

## Contents to volume 156

## Hypothesis

- Proton currents and protein motion in membranes (FEBS 0402) *D.A. Marvin* 1

## Research Letters

- The hexose uptake system of *Chlorella*: Is it a proton symport or a hydroxyl ion antiport system? (FEBS 0407) *E. Komor, C. Schobert, B.-H. Cho* 6
- In vivo glucose activation of the yeast plasma membrane ATPase (FEBS 0406) *R. Serrano* 11
- Inhibition of the mitochondrial *bc<sub>1</sub>* complex by dibromothymoquinone (FEBS 0408) *M. Degli Esposti, M. Rugolo, G. Lenaz* 15
- Hemoglobin Okayama ( $\beta 2$  (NA 2) His  $\rightarrow$  Gln): A new 'silent' hemoglobin variant with substituted amino acid residue at the 2,3-diphosphoglycerate binding site (FEBS 0404) *T. Harano, K. Harano, S. Shibata, S. Ueda, H. Mori, N. Arimasa* 20
- Fluorescence associated with the Type 3 copper center of laccase (FEBS 0409) *R.M. Wynn, H.K. Sarkar, R.A. Holwerda, D.B. Knaff* 23
- Melittin-induced fusion of acidic liposomes (FEBS 0410) *G.D. Eytan, T. Almary* 29
- Stereochemistry of an  $\alpha, \beta$ -elimination reaction by D-glucosamine dehydratase (FEBS 0403) *R. Iwamoto, Y. Imanaga, S. Sawada, K. Soda* 33
- Complete amino acid sequence of the nucleic acid-binding protein of bovine leukemia virus (FEBS 0411) *T.D. Copeland, M.A. Morgan, S. Oroszlan* 37
- Identification of the 3'- and 5'-ends of beet necrotic yellow vein virus RNAs (FEBS 0405) *C. Putz, M. Pinck, C. Fritsch, L. Pinck* 41
- Differential proteolysis and evidence for a residue exchange in tissue plasminogen activator suggest possible association between two types of protein microheterogeneity (FEBS 0398) *H. Jörrvall, G. Pohl, N. Bergsdorf, P. Wallén* 47
- Number of tRNA genes in wheat chloroplast DNA. Two different genes for valine tRNAs (FEBS 0413) *A. Goździcka-Józefiak, J. Augustyniak* 51
- Differential effect of sulphur deficiency on the composition of the aminoacyl-tRNA and free amino acid pools of the developing pea seed (FEBS 0412) *P.K. Macnicol* 55
- Liquid crystalline microphases of DNA molecules complexed with compounds of platinum(II) (FEBS 0430) *N. Akimenko, V. Kleinwächter, Yu. Yevdokimov* 58
- Human liver RNA programmed in vitro synthesis of a polypeptide related to human apolipoprotein B (FEBS 0415) *S.-O. Olofsson, P. Elias, K. Boström, K. Lundholm, P.-I. Norfeldt, O. Wiklund, G. Fager, G. Bondjers* 63
- Isolation and characterization of the mouse corticotropin- $\beta$  lipotropin precursor gene and a related pseudogene (FEBS 0428) *M. Notake, T. Tobimatsu, Y. Watanabe, H. Takahashi, M. Mishina, S. Numa* 67
- Deoxycytidylate shortage is a cause of G1 arrest of ascites tumor cells under oxygen deficiency (FEBS 0422) *M. Löffler, G. Schimpff-Weiland, H. Follmann* 72
- In vitro and in vivo iodination of human thyroglobulin in relation to hormone release (FEBS 0423) *P.-J. Lejeune, C. Marriq, M. Rolland, S. Lissitzky* 77
- Actinomycin D binding in vivo: active chromatin preferred, (FEBS 0417) *F.-L. Yu* 83
- Islet-activating protein prevents nicotinic acid-induced GTPase stimulation and GTP but not GTP $\gamma$ S-induced adenylate cyclase inhibition in rat adipocytes (FEBS 0418) *K. Aktories, G. Schultz, K.H. Jakobs* 88
- Evaluation of H<sub>2</sub>O activity in the free or phosphorylated catalytic site of Ca<sup>2+</sup>-ATPase (FEBS 0419) *Y. Dupont, R. Pougeois* 93
- Titration of the binding sites for the oligomycin-sensitivity conferring protein in beef heart submitochondrial particles (FEBS 0425) *A. Dupuis, M. Satre, P.V. Vignais* 99
- Short-term disappearance of muscarinic cell surface receptors in carbachol-induced desensitization (FEBS 0416) *J.-M. Maloteaux, A. Gossuin, P.J. Pauwels, P.M. Laduron* 103

|                                                                                                                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Adaptation of the cyanobacterium <i>Anabaena cylindrica</i> to high oxygen tensions (FEBS 0421) <i>E.J. Mackey, G.D. Smith</i>                                                                                                  | 108 |
| The motile and tactic behaviour of <i>Pseudomonas aeruginosa</i> in anarobic environments (FEBS 0426) <i>J.P. Armitage, M.C.W. Evans</i>                                                                                        | 113 |
| Effect of starvation on the <i>N</i> -acetylglutamate system of rat liver (FEBS 0420) <i>M. Gomez A. Jordá, J. Cabo, S. Grisolia</i>                                                                                            | 119 |
| Specific binding of bovine immunoglobulins to Sepharose and Sephadex (FEBS 0427) <i>H. Shimada, Y. Saito, T. Imada, Y. Inada</i>                                                                                                | 123 |
| Preparation and preliminary X-ray studies of three acidic pH crystal forms of the anti-T lectin from peanut ( <i>Arachis hypogaea</i> ) (FEBS 0429) <i>D.M. Salunke, M. Islam Khan, A. Surolia, M. Vijayan</i>                  | 127 |
| Platelet-derived growth factor stimulates the phosphorylation of ribosomal protein S6 (FEBS 0435) <i>J. Nishimura, T.F. Deuel</i>                                                                                               | 130 |
| Macrophages contain at least two myosins (FEBS 0431) <i>J.A. Trotter, S.P. Scordilis, S.S. Margossian</i>                                                                                                                       | 135 |
| Analysis of erythrocyte membrane proteins from dystrophic hamsters (FEBS 0433) <i>S.W. Pimplikar, S.K. Malhotra</i>                                                                                                             | 141 |
| Subcellular distribution of abnormal proteins in rabbit reticulocytes: Effects of cellular maturation, phenylhydrazine and inhibitors of ATP synthesis (FEBS 0434) <i>R.S. Daniels, M.J. McKay, E.M. Atkinson, A.R. Hipkiss</i> | 145 |
| The identification of neurotrophic factor as a transferrin, <i>R.L. Beach, H. Popiela, B.W. Festoff</i>                                                                                                                         | 151 |
| Isolated interferon $\alpha$ -receptor complexes stabilized in vitro (FEBS 0437) <i>P. Eid, K.E. Mogensen</i>                                                                                                                   | 157 |
| Dissociation of human neutrophil membrane depolarization, respiratory burst stimulation and phospholipid metabolism by quinacrine (FEBS 0422) <i>A.I. Tauber, E.R. Simons</i>                                                   | 161 |
| Will the seven-helix bundle be a common structure for integral membrane proteins? (FEBS 0441) <i>J.K.M. Rao, P.A. Hargrave, P. Argos</i>                                                                                        | 165 |
| Lateral heterogeneity of polar lipids in the thylakoid membranes of spinach chloroplasts (FEBS 0440) <i>K. Gounaris, C. Sundby, B. Andersson, J. Barber</i>                                                                     | 170 |
| Band-3 protein-mediated anion conductance of the red cell membrane: Slippage vs ionic diffusion (FEBS 0432) <i>J.H. Kaplan, M. Pring, H. Passow</i>                                                                             | 175 |
| Isolation of intact detergent-free phycobilisomes by trypsin (FEBS 0438) <i>R.G. Hiller, A. Post, A.C. Stewart</i>                                                                                                              | 180 |
| Isolation of oxygen evolving phycobilisome-photosystem II particles from <i>Porphyridium cruentum</i> (FEBS 0439) <i>J.D. Clement-Metral, E. Gantt</i>                                                                          | 185 |

### Review Letter

|                                                                                                                  |     |

| The stereochemical configuration of the natural 23,25,26-trihydroxyvitamin D <sub>3</sub> (FEBS 0472) <i>S. Ishizuka, A.W. Norman</i>                                                                                                                            | 321 |
| Provoked changes in cellular calcium controlled protein phosphorylation and activity of quinate:NAD <sup>+</sup> oxidoreductase in carrot cells (FEBS 0473) <i>A. Graziana, R. Ranjeva, A.M. Boudet</i>                                                          | 325 |
| Redistribution of membrane 5'-nucleotidase in rabbit peritoneal polymorphonuclear leucocytes during phagocytosis (FEBS 0474) <i>D.I.H. Stewart, N. Crawford</i>                                                                                                  | 329 |
| Thyroidal and neural control of myosin transitions during development of rat fast and slow muscles (FEBS 0475) <i>B. Gambke, G.E. Lyons, J. Haselgrove, A.M. Kelly, N.A. Rubinstein</i>                                                                          | 335 |
| The effect of re-oxidation on the reduced hydrogenase of <i>Desulfovibrio vulgaris</i> strain Hildenborough and its oxygen stability (FEBS 0476) <i>C. van Dijk, A. van Berkel-Arts, C. Veeger</i>                                                               | 340 |
| Autotrophic acetyl coenzyme A synthesis in vitro from two CO <sub>2</sub> in <i>Methanobacterium</i> (FEBS 0478) <i>E. Stupperich, G. Fuchs</i>                                                                                                                  | 345 |
| Identification and characterization of variant forms of gastrin-releasing peptide (GRP) (FEBS 0443) <i>T.J. McDonald, H. Jörnvall, K. Tatemoto, V. Mutt</i>                                                                                                      | 349 |
| Carbohydrate structures of hen ovomucoid: A mass spectrometric analysis (FEBS 0457) <i>H. Egge, J. Peter-Katalinić, J. Paz-Parente, G. Strecker, J. Montreuil, B. Fournet</i>                                                                                    | 357 |
| Effects of mutations and of ionophore on chlororespiration in <i>Chlamydomonas reinhardtii</i> (FEBS 0477) <i>P. Bennoun</i>                                                                                                                                     | 363 |
| Nucleotide sequence of the promoter region of the citrate synthase gene ( <i>gltA</i> ) of <i>Escherichia coli</i> (FEBS 0444) <i>E.P. Hull, M.E. Spencer, D. Wood, J.R. Guest</i>                                                                               | 366 |
