

Retractions

Brach, M.A., Cicco, N.A., Riedel, D., Hirano, T., Kishimoto, T., Mertelsmann, R.H. and Herrmann, F.: Mechanisms of differential regulation of interleukin-6 mRNA accumulation by tumor necrosis factor alpha and lymphotoxin during monocytic differentiation [FEBS Letters 263 (1990) 349–354]

R. Mertelsmann has informed us that the above-referenced publication was, in its final version, submitted without his knowledge, and that Figure 1 most likely does not depict the original data indicated in the legend. R. Mertelsmann has therefore withdrawn his name from the publication.

Mantovani, L., Henschler, R., Brach, M., Wieser, R., Lübbert, M., Lindemann, A., Mertelsmann, R.H. and Herrmann, F.: Differential regulation of interleukin-6 expression in human fibroblasts by tumor necrosis factor- α and lymphotoxin [FEBS Letters 270 (1990) 156–162]

L. Mantovani, R. Mertelsmann, A. Lindemann, M. Lübbert and R. Henschler have informed us that the above-referenced publication was, in its final version, submitted without their knowledge, and that Figures 2b and 3 most likely do not depict the original data indicated in the legend. L. Mantovani, R. Mertelsmann, A. Lindemann, M. Lübbert and R. Henschler have therefore withdrawn their names from the publication.

Mantovani, L., Henschler, R., Brach, M., Mertelsmann, R.H. and Herrmann, F.: Regulation of gene expression of macrophage-colony stimulating factor in human fibroblasts by the acute phase response mediators interleukin (IL)-1 beta, tumor necrosis factor- α and IL-6 [FEBS Letters 280 (1991) 97–102]

L. Mantovani, R. Mertelsmann and R. Henschler have informed us that the above-referenced publication was, in its final version, submitted without their knowledge, and that Figures 3, 4, 5 and 6 most likely do not depict the original data indicated in the legend. L. Mantovani, R. Mertelsmann and R. Henschler have therefore withdrawn their names from the publication.

Henschler, R., Lindemann, A., Brach, M.A., Mackensen, A., Mertelsmann, R.H. and Herrmann, F.: Expression of functional receptors for interleukin-6 by human polymorphonuclear leukocytes. Downregulation by granulocyte-macrophage colony-stimulating factor [FEBS Letters 283 (1991) 47–51]

R. Mertelsmann, A. Lindemann, R. Henschler and A. Mackensen have informed us that the above-referenced publication was, in its final version, submitted without their knowledge, and that Figure 4 most likely does not depict the original data indicated in the legend. R. Mertelsmann, A. Lindemann, R. Henschler and A. Mackensen have therefore withdrawn their names from the publication.
