The authors would like to make the following corrections to their article:

page 92, Fig.3, the abscissa *should read*:

Fe/450 000

*instead of*:

Fe 45 000

column 2, lines 4 through 6 from the bottom *should read*:

obtained under anaerobic conditions to the binding of  
 $\text{Fe}^{2+}$  to apoferritin a few controls

*instead of*:

obtained under anaerobic conditions to the binding of  
fluorescence obtained under anaerobic conditions to  
the binding of  $\text{Fe}^{2+}$  to apoferritin a few controls

page 93, column 1, line 10 *should read*:

the amount of oxygen added.

*instead of*:

the amount of iron added.
