

FOREWORD

The 1974 reviews in this third volume of the Index of Biochemical Reviews are arranged, as in previous years, under subject headings, which are listed for reference on the following three pages. Where appropriate multiple entries are used. This year, a number of books have been included for the first time and it is hoped that this addition will increase the usefulness of the Index.

Again, we should like to mention that criticisms and suggestions for improvements are always welcome and should be sent to Professor H. R. V. Arnstein, Department of Biochemistry, University of London King's College, Strand, London WC2R 2LS, England.

We are, as usual, greatly indebted to Miss Anna Straker for the excellence of the typescript which she has prepared for photo-reproduction with skill, patience and enthusiasm. We should also like to express our thanks to Professor S.P. Datta for his constant interest and helpful advice.

London, June 1975
