

## ERRATUM

Walter, H. and E. J. Krob, Hydrophobic affinity partition in aqueous two-phase systems containing poly (ethylene glycol)-palmitate of rightside-out and inside-out vesicles from human erythrocyte membranes (1976) FEBS Letters 61, 290–293.

The following corrections may be observed in the above article:

H. Walter is at *both* the Laboratory of Chemical Biology, Veterans Administration Hospital, Long Beach *and* the Department of Physiology, College of Medicine, University of California, Irvine, California 92717, USA; while E. J. Krob is at the Laboratory of Chemical Biology, Veterans Administration Hospital, Long Beach, California 90801, USA *only*.

page 290, column 2, line 5:

*for meyloma, read myeloma*

line 4 from the bottom:

*for 'Darbowax', read 'Carbowax'*

page 291, line 3 of caption for Fig.1 *should read:*

of marker enzymes. 40 transfers were completed at 5° C in a phase system containing 5% (w/w) D, 4% (w/w) PEG, 0.05 M NaCl

*instead of:*

of marker enzymes. 40 transfers were completed at 5° C in a phase system containing 5% (w/w) PEG, 0.05 M NaCl,

page 292, column 2, line 2:

*for palmytoyl, read palmitoyl*
