

ERRATUM

Heinrich Kauss and Christine Glaser, Carbohydrate-binding proteins from plant cell walls and their possible involvement in extension growth (1974) FEBS Letters 45, 304–307

The following correction may be observed in the above article. Page 307, column 2, line 8 *should read*:

capacity of the cell wall lectins (table 3) due to increasing H^+ -concentrations implies that the wall would become mechanically more flexible under the influence of auxin and an increase in extension growth could result.
