

FEBS LETTERS

An international journal established for the most rapid possible publication of essentially final short papers in the field of Biochemistry, Biophysics and Molecular Biology

Published by Elsevier Science Publishers on behalf of the

FEDERATION OF EUROPEAN BIOCHEMICAL SOCIETIES

A Federation of Biochemical Societies in Austria, Belgium, Bulgaria, Czechoslovakia, Denmark, Finland, France, German Democratic Republic, German Federal Republic, Great Britain, Greece, Hungary, Iceland, Ireland, Israel, Italy, The Netherlands, Norway, Poland, Portugal, Rumania, Spain, Sweden, Switzerland, Turkey, USSR, Yugoslavia.

Editorial policy:

Papers should be short, complete and essentially final reports. Papers not sufficiently sustained by experimental detail will not be published. The over-riding criterion is that a paper must be of sufficient immediate importance to the work of other investigators to justify urgent publication. *FEBS Letters* is not a repository for material which, though sound, does not meet this criterion.

Subject coverage:

Protein Chemistry, Enzymology, Biophysical Chemistry, Nucleic Acids, Protein Synthesis, Biochemical Genetics, Morphogenesis, Cellular Biochemistry, Metabolism, Immunochemistry, Natural Products.

Contributions may be sent to any of the Editors or directly to the Managing Editor, Professor S.P. Datta, who will arrange for their consideration. Papers may be submitted in English, French or German, with an abstract in English.

Editors:

H.R.V. ARNSTEIN, Department of Biochemistry, King's College, Strand, London, WC2R 2LS, England
