

CONTENTS TO VOLUME 118

Hypothesis

- An explanation for the relationship between salt-induced thylakoid stacking and the chlorophyll fluorescence changes associated with changes in spillover of energy from photosystem II to photosystem I, *J. Barber* 1

Research Letters

- A flash spectroscopic study of the kinetics of the electrochromic shift, proton release and the redox behaviour of cytochromes *f* and *b-563* during cyclic electron flow, *L. F. Olsen, A. Telfer, J. Barber* 11
- Insulin controls the cyclic AMP-dependent phosphorylation of integral and peripheral proteins associated with the rat liver plasma membrane, *R. J. Marchmont, M. D. Houslay* 18
- The influence of glycosidases and lectins on insulin binding to Zajdela hepatoma cells, *J. Capeau, J. Picard* 25
- Recovery of active, highly purified phosphoenolpyruvate carboxylase from specific immunoabsorbent column, *J. Vidal, G. Godbillon, P. Gadal* 31
- Modification of acetylcholine receptor: Chemical and immunological characterization of polyalanyl acetylcholine receptor, *R. Tarrab-Hazdai, Y. Schmidt-Sole, D. Mochly-Rosen, S. Fuchs* 35
- The enzyme-catalysed conversion of a non-'Bay-region' diol-epoxide of benz-[a]anthracene into a glutathione conjugate, *C. S. Cooper, A. Hewer, O. Ribeiro, P. L. Grover, P. Sims* 39
- Fluorographic detection of nucleic acids labelled with weak β -emitters in gels containing high acrylamide concentrations, *S. Joshi, A.-L. Haenni* 43
- A new site-specific endonuclease from *Neisseria cinerea*, *R. Watson, M. Zuker, S. M. Martin, L. P. Visentin* 47
- A new nitrogen base 5-hydroxycytosine in phage N-17 DNA, *I. S. Kchromov, V. V. Sorotchkina, T. G. Nigmatullin, T. I. Tikchonenko* 51
- Distinguishing characteristics between glutamate and kainic acid binding sites in brain synaptic membranes, *E. K. Michaelis, M. L. Michaelis, R. D. Grubbs* 55
- DNA-associated proteins of ram sperm nuclei, *Z. Avramova, G. Dessev, R. Tsanev* 58
- Clusters of nonhistone chromosomal protein HMG1 molecules in intact chromatin, *A. V. Itkes, B. O. Glotov, L. G. Nikolaev, E. S. Severin* 63
- Two leaky termination codons in AMV RNA 1, *R. G. L. van Tol, R. van Gemeren, L. van Vloten-Doting* 67
- ATP hydrolysis and membrane potential in spinach chloroplasts, *J. M. Galmiche, G. Girault* 72
- Nitroguanidyl-lutropin, a derivative which inhibits the stimulation of ovarian adenylate cyclase by lutropin, *C. Tertrin-Clary, M. Roy, P. de la Llosa* 77
- WHHL-rabbit: A low density lipoprotein receptor-deficient animal model for familial hypercholesterolemia, *K. Tanzawa, Y. Shimada, M. Kuroda, Y. Tsujita, M. Arai, Y. Watanabe* 81
- Corticosterone increases the synthesis of a soluble protein in pituitary glands from adrenalectomized male rats which precipitates with anti-rat growth antiserum, *M. C. Beinfeld, P. M. Packman* 85
- Effects of acute ethanol administration on the steroid-mediated induction of hepatic tryptophan oxygenase, *C. Ribiere, H. Rouach, J. Nordmann, R. Nordmann* 89
- Vitamin K-dependent carboxylase: Effect of Mn^{2+} and other divalent cations, *A. E. Larson, J. W. Suttie* 95

The formation of the primary compound from hydrogen peroxide and <i>Pseudomonas</i> cytochrome <i>c</i> peroxidase, <i>T. Araiso, M. Rönnberg, H. B. Dunford, N. Ellfolk</i>	99
Analysis of ribosomal protein conformation in <i>Bacillus subtilis</i> by reductive methylation. Identification of proteins with different conformation in monosomes and polysomes, <i>S. Guha, J. Szulmajster</i>	103
Biochemical evidence for intertypic genetic recombination of polioviruses, <i>L. I. Romanova, E. A. Tolskaya, M. S. Kolesnikova, V. I. Agol</i>	109
Photoincorporation of tetracycline into <i>Escherichia coli</i> ribosomes: Identification of labeled proteins and functional consequences, <i>R. A. Goldman, B. S. Cooperman, W. A. Strycharz, B. A. Williams, T. R. Tritton</i>	113
Proton translocation in the slow rise of the flash-induced 515 nm absorbance change of intact chloroplasts, <i>J. Farineau, G. Garab, G. Horváth, Á. Faludi-Dániel</i>	119
Effect of photoreduction of the photosystem-II intermediary electron acceptor (pheophytin) on triplet state of carotenoids, <i>V. V. Klimov, B. Ke, E. Dolan</i>	123
Does caeruloplasmin dismutate superoxide? No, <i>J. V. Bannister, W. H. Bannister, H. A. O. Hill, J. F. Mahood, R. L. Willson, B. S. Wolfenden</i>	127
Orotate phosphoribosyltransferase and orotidine-5'-phosphate decarboxylase in two parasitic kinetoplastid flagellates, <i>A. M. Gero, G. H. Coombs</i>	130
Abnormal total NADP ⁺ and glutathione and impaired glucose metabolism of large rat adipocytes, <i>J. M. May</i>	133
The effects of terbium and lanthanum on the biological activity of some representative muscle protein systems, <i>K. Oikawa, W. D. McCubbin, C. M. Kay</i>	137
Use of immobilized enzymatically active monomers of glyceraldehyde-3-phosphate dehydrogenase to investigate subunit cooperativity in the oligomeric enzyme, <i>R. A. Asryants, L. I. Ashmarina, V. I. Muronetz, N. K. Nagradova</i>	141
Preparation of immobilized animal cells, <i>K. Nilsson, K. Mosbach</i>	145
Book Reviews and Booklist No. 25	151

Hypothesis

A new mechanism for the hydrolytic editing function of aminoacyl-tRNA synthetases. Kinetic specificity for the tRNA substrate, <i>H. T. Wright</i>	165
--	-----

Research Letters

The role of the cytidine residues of the tRNA 3'-terminus at the peptidyltransferase A and P sites, <i>K. Quiggle, S. Chládek</i>	172
Peptidyl transferase center of <i>Escherichia coli</i> ribosomes: Interrelations between the substrates, <i>M. K. Kukhanova, L. S. Victorova, S. B. Bourd, B. P. Gottikh, A. A. Krayevsky, M. Spinzl</i>	176
Stabilization of partially-purified glucose 6-phosphatase by fluoride: Is enzyme inactivation caused by dephosphorylation?, <i>A. Burchell, B. Burchell</i>	180
Observation by ¹³ C NMR of metabolites in differentiating amoeba: Trehalose storage in encysted <i>Acanthamoeba castellanii</i> , <i>R. Deslauriers, H. C. Jarrell, R. A. Byrd, I. C. P. Smith</i>	185
Two-dimensional gel analysis after removal of major proteins reveals stage-dependent proteins in early insect development, <i>H. Jäckle</i>	191
Isolation of a glial maturation factor from beef brain, <i>B. Pettmann, M. Sensenbrenner, G. Labourdette</i>	195
Endogenous lectins of human muscle, <i>G. I. Franklin, F. S. Walsh, E. J. Thompson</i>	200
The ATPase activities of rat cardiac myosin isoenzymes, <i>B. Pope, J. F. Y. Hoh, A. Weeds</i>	205
Glycolipid pattern of stomach tissue of a human with the rare blood group A _p , <i>M. E. Breimer, B. Cedergren, K.-A. Karlsson, K. Nilson, B. E. Samuelsson</i>	204
The replacement of serum by SiO ₂ (Aerosil) and 2-mercaptoethanol or diethanol-disulfide in the immunization and stimulation of spleen cell cultures, <i>M. Burger</i>	212

Concanavalin A receptor-mediated phagocytosis and subsequent fusion of vesicles with lysosomes in guinea pig polymorphonuclear leukocytes, <i>F. Amano, D. Mizuno</i>	215
Two simple binding assays for monoclonal antibodies against internal antigenic determinants, <i>R. D. G. McKay</i>	219
5'-Nucleotidase activity of two populations of mouse thymocytes separated by peanut agglutinin agglutination, <i>J. Dornand, J.-C. Bonnafous, J.-C. Mani</i>	225
Charge isomers of Simian virus 40 T-antigen, <i>K. Palme, R. Henning</i>	229
Induction of chromosomal alignment by high frequency electric fields, <i>M. J. Andrews, J. A. McClure, G. I. Malinin</i>	233
Biochemical evidence for a low molecular weight protein (profilin-like protein) in hog thyroid gland and its involvement in actin polymerisation, <i>A. Fattoum, C. Roustan, J. Feinberg, L.-A. Pradel</i>	237
Chemical characteristics of endorphins in human cerebrospinal fluid, <i>A. Wahlström, L. Terenius</i>	241
D-Tyr-Ser-Gly-Phe-Leu-Thr, a highly preferential ligand for δ -opiate receptors, <i>G. Gacel, M.-C. Fournie-Zaluski, B. P. Roques</i>	245
Adrenergic modulation of gastric somatostatin release in rats, <i>H. Koop, I. Behrens, C. H. S. McIntosh, R. A. Pederson, R. Arnold, W. Creutzfeldt</i>	248
Bile acid UDP-glucuronyltransferase from human liver - properties and studies on aglycone substrate specificity, <i>H. Matern, S. Matern, Ch. Schelzig, W. Gerok</i>	251
Nuclear glycogen synthase - An artifact of preparation, <i>Y. Oron, R. Cardell, J. Lerner</i>	255
Enzymes of pyrimidine biosynthesis in <i>Trypanosoma cruzi</i> , <i>D. J. Hammond, W. E. Gutteridge</i>	259
Extracellular ATP, ecto-ATPase and calcium influx in <i>Dictyostelium discoideum</i> cells, <i>R. W. Parish, M. Weibel</i>	263
Photoaffinity labelling of the photosystem II herbicide binding protein, <i>W. Oettmeier, K. Masson, U. Johanningmeier</i>	267
A stable free radical intermediate in the reaction of 2-oxoacid:ferredoxin oxidoreductases of <i>Halobacterium halobium</i> , <i>R. Cammack, L. Kerscher, D. Oesterhelt</i>	271
A cytotoxic epidermal growth factor cross-linked to diphtheria toxin A-fragment, <i>N. Shimizu, W. K. Miskimins, Y. Shimizu</i>	274
Nanosecond fluorescence and absorbance changes in photosystem II at low redox potential. Pheophytin as an intermediary electron acceptor, <i>V. A. Shuvalov, V. V. Klimov, E. Dolan, W. W. Parson, B. Ke</i>	279
A three-disulphide intermediate in refolding of reduced ribonuclease A with a folded conformation <i>T. E. Creighton</i>	283
Effects of drug-induced paralysis and depolarisation on acetylcholine receptor and cyclic nucleotide levels of chick muscle cultures, <i>H. Betz</i>	289
Bifunctional enkephalin analogues for affinity separation purposes, <i>A. Koman, L. Terenius</i>	293
Structure of γ -crystallin IIIb from calf lens at 5 Å resolution, <i>Yu. N. Chirgadze, V. D. Oreshin, Yu. V. Sergeev, S. V. Nikonov, V.-Yu. Lunin</i>	296
3'-Hydroxysepiapterin in patients with dihydrobiopterin deficiency, <i>A. Niederwieser, A. Matasović, H.-Ch. Curtius, W. Endres, J. Schaub</i>	299
Distance determinations at the active site of kidney ($\text{Na}^+ + \text{K}^+$)-ATPase by Mn (II) ion electron paramagnetic resonance, <i>S. E. O'Connor, C. M. Grisham</i>	303
Analysis of membrane bilayer asymmetry using parinaric acid fluorescent probes, <i>L. A. Sklar, E. A. Dratz</i>	308
A new type of AT-specific ligand constructed of two netropsin-like molecules, <i>A. A. Khorlin, A. S. Krylov, S. L. Grokhovsky, A. L. Zhuze, A. S. Zasedatelev, G. V. Gursky and B. P. Gottikh</i>	311
Biosynthesis of keto-carotenoids in <i>Capsicum annuum</i> fruits, <i>B. Camara</i>	315
A new approach for using labels in small-angle scattering experiments, <i>G. Büldt</i>	319

In vitro phosphorylation of histones H5, H2A, H2B and of the dimer H2A-H2B by a cyclic AMP-dependent protein kinase from rat pancreas, <i>A. Martinage,</i> <i>P. Mangeat, B. Laine, M. Couppez, P. Sautiere, G. Marchis-Mouren,</i> <i>G. Biserte</i>	323
Secretion of intermediate molecular forms of invertase by <i>Saccharomyces</i> <i>carlsbergensis</i> G-517 treated with 2-deoxy-D-glucose, <i>F. Parra, P. Herrero,</i> <i>F. Moreno, S. Gascon</i>	330
