rat. Propriétés des protéines de ces particules, 4 (1969) 327–330

The last two lines of the summary should read:

Composition shows an acidic residue/basic residue ratio of 1.39 and an as yet unidentified ninhydrin-positive compound which is probably specific to these 40 S particles.
