

MASTER SUBJECT INDEX

Abalone liver, fucoidan hydrolysis by α -L-fucosidase	9 (1970) 45
Acetate formation from pyruvate in house fly flight muscle mitochondria	10 (1970) 292
Acetate utilisation by <i>Rhodopseudomonas spheroides</i>	4 (1969) 52
Acetoacetyl-CoA reductase in extracts of <i>Rhodopseudomonas spheroides</i> and <i>Rhodomicrobium vannielli</i> , activation by Hg^{2+}	5 (1969) 246
Acetoacetyl-CoA thiolase, sequence around active cysteine residues	1 (1968) 150
<i>Acetobacter xylinum</i> , phosphoenolpyruvate synthase of, properties and physiological role	3 (1969) 156
Acetylcholine	
binding to acetylcholinesterase in the presence of eserine	2 (1968) 77
effect on labelling of smooth and rough membranes from ovine submaxillary glands	5 (1969) 107
β -methyl- δ -keto- $\Delta\alpha\beta$ -hexenoic acid and mesityl oxide as acetyl donors in the enzymic synthesis of	5 (1969) 338
Acetylcholinesterase	
binding (irreversible) to TDF in electrogenic tissue	2 (1969) 224
binding (specific) of acetylcholine in the presence of eserine	2 (1968) 77
of human brain, properties of	2 (1969) 195
isopropyl-methylphosphonylated, reactivation by α,ω -bis-(4-pyridinealoxime)-2- <i>trans</i> -butene dibromide	10 (1970) 182
Acetyl-CoA, pyruvate synthesis from with carbon dioxide with NADH and NADPH as electron donors	2 (1969) 342
3-O-Acetyl-2'-deoxy-4-thiothymidine, crystal and molecular structure	5 (1969) 262
Acetyl donors in enzymic synthesis of acetylcholine	5 (1969) 338
N-Acetyl- β -hexosaminidase of brain, fractionation on DEAE-cellulose, Tay-Sachs disease	9 (1970) 1
N-Acetyl- β -hexosaminidase pattern in Tay-Sachs disease	4 (1969) 351
N-Acetylhomocysteinyl-RNase, inhibition by Ag^+	8 (1970) 243
N-(N-Acetyl-4-sulphamoylphenyl)-maleimide on swelling in rat liver mitochondria	1 (1968) 142
Acid proteinase (brain), encephalitogen purification by	1 (1968) 191
<i>Acinetobacter</i> , isocitrate dehydrogenase (NADH)	6 (1970) 324
Acridan derivative of riboflavin, photooxidation of	7 (1970) 101
Acridine orange tRNA, polarised fluorescence of	8 (1970) 201
Acriflavin inhibition of <i>Bacillus subtilis</i> transforming system	2 (1969) 348
Acrylamide gel, solubilisable, for electrophoresis	7 (1970) 293
Actin-bound ADP in frog muscle, exchange of during activity	5 (1969) 41
<i>Actinomyces</i> α -hydroxy fatty acids	4 (1969) 96
Actinomycin C ₁ interaction with purine nucleosides	3 (1969) 330
Actinomycin D	
on bile acid conversion in bile fistula rats	1 (1968) 219
on protein synthesis in islets of Langerhans	10 (1970) 165
on RNA polymerase of rat liver nuclei	1 (1968) 275
N- α -Acylamino acid amides as O-acylating reagents of serine	4 (1969) 255
Acylglucosides in <i>E. coli</i> , <i>Saccharomyces cerevisiae</i> , and <i>Agaricus bisporus</i>	8 (1970) 322
Adenine nucleotides in rat liver, effect of ethanol	2 (1968) 121
Adenine nucleotide translocation in spinach chloroplasts	5 (1969) 11
Adenosine in human and canine blood, differential inactivation	3 (1969) 133
Adenovirus 7, presence of half-cystine residues in capsid	7 (1970) 114
Adenylate kinase	
adenine nucleotide interconversion in muscle cytosol	7 (1970) 221
and creatine kinase equilibria, calculation of substrate and feedback signal levels in muscle	7 (1970) 239
in rat diaphragm (isolated) in absence of added glucose, effect of insulin	9 (1970) 317
in pig, purification and properties	10 (1970) 333
Adenyl cyclase stimulation by prostaglandin E ₂ in bovine corpus luteum	7 (1970) 283
Adenylic acid $^1H \rightarrow ^3H$ exchange, effect of complexing between poly-U and poly-A on rate of	3 (1969) 211
Adipose tissue (brown) of rat, fatty acid synthesis by cell sap and mitochondria	6 (1969) 241
Adjuvant active waxes D from mycobacteria, isolation of peptidoglycan	2 (1968) 7
ADP	
actin-bound in frog muscle, exchange during activity	5 (1969) 41
and ATP spin-spin coupling constants as measured by phosphorous NMR spectra	8 (1970) 125
on isocitrate dehydrogenase (NADH) of muscle	5 (1969) 124
requirement for light triggered ATPase and ATP-P _i exchange reactions in chloroplasts	5 (1969) 227
sensitivity of alkylation of SH-groups in rat liver mitochondria	9 (1970) 274

Adrenal cortex of beef, distribution of cytochrome <i>P</i> -450 and steroid 11- β -hydroxylase in mitochondrial membranes	5 (1969) 135
Adrenal cortex mitochondria, two forms of cytochrome <i>P</i> -450	9 (1970) 41
Adrenal microsomes, substrate binding to cytochrome <i>P</i> -450	6 (1970) 249
Adrenalectomised rat livers, glucose and phentolamine repression of theophylline-induced tyrosine aminotransferase	9 (1970) 105
Adrenalectomised rat livers, phentolamine repression of tryptophan- or benzoate-induced tyrosine aminotransferase	8 (1970) 316
<i>Aerobacter aerogenes</i>	
induction of the 2,3-butanediol-forming enzymes	2 (1968) 36
intermediate in the formation of 4-aminobenzoic acid from chorismic acid	3 (1969) 319
purification and properties of membrane bound respiratory nitrate reductase	5 (1969) 249
sulphur analogue of lysine, <i>S</i> -(β -aminoethyl)-L-cysteine	8 (1970) 301
Aerobic CO ₂ in chlorella	1 (1968) 171
Affinity chromatography	
of affinity labelled peptides from staphylococcal nuclease	7 (1970) 161
of chlorismate mutase from <i>Claviceps paspali</i>	6 (1970) 232
on ovomucoid-Sepharose resin, purification of trypsin	7 (1970) 353
Aflatoxin B ₁ , histopathological effect on developing chick embryo liver	10 (1970) 198
Aflatoxin B ₁ on polysome binding to microsomal membranes as measured by the activity of an enzyme catalysing disulphide exchange	4 (1969) 103
<i>Agaricus bisporus</i> acylglucoses	8 (1970) 322
Agglutinin kappa chain, <i>N</i> -terminal amino acid sequence	2 (1968) 33
<i>Agrobacterium tumefaciens</i> cross reacting antigens in sterile Crown-gall tumours	3 (1969) 173
<i>Agrobacterium tumefaciens</i> , release of RNA and DNA into tomato cells and the transcription of host cell DNA	8 (1970) 349
Albumin, salicylate binding to	1 (1968) 332
Albumin synthesis in cell-free extracts of rat liver, impairment of	6 (1970) 137
Alcohol dehydrogenase from horse liver, subunit structure of isoenzymes	2 (1969) 239; 5 (1969) 202
Alcohol dehydrogenase from yeast, cobalt incorporation	1 (1968) 133
Aldolases of rabbit and sturgeon muscle, amino acid sequence homology	10 (1970) 49
Algae, glycollate oxidising enzyme	5 (1969) 341
Algae, rifamycin antibiotics on	9 (1970) 171
Alkaline phosphatases	
beef, horse, pig and sheep brain	6 (1970) 262
<i>E. coli</i> , ⁸¹ Br and ³⁵ Cl NMR studies	9 (1970) 189
<i>E. coli</i> , specific binding of Cu(II)	7 (1970) 147
human fetal mineralising tissues	3 (1969) 153
mice, normal and leukemic	8 (1970) 87
rat intestine	7 (1970) 86
<i>S</i> -Alkylated proteins, enhancement of solubility by carboxyl group modification	4 (1969) 207
<i>n</i> -Alkylboronic acids as reversible inhibitors of α -chymotrypsin	7 (1970) 23
Allosteric	
behaviour of yeast threonine deaminase under partially activating conditions	5 (1969) 141
effector of pyruvate kinase, a novel method for enzyme purification by CM-cellulose columns	4 (1969) 307
enzymes, analysis of kinetic data by a linear plot	3 (1969) 325
fructose-1,6-diphosphatase, effect of UV irradiation on	4 (1969) 93
glutaminase of rat liver, regulatory significance of	1 (1968) 317
glyceraldehydephosphate dehydrogenase (yeast), T and R states of and stereoselectivity reaction of SH-groups	1 (1968) 25
model of Monod, Wyman and Changeux, kinetic interpretation	1 (1968) 346
pyruvate decarboxylase	9 (1970) 293
2-Allyl-2-isopropylacetamide	6 (1970) 343
α -Amanitin	
for assay of rat liver nuclei RNA polymerase I and II	8 (1970) 57
binding to calf thymus RNA polymerase B	9 (1970) 258
on cortisol induction of tyrosine aminotransferase in rat liver	9 (1970) 103
on ribonucleoside triphosphates (free) in mouse liver	6 (1970) 295
on yeast RNA polymerase	7 (1970) 220
Amapitins, chemistry and action (Review letter)	8 (1970) 1
Amino acid (cationic) transport system, reaction of neutral amino acids + Na ⁺ with	3 (1969) 14
Amino acid composition of soluble tryptic peptides from aminoethylated beta-like chain of <i>Rana esculenta</i> haemoglobin major component	5 (1969) 271
Amino acid incorporation in mitochondria, see <i>Mitochondria</i>	
D-Amino acid oxidase reaction, kinetic isotope effect on	6 (1969) 22
Amino acid residues of pig heart, reactivity in the presence of sulphite	1 (1968) 129
Amino acid sequences, see <i>Sequences</i>	

3'(2')-O-Aminoacylnucleotides as polypeptide acceptors at the ribosomal peptidyltransferase centre	7 (1970) 112
Aminoacyl-tRNA	
binding to ribosomes, method of measuring fast kinetics	2 (1969) 293
dependent interaction of a transfer enzyme from yeast with a complex formed by 2 other factors with guanosine triphosphate	2 (1968) 49
enzymic hydrolysis of <i>N</i> -substituted	1 (1968) 163
hydrolysis by venom phosphodiesterase	1 (1968) 156
phenylalanyl (yeast) chemically modified, separation and reduction to form diol and 3'-terminal ribose	2 (1968) 136
synthesis in <i>E. coli</i> , effect of lipids on	6 (1970) 86
synthesis in rat liver, effect of cholesteryl esters with different saturated fatty acids on synthetases, <i>E. coli</i> and <i>Streptococcus thermophilus</i> , formation of	9 (1970) 161
4-Aminobenzoic acid, intermediate in formation of from chorismic acid in <i>Aerobacter aerogenes</i>	9 (1970) 252
7-Amino-1-chloro-3-toluene- <i>p</i> -sulphonamido-2-butanone, reaction kinetics with bovine thrombin	3 (1969) 319
4-Amino-4-deoxy-L-arabinose from S and R form bacterial lipopolysaccharides	1 (1968) 343
<i>S</i> -(β -Aminoethyl)-L-cysteine, sulphur analogue of lysine, in <i>Aerobacter aerogenes</i>	8 (1970) 161
6-Aminonicotinamide analogue of NADP, inhibition of NADPH-dependent oxidoreductases of NADP	8 (1970) 301
Aminopeptidase	6 (1970) 225
leucine, of bovine lens, zinc binding	10 (1970) 17
M,	
amide bond cleavage	8 (1970) 65
modification of active histidines by diazonium-1-H-tetrazole	4 (1969) 265
modification of active tyrosyl residues by tetranitromethane	4 (1969) 262
ribosomal bound in <i>E. coli</i> , role in protein synthesis	6 (1970) 235
serum albumin on activity	9 (1970) 225
Ammonia, protective effect on rat liver mitochondria	9 (1970) 309
Amobarbital action on microsomal and mitochondrial respiratory state in perfused rat liver with and without phenobarbital induction	2 (1969) 170
AMP	
cooperative binding with rabbit muscle phosphorylase <i>b</i>	9 (1970) 152
cyclic, see <i>Cyclic AMP</i>	
deaminase from muscle, time dependence of activation by substrate and potassium ion	2 (1968) 65
deaminase, rat muscle, reaction with metal ions	10 (1970) 101
on long-chain fatty acid oxidation and ATP-dependent fatty acid thiokinase	3 (1969) 279
pyrophosphorylase	1 (1968) 179
Amphibian, <i>Bufo bufo</i> , characterisation of haemoglobin chains	5 (1969) 196
Amylase	
embryonic chick pancreas, effect of hydrocortisone	2 (1969) 323
in germinating wheat seeds	7 (1970) 191
on 6 ² and 6 ³ - α -glucomalto-oligosaccharides	6 (1970) 182
NMR characterisation of an acetyl group at <i>N</i> -terminal position	9 (1970) 341
water insoluble, action pattern of	5 (1969) 118
Amylomaltase, action pattern of	1 (1968) 1
<i>Anabaena variabilis</i> cells grown in the presence of diphenylamine, increased rate of cyclic photo-phosphorylation	10 (1970) 253
<i>Anacystis montana</i> , effect of rifamycins	9 (1970) 171
<i>Anacystis nidulans</i> RNA polymerase, differential transcription of T4-DNA by	3 (1969) 76
Anaesthetics (local) on interaction of fluorescent probe with erythrocyte membranes and lipids	6 (1970) 245
Androst-4-ene in rat liver, 14 α -hydroxylation of	1 (1968) 269
1-Anilino-8-naphthalene sulphonate binding to	
apo-horseradish peroxidase	6 (1970) 145,158
erythrocyte membranes	3 (1969) 150
erythrocyte membranes and lipids	6 (1970) 245
transaldolase	7 (1970) 235
Antamanide, affinity for sodium ions	9 (1970) 89
Antibiotic binding sites at the peptidyltransferase centre of <i>E. coli</i> ribosomes	6 (1970) 273
Antibiotics, effect on peptidyl transfer catalysed by human tonsil ribosomes	6 (1970) 198
Antibody	
anti-tobacco mosaic virus, effect of tetranitromethane on activity of	8 (1970) 229
arsonic of rabbit, <i>N</i> -terminus of light chains of	7 (1970) 99
immunoglobulins, see <i>Immunoglobulin</i>	
to nitrophenyl group, effect of limited nitration on	2 (1968) 45
shape, homogeneity and valency (Review letter)	1 (1968) 83
Antigenic characterisation of pFc' fragments from human G myeloma proteins	6 (1970) 193
Aorta structural proteins, evidence for aspartamido-glycosamidic linkages	1 (1968) 169
Apamin, disulphide bridges of	1 (1968) 111
Apiose, transfer of from UDP-apiose to 7- <i>O</i> -(β -D-glucosyl)-apigenin and 7- <i>O</i> -(β -D-glucosyl)-chrysoeriol with an enzyme preparation from parsley	7 (1970) 164

Apoferitin from horse spleen, structure and molecular weight	6 (1970) 121, 134
Apple extracts, enzymic conversion of linolenic acid to ethylene by	1 (1968) 283
Arginase control of ornithine carbamoyltransferase activity in <i>Saccharomyces cerevisiae</i>	3 (1969) 47
Arginine	
deiminase in <i>Chlamydomonas reinhardtii</i>	3 (1969) 166
genes, reactivation under the influence of polar mutations	3 (1969) 18
metabolism in <i>Chlamydomonas reinhardtii</i> , a new type of citrulline degradation	7 (1970) 274
Arsenate induced activity of certain enzymes on their dephosphorylated substrates	1 (1968) 32
Arsonic antibody of rabbit, N-terminal light chains of	7 (1970) 99
Articular cartilage of pig, differences in composition and size of protein-polysaccharides	4 (1969) 16
Arum spadix mitochondria, energy conservation	4 (1969) 164
Arylaldehyde:NADP oxidoreductase catalysed reduction of salicylate, enzyme-substrate intermediates	5 (1969) 177
Arylaminopeptidases of human saliva, inhibition by benzethonium chloride	2 (1968) 101
<i>Ascaris lumbricoides</i> , occurrence of high amount of glycerylphosphorylcholine	9 (1970) 351
L-Asparaginase	
<i>E. coli</i> , purification by specific adsorption and desorption	7 (1970) 294
on protein and glycoprotein synthesis in murine leukemia cells	10 (1970) 85
rat liver, inhibitors of	3 (1969) 313
Asparagine synthetase, glutamine-dependent, from yellow lupin seedlings	10 (1970) 62
Aspartamido-glycosamidic linkages in the structural proteins of the aorta	1 (1968) 169
Aspartate aminotransferase	
electrophoretic differentiation in ionic strength and pH gradients	4 (1969) 151
from pig heart, characterisation by isoelectric focusing	5 (1969) 347
from pig heart cytoplasm, microheterogeneity of	2 (1968) 115
Aspartate inhibition of entry of 2-oxoglutarate into rat liver	4 (1969) 247
<i>Aspergillus flavus</i> , two new metabolites	2 (1968) 23
<i>Aspergillus nidulans</i> isocitrate lyase	7 (1970) 231
<i>Aspergillus oryzae</i> , glycoprotein synthesis in	6 (1970) 80
<i>Astacus leptodactylus</i> , trypsin-like protease of with serine at the active centre	6 (1970) 229
Atomic absorption photometer, adaptation to measure NADH	4 (1969) 160
ATP	
dependent fatty acid thiokinase, effect of atractylate and AMP	3 (1969) 279
dependent inactivation of heart muscle pyruvate dehydrogenase and reactivation by magnesium	3 (1969) 271
on nicotinamide nucleotide synthesis	1 (1968) 206
-phosphate exchange in chloroplasts	5 (1969) 227
site on action of β -galactoside transport in <i>E. coli</i>	4 (1969) 69
synthesis in spinach chloroplasts, stimulation by valinomycin	9 (1970) 313
ATPase	
calcium-activated, a peptide in H-meromyosin containing the reactive sulphhydryl group	3 (1969) 309
in chloroplasts	5 (1969) 227; 7 (1970) 297
complex with tRNA ^{Trp}	9 (1970) 163
rat liver mitochondria, see <i>Mitochondria, liver (rat)</i>	
of rat liver plasma membranes, kinetic properties of MgATP phosphohydrolase	2 (1969) 317
reaction with deoxyhaemoglobin	7 (1970) 351
sodium-potassium activated, inhibition by <i>N,N'</i> -dicyclohexylcarbodiimide	5 (1969) 285
Atractylate binding affinity to rat liver inner mitochondrial membrane	8 (1970) 328
Atractylate on long-chain fatty acid oxidation and on ATP-dependent fatty acid thiokinase	3 (1969) 279
Atropine on labelling of the smooth and rough membranes from ovine submaxillary glands	5 (1969) 107
Atropine sulphate interaction with proteolipid from cerebral cortex, studied by light scattering	4 (1969) 4
Aureovocin binding to ribosomes of <i>Streptomyces aureofaciens</i> B-96	5 (1969) 131
Aurovertin, influence on affinity of mitochondrial ATPase for ATP and ADP	6 (1970) 309
Aurovertin-sensitive phosphate activation of mitochondrial ATPase	9 (1970) 305
Avidin, carbamoylphosphate synthase and urea amidolyase sensitivity towards	3 (1969) 233
5-Azacytidine on ribosomal synthesis in <i>E. coli</i>	1 (1968) 55
Azapyrimidine nucleosides, n- π^* transitions	7 (1970) 335
Azide, action on respiratory carriers and respiration of mitochondria in perfused livers	5 (1969) 319
<i>Azobacter nitrogenase</i> , effect of cytochrome <i>c</i> and non-haem iron on activity and oxygen sensitivity	8 (1970) 281
<i>Azotobacter vinelandii</i> , regulation of NADH and NADPH metabolism in	1 (1968) 301
<i>Bacillus brevis</i> , activation of ornithine by cell-free extracts of	1 (1968) 63
<i>Bacillus cereus</i> , cytidine deaminase and uridine phosphorylase regulation	10 (1970) 67
<i>Bacillus megaterium</i> , RNA polymerase, substrate-dependent heterogeneity of initiation	9 (1970) 186
<i>Bacillus stearothermophilus</i>	
leucine-specific tRNAs from	5 (1969) 265
ribosomes (70 S), GTP on dissociation of	4 (1969) 331
thermal stability of leucyl and isoleucyl-tRNA synthetase-aminoacyladenylate complexes	4 (1969) 239

<i>Bacillus subtilis</i>	
L-lactyl-puromycin isolation	1 (1968) 97
RNA polymerase, isolation of a stimulating factor	5 (1969) 288
transforming system, acriflavin inhibition	2 (1969) 348
transforming system, heat denaturation	2 (1969) 236
<i>Bacillus thuringiensis</i> exotoxin, inhibition of RNA polymerase	8 (1970) 233
Bacteriophage, see <i>Virus</i>	
BAEE, substrate for papain	2 (1969) 143
Baker's yeast, see <i>Yeast, baker's</i>	
Basic pancreatic trypsin inhibitor, interaction with trypsinogen	3 (1969) 137
Bathophenanthroline inhibition of oxidative phosphorylation and dinitrophenol stimulated ATPase in rat liver mitochondria	6 (1970) 109
Bean chloroplasts, <i>N</i> -formylmethionyl-tRNA in	4 (1969) 285
Beef	
adrenal cortex mitochondrial membranes, distribution of cytochrome <i>P</i> -45 and steroid	
11- β -hydroxylase	5 (1969) 135
heart mitochondria, see <i>Mitochondria, beef heart</i>	
heart phospholipid exchange protein, purification of	7 (1970) 44
Bence-Jones proteins, human, of kappa type, isolation	10 (1970) 46
Bence-Jones proteins, sequence studies of Rad, Fr 4 and B 6	2 (1969) 301
Benzethonium chloride inhibition of arylaminopeptidases and proline iminopeptidases in human saliva	2 (1968) 101
Benzodiazepine biosynthesis in <i>Penicillium cyclopium</i> Westling	3 (1969) 292
Benzoylarginine ethyl ester, substrate for papain	2 (1969) 143
L-3-Benzyl-2,5-diketomorpholine hydrolysis by chymotrypsin	9 (1970) 94
Benzyl-4-guanidinobenzoate inhibition of trypsin, plasmin and thrombin	8 (1970) 170
4- <i>cis</i> -Benzylidene-2-phenyloxazolin-5-one, α -chymotrypsin catalysed hydrolysis of, evidence for covalent non-productive binding	5 (1969) 63
Bile	
acid hydroxylation in rat liver microsomes, effect of CO and phenobarbital on	4 (1969) 177
acids, formation from cholesterol in bile fistula rats	1 (1968) 219
fistula rats, effect of actinomycin D and puromycin on the conversion of cholesterol into bile acids	1 (1968) 219
Bilirubin binding to human serum albumin, determination of dissociation constants	5 (1969) 112
Bilirubin, human serum, circular dichroism of complexes in aqueous solution	9 (1970) 53
2,4-Bis-(<i>p</i> -chloroamino)-pyrimidine, an uncoupler of oxidative phosphorylation	4 (1969) 157
α,ω -Bis-(4-pyridinealldoxime)-2- <i>trans</i> -butene dibromide, reactivating effect on isopropyl-methylphosphorylated acetylcholinesterase	10 (1970) 182
Blood	
cell (red) agglutination and polysaccharide precipitation by <i>Pisum sativum</i> phytohaemagglutinin, relationship between	9 (1970) 345
group B active tetrasaccharide, biosynthesis	10 (1970) 279
group specificity of hog submaxillary glycoproteins, effect of sialidase	8 (1970) 353
human cord, effect of iron and haem on haemoglobin A and F in	1 (1968) 209
humans and canines, adenosine inactivation in	3 (1969) 133
platelets, dependence of 5-hydroxytryptamine uptake on sodium and chloride and inhibition by choline	3 (1969) 103
<i>Bombyx mori</i> , silk gland, functional adaptation of tRNAs to fibroin synthesis	7 (1970) 327
Bone marrow RNA binding to histones, effect of chromatin acidic proteins	8 (1970) 133
Bovine	
adrenal cortex mitochondria, two forms of cytochrome <i>P</i> -45	9 (1970) 41
carboxypeptidase A reaction with 2-hydroxy-5-nitrobenzyl bromide and <i>N</i> -methylnicotinamide chloride	7 (1970) 72
carboxypeptidase A solution conformation	7 (1970) 72
cartilage, antigenic determinants of two components of proteoglycan complex	9 (1970) 149
corpus luteum, adenylyl cyclase stimulation by prostaglandin E ₂	7 (1970) 283
erythrocyte membrane proteins, mild procedure for fractionation	8 (1970) 341
growth hormone, <i>N</i> -terminus	3 (1969) 118
insulin, fractionation and ultracentrifugation of proinsulin	2 (1968) 130
insulin and proinsulin, comparison of antibodies	8 (1970) 157
α -lactalbumin, lack of concordance between primary structure and antigenicity	10 (1970) 237
lens, leucine aminopeptidase, zinc binding	10 (1970) 17
liver, porphobilinogen kinetic studies	3 (1969) 223
muscle mitochondria, α -glycerophosphate oxidase system	10 (1970) 109
pancreas	
<i>N</i> -acetylhomocysteinyl-RNase, inhibition by Ag ⁺	8 (1970) 243
ribonuclease, spectrophotometric assay	1 (1968) 29

ribonuclease S-peptide, conformation transitions of	1 (1968) 298
plasma, hydroxyproline-containing	6 (1970) 19
serum albumin conjugate with phalloidin	4 (1969) 341
spleen, proteolytic activity at neutral pH	1 (1968) 69
stomach creatine kinase, isolation of isozyme BB	10 (1970) 57
submaxillary gland homogenates, ultrafilterable peptides from	6 (1970) 326
thrombin, reaction kinetics of reaction with <i>p</i> -nitrophenyl- <i>p'</i> -guanidinobenzoate and 7-amino-1-chloro-3-toluene- <i>p</i> -sulphonamido-2-butanone	1 (1968) 343
thyrotrophins, isolation by isoelectric focusing	3 (1969) 250
thyrotropin subunits, isolation and comparison with subunits of luteinising hormone	9 (1970) 20
trypsinogen, aspartic acid residue no.177	8 (1970) 176
Brain	
<i>N</i> -acetyl- β -hexosaminidase fractionation on DEAE-cellulose, Tay-Sachs disease	9 (1970) 1
<i>N</i> -acetyl- β -hexosaminidase fractionation, Tay-Sachs disease	4 (1969) 351
acid proteinase, purified, encephalitogen purification by	1 (1968) 191
alkaline phosphatases	6 (1970) 262
cell suspensions, method of preparation	9 (1970) 290
cerebroside 2-hydroxy acids, determination of configurations by gas chromatography	5 (1969) 192
of human, acetylcholinesterase, properties	2 (1969) 195
of Jimpy mouse, psychosine synthesis	3 (1969) 199
mitochondria	
aspartate aminotransferase	4 (1969) 151
ketone oxidation by	6 (1970) 174
malate dehydrogenase, interconversion of components of	1 (1968) 241
protein synthesis in	10 (1970) 273
5'-nucleotidase, effect of pH on allosteric properties	7 (1970) 129
rat	
myelin proteins, extraction with sodium dodecyl sulphate and electrophoresis of	9 (1970) 209
sialoglycoproteins, gangliosides and related enzymes	9 (1970) 267
synaptic membranes, 5-hydroxytryptamine-containing vesicles	3 (1969) 80
Bromelin protease, isolation and properties of	2 (1969) 278
Bromine-81 NMR studies of <i>E.coli</i> alkaline phosphatases	9 (1970) 189
Bromoacetyl pyridine, reaction with pigeon liver NAD kinase	5 (1969) 96
8-Bromoguanosine, gel formation by	4 (1969) 173
Brush borders of rat small intestine, isolation of	1 (1968) 46
<i>Bufo bufo</i> , preliminary characterisation of haemoglobin chains of	5 (1969) 196
2,3-Butanediol-forming enzymes in <i>Aerobacter aerogenes</i> , evidence for induction of	2 (1968) 36
Butyryl-CoA, role of carbon	8 (1970) 55
Butyryl-CoA, stereochemistry of oxidation at the α -carbon and enzymic hydrogen exchange	9 (1970) 335
Cadmium-induced nuclear RNA synthesis in livers of normal and adrenalectomised rats	10 (1970) 169
Cadmium ions, co-crystallisation of tRNA ^{Ser} in water-dioxane	2 (1968) 112
Calcium	
on ADP-ATP exchange reactions in rat liver mitochondria	6 (1970) 339
citrate formation in rat liver mitochondria, stimulation by	3 (1969) 190
on fluorescent probe interaction with erythrocyte membranes and lipids	6 (1970) 245
gluconeogenesis enzymes, control by	10 (1970) 33
on isocitrate dehydrogenase (NAD-linked) of muscle	5 (1969) 124
mitochondrial transport	10 (1970) 1
phosphorylase <i>b</i> kinase of insect flight muscle, activation of	7 (1970) 183
transketolase of baker's yeast, cofactor of	6 (1970) 49
Calf	
skin collagen, characterisation of cyanogen bromide peptides from α 2-chain	9 (1970) 229
skin collagen, fluorescent properties of	5 (1969) 187
thymus DNA, studies of complex with distamycin A	10 (1970) 175
thymus RNA polymerase B, amanitin binding	9 (1970) 258
uterus, oestradiol binding to extracts of	5 (1969) 161
Callus of soybean, see <i>Soybean callus</i>	
Campesterol of <i>Nicotiana tabacum</i> , incorporation of 3-H-demesteryl propionate	3 (1969) 257
Cancer cells, dedifferentiation of phospholipid composition of subcellular particles of	2 (1968) 87
Canine blood, adenosine inactivation	3 (1969) 133
Carbamoyl phosphate synthetase, sensitivity to avidin	3 (1969) 233
Carbon dioxide, "aerobic", in <i>Chlorella</i>	
Carbon dioxide, facilitated transport across a membrane bearing carbonic anhydrase	7 (1970) 223
Carbonic anhydrase, facilitated transport of CO ₂ across a bearing membrane	7 (1970) 223
Carbon monoxide on hydroxylation of bile acids by rat liver microsomes	4 (1969) 177
Carbon monoxide-inhibited hydroxylation of cyclohexane by rat liver microsomes, photochemical action spectrum of	4 (1969) 99
Carbon tetrachloride-induced polysome damage, in rat liver	9 (1970) 93
Carbon tetrachloride-inhibited microsomal glucose-6-phosphatase, reactivation by phospholipids	3 (1969) 202

Carnitine levels in higher plants	5 (1969) 169
Cartilage	
bovine, antigenic determinants of two components of proteoglycan complex	9 (1970) 149
pig articular, differences in composition and size of protein-polyssacharides	4 (1969) 16
pig thyroid, chondroitin-4-sulphate synthesis <i>in vitro</i>	9 (1970) 145
Catabolite repression in <i>E. coli</i> , cyclic AMP as antagonist of	2 (1968) 57
Catalase, electron spin resonance of methyl hydrogen peroxide compound II of	9 (1970) 71
Cathepsin B, isolation and specificity	4 (1969) 295
Cathepsin D inhibition by diazoacetylnorleucine methyl ester	6 (1970) 312
Cathepsin E inhibition by diazoacetylnorleucine methyl ester	9 (1970) 348
Cell membranes, report of Biophysical Society	3 (1969) 297
Cell walls of yeast, structures of two glucans	4 (1969) 122
Centrifugation time, effect on isolation of rat liver polysomes	6 (1970) 114
Cerebral cortex proteolipid, interaction with atropine sulphate studied by light scattering	4 (1969) 4
Cerebroside 2-hydroxy acids, configuration determination by gas chromatography	5 (1969) 192
Cerebroside sulphate-amine interaction in neoplastic mast cells	9 (1970) 337
Chain length of ribosomal RNA extracted from mammalian cells	1 (1968) 104
Chang cells, stimulation of thymidylate kinase and deoxycytidylate deaminase activities by deoxyadenosine	2 (1969) 345
Chick	
embryo	
collagen proline hydroxylation in	2 (1969) 173
liver, cell cultures, effect of inducer substances on porphyrin synthesis	2 (1968) 127
liver, histopathological effects of aflatoxin B ₁ and palmotoxins B ₀ and G ₀	10 (1970) 198
pancreas, effect of hydrocortisone on the accumulation of amylase by	2 (1969) 323
phosvitin kinase from	1 (1968) 244
ribosomal aggregates after exposure to low temperature	6 (1970) 128
erythrocytes, quantitative variation of histones	2 (1969) 248
erythrocytes, uroporphyrinogen decarboxylase from	5 (1969) 149
galactose toxicity in	5 (1969) 121
mitochondria, origin of cytochrome <i>c</i> synthesis by endoplasmic reticulum	1 (1968) 38
<i>Chlamydomonas reinhardi</i> , arginine deiminase in	3 (1969) 166
<i>Chlamydomonas reinhardi</i> , arginine metabolism and citrulline degradation	7 (1970) 274
Chloramphenicol	
on active amino acid transport	4 (1969) 319
on rat liver mitochondrial biogenesis <i>in vivo</i>	3 (1969) 208
on polysome metabolism in <i>E. coli</i>	3 (1969) 34
on ¹⁴ C-proline peptides synthesised <i>in vitro</i> directed by poly-C	8 (1970) 129
Chlorella, metaphosphate and aerobic CO ₂ in	1 (1968) 171
<i>Chlorella pyrenoidosa</i>	
chlorophyll spectral changes if photolyte is split by light	8 (1970) 247
NADH-nitrate reducing system, role of FAD	9 (1970) 157
rifamycins on	9 (1970) 171
Chloride dependence on uptake of 5-hydroxytryptamine by blood platelets	3 (1969) 103
Chlorine-35 NMR studies of <i>E. coli</i> alkaline phosphatase	9 (1970) 189
6-Chloro-8-aza-9-cyclopentylpurine, inhibition of RNA polymerase and formyltetrahydrofolate synthetase in <i>E. coli</i>	7 (1970) 119
Chlorophyll catalysis and Einstein's photochemical law in photosynthesis	3 (1969) 221
Chlorophyll spectrum of <i>Chlorella pyrenoidosa</i> , changes if photolyte is split by light	8 (1970) 247
Chloroplasts	
beans, <i>N</i> -formylmethionyl-tRNA in	4 (1969) 285
<i>Euglena gracilis</i>	
DNA	8 (1970) 25
peptide chain initiation factors	10 (1970) 89
prepared with a new gas pressure device	8 (1970) 164
ribosomes in	10 (1970) 149
lettuce, ADP requirement for light triggered ATPase and ATP-P _i exchange reactions	5 (1969) 227
lettuce ATPase activity	7 (1970) 297
pea plant leaves, effect of some organometallic compounds on membrane permeability	10 (1970) 139
pea plant leaves, pteroylglutamates and methionine synthesis in	7 (1970) 267
spinach	
adenine nucleotide translocation in	5 (1969) 11
ATP-32P _i P _i exchange	1 (1968) 265
ATP synthesis from pyrophosphate and ADP	1 (1968) 249
ATP synthesis, valinomycin-stimulated post-illumination	9 (1970) 313
bacterial-like protein synthesis	4 (1969) 55
counter current distribution of 3 classes	5 (1969) 360
digitonin subparticles, proton uptake and phosphorylation	10 (1970) 299
digitonin subparticles, relation of light-induced increase in absorbance at 518 nm to photophosphorylation	7 (1970) 151

exchange reaction between labelled pyrophosphate and ATP	1 (1968) 265
hydrogen peroxide as product of autooxidation of ferredoxin	10 (1970) 21
nitrate as a Hill reagent	3 (1969) 57
oxygen evolution in the dark following illumination in the presence of added manganese	6 (1970) 281
pH-dependent alteration of photosystem II	9 (1970) 321
photophosphorylation by different classes of	4 (1969) 125
transport of inorganic phosphate, 3-phosphoglycerate and dihydroxyacetonephosphate and dicarboxylates across the inner membrane	10 (1970) 143
uncoupling by dinitrophenol and valinomycin	1 (1968) 21
unspecific permeation and specific uptake of substances in valinomycin-stimulated post-illumination ATP synthesis	7 (1970) 139
wheat, DNA isolated by a new "laceration technique"	9 (1970) 313
Cholecalciferol isolation and characterisation from higher plants	3 (1969) 89
Cholesterol	1 (1968) 59
conversion into bile acids in bile fistula rats	1 (1968) 219
hydroxylated derivatives in the steroid monosulphate fraction from meconium from infants and newborns	3 (1969) 129
of tobacco <i>Nicotiana tabacum</i> , incorporation of 3- ³ H-demosteryl propionate	3 (1969) 257
Cholesterylesters, effect on synthesis on aminoacyl-tRNA	9 (1970) 161
Cholic acid, α -hydroxylation of by <i>Clostridium bifermentans</i> and <i>sordellii</i>	6 (1970) 131
Cholic acid microbiological degradation product; 5-methyl-4-oxo-octane-1,8-dioic acid	4 (1969) 288
Choline inhibition on uptake of 5-hydroxytryptamine by blood platelets	3 (1969) 103
Chondroitin sulphate-protein in Kurloff cells from guinea-pig spleens	4 (1969) 343
Chondroitin sulphate protein synthesis, inhibition by cycloheximide	2 (1969) 351
Chondroitin-4-sulphate synthesis in pig thyroid cartilage slices <i>in vitro</i> , effect of temperature	9 (1970) 145
Chorismate mutase from <i>Claviceps paspali</i> , affinity chromatography of	6 (1970) 232
Chorismic acid, intermediate in the formation of 4-aminobenzoic acid from chorismic acid in <i>Aerobacter aerogenes</i>	3 (1969) 319
Chromatin	
acidic proteins, effect on RNA-histone binding	8 (1970) 133
electrophoretic determination of different acidic proteins of by electrophoresis	5 (1969) 37
rabbit, role of non-histone components in determining organ specificity	9 (1970) 242
Chromatophores from <i>Rhodopseudomonas spheroides</i> , high-energy state	4 (1969) 185
Chromatophores of <i>Rhodospirillum rubrum</i> , partial resolution of energy-linked reactions in	3 (1969) 27
Chromogenic substrate for neuraminidases	3 (1969) 72
Chymotrypsin	
disulphide bond reactivity, comparison with chymotrypsinogen	6 (1970) 17
dolphin myoglobin digests, structure of peptides	1 (1968) 108
a flash-induced reaction of a synthetic light-sensitive substrate with	8 (1970) 173
hydrolysis of L-3-benzyl-2,5-diketomorpholine	9 (1970) 64
hydrolysis of 4- <i>cis</i> -benzylidene-2-phenyloxazolin-5-one, evidence for covalent non-productive binding	5 (1969) 63
inhibition (reversible) by <i>n</i> -alkylboronic acids	7 (1970) 23
inhibitors (competitive), interaction with active centre	7 (1970) 20
specificity	8 (1970) 261
substrate	
activation by non-covalent binding in the active site	9 (1970) 67
dipeptide	8 (1970) 257
divalent	8 (1970) 257
Chymotrypsinogen	
carboxyl groups, reactivity	4 (1969) 203
disulphide bonds, comparison of reactivity with chymotrypsin	6 (1970) 17
infra-red investigation of the structural transitions	3 (1969) 195
porcine	1 (1968) 117
Circular dichroism	
actinomycin D interaction with nucleosides	3 (1969) 330
of bilirubin-human serum complexes in aqueous solution	9 (1970) 53
of <i>E. coli</i> ribosomal proteins	8 (1970) 197
Citrate	
conversion to isocitrate and accumulation in rat liver mitochondria	2 (1969) 259
formation in rat liver mitochondria, in response to calcium ions	3 (1969) 190
synthesis, regulation by α -oxoglutarate	3 (1969) 265
Citrulline degradation in <i>Chlamydomonas reinhardtii</i>	7 (1970) 274
<i>Claviceps paspali</i> , affinity chromatography of chlorismate mutase from	6 (1970) 232
<i>Clostridium bifermentans</i> and <i>sordellii</i> , α -dehydroxylation of cholic acid by	6 (1970) 131
<i>Clostridium butyricum</i> , fatty acid oxidation in	2 (1969) 213

<i>Clostridium cylindrosporium</i> , EDTA and Mg on (R)-citrate synthesis	4 (1969) 72
<i>Clostridium kluyveri</i>	
glyoxylate inhibition of pyruvate synthesis	9 (1970) 271
hydrogen (ferredoxin-mediated) formation from NADPH in a cell-free system of	3 (1969) 144
hydrogen formation from NADH	4 (1969) 108
one-carbon units, synthesis from CO ₂ via a ferredoxin-dependent monocarboxylic acid cycle	8 (1970) 304
stereochemistry of	1 (1968) 74
CoA-SS-glutathione reductase, NADPH-dependent, from yeast and rat liver, active site	7 (1970) 227
Coat protein of bacteriophage fd mutants	7 (1970) 83
Cobalamins, inability of thiols to reduce them in the absence of metal ions	1 (1968) 272
Cobalt	
deposition in rat liver erythrocytes and cardiac tissues as evidence for the biosynthesis of cobalt porphyrins	6 (1970) 270
of haem and globin synthesis in reticulocytes	9 (1970) 61
incorporation into yeast alcohol dehydrogenase	1 (1968) 133
on serum protein electrophoretic patterns in mice	9 (1970) 277
Coenzyme A, fast oxidation by diamine	10 (1970) 343
Collagen	
calf skin	
cyanogen bromide peptides from $\alpha 2$ -chain, characterisation of	9 (1970) 229
fluorescence, properties of tyrosine residues and another fluorescent element in	5 (1969) 187
soluble, differences between $\alpha 1$ and $\alpha 3$ chains	1 (1968) 233
soluble, electron microscopic method of ordering the cyanogen bromide peptides of the $\alpha 1$ chain	1 (1968) 230
proline hydroxylation in chick embryos	2 (1969) 173
rat skin, 2 antigenic determinants in C-terminal region	9 (1970) 11
rat skin, restricted reactivity of side-chain amino groups towards formaldehyde	9 (1970) 49
Colostrum, cow, see <i>Cow colostrum</i>	
Computer programme for the determination of kinetic parameters from sigmoidal steady state kinetics	8 (1970) 178
Computing techniques in biochemistry, an account of FEBS Summer School Edinburgh, 24 August-7 September 1968	2 (1969) Suppl. 1-71
Aims, applications and achievements. An introductory essay, J.G.Reich	S3
Construction of biochemical computer models, D.Garfinkel	S9
Computer simulation of stochastic processes through model-sampling (Monte Carlo) techniques, C.W. Sheppard	S14
The numerical solution of stiff differential equations, G.J.Cooper	S22
Steady states of general multi-enzyme networks and their associated properties, Computational approaches, J.A.Burns	S30
Observations on programs to estimate the parameters of enzyme kinetics, W.R.Gardiner, J.H.Ottaway	S34
A survey of non-linear optimization techniques, W.H.Swann	S39
Kinetic modeling in physiology, M.Berman	S56
An introduction to hybrid computers and their application to optimization problems, B.Girling	S58
Some experiences in the estimation of parameters in non-linear differential equations, J.G.P.Barnes	S63
Concanavalin A, beta structure	9 (1970) 78
Concanavalin A, lack of interaction with heparin	9 (1970) 281
Cooperative helix coil transitions in half molecules of phenylalanine-specific tRNA from yeast	5 (1969) 15
Copper	
binding to alkaline phosphatases of <i>E.coli</i>	7 (1970) 147
co-crystallisation of tRNA ^{Ser} in water-dioxane	2 (1968) 112
reduction by substrate in diamine oxidase	2 (1969) 182
requirement of fungal laccase	1 (1968) 50
urate oxidation by	2 (1969) 339
Corneas from embryos, non-sulphated glucosaminoglycans	6 (1970) 221
Corpus luteum, bovine, adenyl cyclase stimulation by prostaglandin E ₂	7 (1970) 283
Corticosteroid, synthetic, effect on liver RNA, heart RNase and RNase-inhibitor activities in rats	4 (1969) 37
Cortisol	
induced tyrosine aminotransferase in rat liver, inhibition by α -amanitin	9 (1970) 103
on RNA polymerase of rat liver nuclei	1 (1968) 275
stimulation of rat liver nuclei <i>in vitro</i>	3 (1969) 99
treated rats, RNA synthesis as detected by DNA hybridisation	8 (1970) 61
<i>Corynebacterium simplex</i> cells grown on hydrocarbons, relationship between vitamin B ₁₂ and ratio of mono-unsaturated to methyl-branched fatty acids	5 (1969) 343
Counter transport between sugars and amino acids in rabbit ileum	8 (1970) 153
Cow carotid myosin, subfragment I	10 (1970) 194
Cow colostrum trypsin inhibitor, lysine 18 in active centre, role of	8 (1970) 84
lysine modification, effect on antitryptic and antichymotryptic activity	8 (1970) 274
primary structure	4 (1969) 155

Crayfish, <i>Astacus leptodactylus</i> , trypsin-like protease of with serine at active centre	6 (1970) 229
Creatine kinase and adenylate kinase equilibria, calculation of substrate and feedback signal levels in muscle	7 (1970) 239
Creatine kinase, ox stomach, isolation of isozyme BB	10 (1970) 57
<i>Crithidia luciliae</i> , use of hydroxyurea for obtaining synchronised cultures	5 (1969) 291
Crown-gall tumours, cross reacting <i>Agrobacterium tumefaciens</i> antigens	3 (1969) 173
Crown-gall tumours, mitomycin C on induction of	3 (1969) 115
<i>Cryptococcus laurentii</i> , biosynthesis of oligosaccharide components of cell wall	5 (1969) 145
Cyanogen bromide peptides of $\alpha 1$ chain of collagen, electron microscopy of	1 (1968) 230
3-Cyanopyridine AD ⁺ , analogue of NAD ⁺	7 (1970) 199
Cyclic AMP	
activation of rat liver ribosomal proteins	10 (1970) 105
antagonist of catabolite repression in <i>E. coli</i>	2 (1968) 57
microdetermination	8 (1970) 289
Cyclohexane hydroxylation by rat liver microsomes, photochemical action spectrum of carbon monoxide-inhibition	4 (1969) 99
Cyclohexane-undecanoic acid in human milk fat, identification by gas chromatography-mass spectrometry	2 (1969) 255
Cycloheximide	
on amino acid in incorporation into mitochondria	
flight muscle, <i>Locusta migratoria</i>	2 (1969) 177
<i>Neurospora crassa</i> , <i>in vivo</i>	4 (1969) 243
rat liver	9 (1970) 232
on chondroitin sulphate protein synthesis	2 (1969) 351
on puromycin reaction with polysome-bound peptidyl-tRNA in rat liver	8 (1970) 249
Cyclopenten synthesis in <i>Penicillium cyclopium</i> Westling	3 (1969) 292
Cystathione synthesis from homoserine and cysteine by rat liver homoserine dehydratase	4 (1969) 231
Cysteine	
glutathione mixed disulphide reduction on rat liver	7 (1970) 26
and homoserine, cystathione synthesis from by rat liver homoserine dehydratase	4 (1969) 231
reactive residues in acetoacetyl-CoA thiolase, amino acid sequence round	1 (1968) 150
Cytidine deaminase, <i>Bacillus cereus</i> , regulation of	10 (1970) 67
Cytidylyl-(3', 5')-adenosine as substrate for ribonuclease assay	1 (1968) 29
Cytochrome b_2 thermal stability in hare	4 (1969) 311
Cytochrome <i>c</i>	
complex formation by	3 (1969) 242
horse heart	
methionine 80 as haem ligand	6 (1970) 267
nitration with tetranitromethane	4 (1969) 269
redox potential of; ion binding and oxidation state as linked functions	10 (1970) 179
thermodynamics of redox reactions of 5 different species	6 (1970) 278
and non-haem iron proteins of <i>Azobacter</i> , effect on activity and oxygen sensitivity of <i>Azobacter</i>	
nitrogenase	8 (1970) 281
organic solvents on	3 (1969) 338
rat liver distribution	2 (1968) 105
synthesis by endoplasmic reticulum	1 (1968) 38
synthesis in liver slices, stimulation by haemin	7 (1970) 248
Cytochrome <i>c</i> '3 from <i>Desulphovibrio gigas</i> , structure of	5 (1969) 115
Cytochrome oxidase activity of <i>Halobacterium cutirubrum</i> , effect of Na ⁺ and K ⁺	7 (1970) 301
Cytochrome oxidase in cytoplasmic mutant of <i>Neurospora</i>	4 (1969) 193
Cytochrome <i>P</i> -450	
in adrenal cortex mitochondria, two forms	9 (1970) 41
in adrenal cortex mitochondrial membranes, distribution	5 (1969) 135
in liver and adrenal microsomes, substrate binding	6 (1970) 249
in liver microsomes rapid loss caused by 2-allyl-2-isopropylacetamide	6 (1970) 343
reduction kinetics and content in haemoglobin-free perfused rat liver	2 (1969) 167
Cytochromes, rat ganglion, redox transitions	8 (1970) 297
Dehydrogenases, use of gel chromatography for differentiation between	2 (1969) 163
3- ³ H-Demosteryl propionate incorporation into cholesterol and campesterol of the leaves of tobacco <i>Nicotiana tabacum</i>	3 (1969) 257
O-Demethylase in <i>Pseudomonas aeruginosa</i> , stoichiometry of	8 (1970) 101
Density gradient equilibrium methods for blood group specific glycogens	6 (1970) 117
Deoxyadenosine diphosphate as substrate for polynucleotide phosphorylase from <i>E. coli</i>	4 (1969) 79
Deoxyadenosine stimulation of thymidylate kinase and deoxycytidylate deaminase in Chang cells	2 (1969) 345
Deoxycytidylate deaminase of Chang cells, stimulation by deoxyadenosine	2 (1969) 345

Deoxyhaemoglobin, degree of association of non-ligand and liganded forms in <i>Lampetra fluviatilis</i>	7 (1970) 177
Deoxyhaemoglobin, reaction with ATP	7 (1970) 351
Desmethylmenaquinone C-methylation, specificity of enzymic system of <i>Mycobacterium phlei</i>	2 (1969) 336
Desmethylmenaquinol derivative from green photosynthetic bacteria	6 (1970) 40
<i>Desulfovibrio gigas</i> , structure of cytochrome c_3 in	5 (1969) 115
Dextrin-1,6-glucosidase/dextrin transglycolase system, branching action	7 (1970) 251
Diabetes, effect on peptidyl-tRNA and peptidyl transferase of skeletal muscle ribosomes	10 (1970) 35
Diamine,	
inhibition of <i>E. coli</i> RNA synthesis	9 (1970) 100
oxidase, copper reduction by substrate	2 (1969) 182
oxidase reaction, evidence for a pig-pong mechanism	4 (1969) 31
oxidation of a variety of natural electron donors	10 (1970) 343
LL-Diaminopimelic acid containing murein of <i>Propionibacterium petersonii</i> , glycine crosslinkages in	1 (1968) 287
Diaphragm, rat, isolated, effect of insulin on adenylate kinase and glycolysis in absence of added glucose	9 (1970) 317
Diaphragm, UDP-glucose isolation from	1 (1968) 291
Diazepam, interaction with 5-hydroxytryptamine	3 (1969) 97
Diazoacetylnorleucine methyl ester as inhibitor for cathepsin D	6 (1970) 312
Diazoacetylnorleucine methyl ester, inhibition of cathepsin E	9 (1970) 348
Diazonium-1-H-tetrazole, modification of active histidines of aminopeptidase M by	4 (1969) 265
Dibutyryl-3',5'-cyclic adenosine monophosphate	
on fatty acid synthesis in mouse liver fractions	3 (1969) 125
on lipogenesis and neoglucogenesis of mouse	4 (1969) 213
on rat liver lipase	10 (1970) 301
C ₄ -Dicarboxylic acids, genetic control of uptake by <i>E. coli</i>	3 (1969) 93
Dicyclohexylcarbodiimide, energy-dependent interaction with mitochondrial membrane	7 (1970) 135
Dicyclohexylcarbodiimide inhibition of Na ⁺ ,K ⁺ -stimulated ATPase	5 (1969) 285
Digitonin-treated mitochondrial or chloroplast particles, see <i>Mitochondria</i> or <i>Chloroplasts</i>	
20,22-Dihydroxycholesterol identification from the mono- and disulphate fractions of human meconium	5 (1969) 99
Dimer formation of ribosomal and viral RNA in the presence of formaldehyde	7 (1970) 55
5,6-Dimethylbenzimidazole moiety of vitamin B ₁₂ , riboflavin as precursor	6 (1970) 187
5,6-Dimethylbenzimidazolyl cobamide coenzyme, isolation from <i>Rhodospseudomonas spheroides</i>	10 (1970) 249
Dinitrophenol	
on mitochondrial ATPase	1 (1968) 247
uncoupler in isolated chloroplasts	1 (1968) 21
uptake by anaerobic yeast cells and its relation to the energy transduction by these cells	1 (1968) 252
Dio-9, action on photophosphorylation	3 (1969) 247
Diphenylamine, increased cyclic photophosphorylation of <i>Anabaena variabilis</i> cells grown in the presence of	10 (1970) 253
Diphenylamine-inhibited cultures of <i>Rhodospirillum rubrum</i> , occurrence of hydroxy derivatives of phytoene and phytofluene	6 (1970) 334
2,3-Diphosphoglycerate binding to haemoglobin, isolation of peptides	5 (1969) 7
2,3-Diphosphoglycerate binding to normal and abnormal oxyhaemoglobin	8 (1970) 37
Diphosphoglyceromutase, familial deficiency, influence on oxygen affinity curves of haemoglobin	9 (1970) 37
Diptera haemocytes, L-dopa decarboxylase in	7 (1970) 263
Distamycin A	
complex with calf thymus DNA	10 (1970) 175
nucleic acid complexes, optical rotatory dispersion properties	10 (1970) 339
on the structure and template activity of DNA-RNA-polymerase	7 (1970) 290
on template activity of DNA in a DNA polymerase system	4 (1969) 355
Disulphide bridges of apamin	1 (1968) 111
Disulphide exchange enzyme, use for measuring polysome-microsomal membrane binding	4 (1969) 103
2,4-Dithiouridine, structural and spectral properties	10 (1970) 41
Diurnal variation of leucine incorporation into rat liver protein	10 (1970) 78
DNA	
acridine complexes studied by ESR, light-induced free radicals in	4 (1969) 227
<i>Agrobacterium tumefaciens</i> , release into tomato cells and the transcription of host cell DNA	8 (1970) 349
<i>Anacystis nidulans</i> -T ₄ , differential transcription by RNA polymerase	3 (1969) 76
of <i>Bacillus subtilis</i> , heat denaturation of	2 (1969) 236
breakage in the region bound to RNA polymerase, <i>in vitro</i>	2 (1968) 53
calf thymus, studies of complex with distamycin A	10 (1970) 175
conformational changes in the region of the ends at premelting temperatures	7 (1970) 38
-dependent RNA polymerase, see <i>RNA polymerase</i>	
determination in biological materials by gas chromatography, and isotopic dilution, analysis of thymidine content	6 (1970) 141

distamycin A and netropsin complexes, optical rotational dispersion of	10 (1970) 339
<i>E. coli</i> , release into tomato cells and the transcription of host cell DNA	8 (1970) 349
<i>E. coli</i> -T4, differential transcription by RNA polymerase	3 (1969) 76
from <i>Euglena gracilis</i> chloroplasts	8 (1970) 25
methylation by <i>N</i> -trideuteriomethyl- <i>N</i> ⁷ -nitro- <i>N</i> -nitrosoguanine	9 (1970) 175
polymerase	8 (1970) 116
distamycin A on	4 (1969) 355
from <i>E. coli</i> , proteolytic cleavage into an exonuclease and a polymerase unit	6 (1970) 25
phenylethanol on, in regenerating rat liver	4 (1969) 13
rat liver nuclei, role and distribution	10 (1970) 113
and psoralen, inter-strand crosslinkages occurring in the photoreaction between	9 (1970) 121
radicals induced by radiation, covalent binding of an organic nitroxide free radical	8 (1970) 33
from rat liver and hepatoma mitochondria and nuclei, zonal centrifugation studies of labelling	
patterns	5 (1969) 180
of rat liver, template activity of rats fed with malondialdehyde	3 (1969) 205
-RNA complex from <i>Euglena gracilis</i> , isolation of	7 (1970) 217
<i>Saccharomyces cerevisiae</i> , incorporation of exogenous TMP	8 (1970) 113
5- ³ H-uridine incorporation	2 (1968) 91
of virus from <i>Galleria mellonella</i>	6 (1970) 13
in wheat chloroplasts isolated by a new "laceration technique"	3 (1969) 89
DNase	
coupled covalently to porous glass	8 (1970) 253
<i>E. coli</i> , influence of phenylethanol	8 (1970) 116
from T5-infected bacteria	5 (1969) 214
from <i>Verongia aerophoba</i>	5 (1969) 165
Dolphin myoglobin chymotrypsin digests, structure of peptides	1 (1968) 108
L-Dopa decarboxylase in the haemocytes of diptera	7 (1970) 263
Echinomycin, effect on RNA synthesis in Ehrlich ascites tumour cells	5 (1969) 73
<i>E. coli</i>	
acylglycoses	8 (1970) 322
alkaline phosphatase, ⁸¹ Br and ³⁵ Cl NMR studies	9 (1970) 189
alkaline phosphatase, specific binding of Cu(II)	7 (1970) 147
aminoacyl-tRNA synthesis, effect of lipids	6 (1970) 86
aminoacyl-tRNA synthetases, formation	9 (1970) 252
L-asparaginase, purification by specific adsorption and desorption	7 (1970) 294
5-azacytidine on ribosomal synthesis	1 (1968) 55
C4-dicarboxylic acids, genetic control of uptake	3 (1969) 93
cyclic AMP as an antagonist of catabolite repression	2 (1968) 57
DNA and RNA release into tomato cells and the transcription of host cell DNA	8 (1970) 349
DNA polymerase, proteolytic cleavage into an exonuclease and polymerase unit	6 (1970) 25
DNase and DNA polymerase, effect of phenylethanol	8 (1970) 116
fatty acid oxidation	2 (1969) 213
β-galactoside treatment, site of ATP action	4 (1969) 69
glutamine synthetase, independent genetic regulation and inactivating (adenylating) enzyme	3 (1969) 263
homogenate, ultrafilterable peptides	6 (1970) 321
lac operon, effect of lac promoter deletion	10 (1970) 156
lac permease sulphydryl in membrane of	5 (1969) 173
levellorphan inhibition of viral RNA synthesis	6 (1970) 190
lipids on aminoacyl-tRNA synthesis	6 (1970) 86
lipopolysaccharide degradation studies	1 (1968) 311
methionine synthesis, reversibility of	4 (1969) 316
mutants, alternative requirements for pyridoxine or isoleucine in	5 (1969) 225
peptides, ultrafilterable from homogenate	6 (1970) 321
phosphofructokinase, tetrameric structure of	2 (1968) 109
polymyxin B-treated, release of periplasmic RNase into the medium	8 (1970) 49
polynucleotide phosphorylase, dADP as substrate	4 (1969) 79
polynucleotide phosphorylase, immunological characterisation	2 (1969) 321
polypeptide synthesis, inhibition by influenza viral protein	7 (1970) 201
polysome metabolism, effect of chloramphenicol and fusidic acid on	3 (1969) 34
poly-U-programmed cell-free extract, active complex formation	7 (1970) 217
pyruvate decarboxylase, subunit structure of	6 (1970) 257
RC ^{Str} and RC ^{rel} isogenic strains, polysome-ribosome distribution	6 (1970) 5
ribosomes, see <i>Ribosomes, E. coli</i>	
rifampicin resistant RNA polymerase altered in the β-subunit	5 (1969) 104
RNA polymerase, see <i>RNA polymerase, E. coli</i>	
RNA synthesis, inhibition by diamine	9 (1970) 100

L-serine and L-threonine deaminases in	6 (1970)	73
sugar accumulation, regulation of	3 (1969)	53
TDP-glucose and TDP-rhamnose in	7 (1970)	314
T-even phage lysozyme, isolation of inhibitor	4 (1969)	50
T4-infected, initiation factor B (F3)	9 (1970)	213, 218
T4-infected, differential transcription by RNA polymerase of phage DNA	3 (1969)	76
transfer RNA, see <i>Transfer RNA, E. coli</i>		
triose phosphate isomerase, role in gluconeogenesis	4 (1969)	19
T4 UAG suppressor in	6 (1970)	99
UMP pyrophosphorylase from	5 (1969)	211
EDTA effect on (R)-citrate synthesis in <i>Clostridium kluyveri</i> and <i>Clostridium cylindrosporum</i>	4 (1969)	72
Eel electroplax, purification of the membrane fragments from the non-excitable surface	8 (1970)	145
Egg-white lysozyme		
fluorescence studies of binding dynamics of saccharides	10 (1970)	241
immunological studies, formylation of tryptophan residues	5 (1969)	324
spectrofluorometric study of tryptophan 108	7 (1970)	171
Ehrlich ascites cells, effect of echinomycin and olivomycin on RNA synthesis	5 (1969)	73
Ehrlich ascites cells, influence of spermidine and histones on nuclear nucleosidase with ADP-ribose transferase activity	1 (1968)	295
Einstein's photochemical law in photosynthesis	3 (1969)	221
Electrogenic tissue, irreversible binding of TDF to acetylcholinesterase in	2 (1969)	224
Electron magnetic resonance in biochemistry (Review letter)	5 (1969)	1
Electron microscopic method of ordering the cyanogen bromide peptides of $\alpha 1$ chain of collagen	1 (1968)	230
Electron microscopy of inner and outer membranes of rat liver mitochondria	6 (1970)	105
Electron paramagnetic resonance spectra, interrelationships between mitochondrial energy conservation site I and piericidin A sensitivity in <i>Torulopsis utilis</i>	5 (1969)	207
Electron spin resonance		
of DNA acridine complexes, light-induced free radicals in	4 (1969)	227
of flavin cationic and neutral radicals in unpolar solvents	3 (1969)	315
of methyl hydrogen peroxide compound II of catalase	9 (1970)	71
Elongation factors		
human lymphatic tissue	10 (1970)	121
from <i>Neurospora crassa</i> mitochondria	10 (1970)	25
Embryo		
chick		
collagen proline hydroxylation in	2 (1969)	173
liver, cell cultures, effect of inducer substances on porphyrin synthesis	2 (1968)	127
liver, histopathological effects of aflatoxin B ₁ palmotoxins B ₀ and G ₀	10 (1970)	198
pancreas, effect of hydrocortisone on the accumulation of amylase by	2 (1969)	323
phosvitin kinase from	1 (1968)	244
ribosomal aggregates after exposure to low temperature	6 (1970)	128
cornea, non-sulphated glucosaminoglycan in	6 (1970)	221
liver, free nucleotides during ontogenesis	7 (1970)	255
Encephalitogen degradation by purified brain acid proteinase	1 (1968)	191
Encephalitogenic basic protein from sciatic nerve	4 (1969)	9
Encephalitogenic basic, protein purification on sulphoethyl-Sephadex	7 (1970)	317
Endoplasmic reticulum, mitochondrial cytochrome c synthesis	1 (1968)	38
Endoplasmic reticulum, rat liver, cytoplasmic location of certain small molecules after their metabolism	10 (1970)	306
Endor studies on the covalently bound flavin at the active centre of succinate dehydrogenase	5 (1969)	237
Enzyme		
activity, structural aspects of (Meeting report)	2 (1969)	201
catalysis, mechanism (Meeting report)	10 (1970)	209
equilibria, mathematical treatment	1 (1968)	100
kinetic models, parameter estimation (Review letter)	9 (1970)	245
kinetics, computer programme for the determination of kinetic parameters from sigmoidal steady state kinetics	8 (1970)	178
Erythrocyte		
bovine membranes and lipids, 1-anilo-8-naphthalene sulphonic acid interaction	6 (1970)	245
bovine membrane proteins, mild procedure for fractionation	8 (1970)	341
chick, uroporphyrinogen decarboxylase from	5 (1969)	149
developing chick, quantitative variation in histones	2 (1969)	248
human		
AMP pyrophosphorylase	1 (1968)	179
glucose-6-phosphate dehydrogenase from	1 (1968)	147, 176
human membranes, interaction of 1-anilino-8-naphthalene sulphonate with	3 (1969)	150
rat, biosynthesis of cobalt porphyrins	6 (1970)	270
<i>Escherichia coli</i> , see <i>E. coli</i>		

Eserine, see <i>Physostigmine</i>	
Ethanol on adenine nucleotide concentrations in rat liver	2 (1968) 121
Ethanol toxicity, inhibition by lysine orotate	7 (1970) 291
Ethidium, inhibitor of mitochondriogenesis in regenerating rat liver	7 (1970) 347
Euflavin inhibitor of mitochondriogenesis in regenerating rat liver	7 (1970) 347
<i>Euglena gracilis</i> ,	
cytoplasmic ribosomes	10 (1970) 149
chloroplasts, see <i>Chloroplasts, Euglena gracilis</i>	
DNA-RNA complex	7 (1970) 217
polyglycerophospholipids from	7 (1970) 251
Excimer fluorescence of tryptophan, tyrosine and D-glyceraldehyde-3-phosphate dehydrogenase	7 (1970) 280
Excitable membranes labelled by fluorescent probe, properties of	7 (1970) 13
Fabry's disease, absence from plasma of galactosylgalactosylglucosylceramide: galactosyl hydrolase	7 (1970) 180
FAD, structural and functional role in NADH-nitrate reducing system in <i>Chlorella</i>	9 (1970) 157
Fasting on isolation of rat liver polysomes	6 (1970) 114
Fat body of locust, stearate desaturation by microsomes of	2 (1969) 286
Fatty acids	
of <i>Corynebacterium simplex</i> cells grown of hydrocarbons, relationship between ratio of mono-unsaturated: methyl-branched fatty acids and vitamin B ₁₂	5 (1969) 343
incorporation into the inner and outer membranes of rat liver mitochondria	3 (1969) 121
of myelin phospholipids	10 (1970) 317
oxidation and ATP-dependent fatty acid thiokinase, effect of atractylate and AMP	3 (1969) 279
oxidation in <i>E. coli</i> and <i>Clostridium butyricum</i>	2 (1969) 213
of rat liver microsomes, succinate incorporation into <i>in vivo</i>	7 (1970) 32
of <i>Spirodela oligorrhiza</i> , normal and glucose rich cultures of	5 (1969) 335
synthesis	
in the cell sap and mitochondria of rat brown adipose tissue	6 (1970) 241
of liver fractions <i>in vivo</i>	2 (1969) 289
in mouse liver fractions, action of dibutyryl cyclic AMP and insulin	3 (1969) 125
in rat white adipose tissue, <i>in vivo</i> effect of insulin	5 (1969) 351
from yeast, dissociation and reconstitution of the stable multienzyme complex	5 (1969) 45
FEBS News	1 (1968) 122; 2 (1969) 270; 3 (1969) 227; 4 (1969) 129; 5 (1969) 171; 7 (1970) 304; 9 (1970) 359
Ferredoxin	
dependent monocarboxylic acid cycle in <i>Clostridium kluyveri</i> , synthesis of one-carbon units from CO ₂	8 (1970) 304
hydrogen peroxide production by autooxidation	10 (1970) 21
mediated hydrogen formation from NADPH in a cell-free system of <i>Clostridium kluyveri</i>	3 (1969) 144
Ferritin content of free ribosome fraction of rat liver	1 (1968) 308
Ferrochelatase in wild type and cytoplasmic mutants of <i>Neurospora crassa</i>	5 (1969) 28
Fetal (human) mineralising tissues, alkaline phosphatase-like enzymes derived from	3 (1969) 153
Fibrinogen evolutionary constancy and primary structure in $\alpha(A)$ -chain fragment of	7 (1970) 321
Fibrinogen, human, N-terminal amino acid sequence of intact	7 (1970) 143
Fibroin synthesis in silkgland of <i>Bombyx mori</i> , functional adaptation of tRNAs	7 (1970) 327
Ficin-catalysed hydrolysis of 6-nitrophenylhippurate	4 (1969) 299
Flavin neutral and cationic radicals in unpolar solvents, optical and ESR spectra	3 (1969) 315
Flavins and flavoproteins, chemistry and molecular biology of (Review letter)	8 (1970) 69
Flavocoenzyme of succinate dehydrogenase, structure of	3 (1969) 37
Flavocoenzymes, photoreduction by pyruvic acid	1 (1968) 335
Flight muscle of house fly mitochondria, formation of acetate from pyruvate	10 (1970) 292
Flight muscle of <i>Locusta migratoria</i> mitochondria, amino acid incorporation in the presence of cycloheximide	2 (1969) 177
Fluorescent probe	
1-anilino-8-naphthalene sulphonate, see 1-Anilino-8-naphthalene sulphonate	
for membrane lipids, retinol	9 (1970) 287
properties of excitable membranes labelled by	7 (1970) 13
for structural state determination of mitochondrial membrane fragments	4 (1969) 181
Fluorochrome, membrane bound, local anaesthetic induced changes; link between ion uptake and membrane structure	3 (1969) 10
1-Fluoro-2,14-dinitrobenzene used in assay of cell free polypeptide synthesis	5 (1969) 60
5-Fluoro-orotate labelled, incorporation into non-ribosomal cytoplasmic RNA of rat liver	6 (1970) 206
Formaldehyde, reactivity of collagen side-chain amino groups towards	9 (1970) 49
N-Formyl-D-neuraminic acid, effect on the specificity of neuraminidase	4 (1969) 335
N-Formylmethionyl-tRNA, see tRNA, N-formylmethionyl	
Formyltetrahydrofolate synthetase in <i>E. coli</i> , inhibition by 6-chloro-8-aza-9-cyclopentylpurine	7 (1970) 119
Frog	
haemoglobin, see <i>Haemoglobin, Rana esculenta</i>	
muscle actin-bound ADP, exchange during activity	5 (1969) 41
<i>Rana esculenta</i> , see <i>Haemoglobin, Rana esculenta</i>	

Fructose-1,6-diphosphatase, divalent cations control	10 (1970) 33
role in regulation of glycolysis in skeletal muscle	7 (1970) 195
UV light on catalytic and allosteric properties of	4 (1969) 93
Fructose-1-phosphate activation of rat liver pyruvate kinase	6 (1970) 43
Fucoidan hydrolysis by abalone liver α -L-fucosidase	9 (1970) 45
α -L-Fucosidase of abalone liver, fucoidan hydrolysis	9 (1970) 45
Fungal laccase, requirement of non-blue copper (II) for activity	1 (1968) 50
Furocoumarins, photooxidation of nucleic acids by	10 (1970) 29
Fusidic acid on polysome metabolism in <i>E. coli</i>	3 (1969) 34
Galactolipids in normal and glucose rich cultures of <i>Spirodela oligorrhiza</i>	5 (1969) 335
Galactosamine, changes in uridine nucleotides during liver perfusion with	4 (1969) 278
Galactose toxicity in the chick	5 (1969) 121
β -Galactoside transport in <i>E. coli</i> , site of ATP action	4 (1969) 69
Galactosylceramyl transferase, see <i>UDP galactose:ceramide galactosyl transferase</i>	
Galactosylgalactosylglucosylceramide:galactosyl hydrolase in normal human plasma and its absence in patients with Fabry's disease	7 (1970) 180
<i>Galleria mellonella</i> , DNA of virus from	6 (1970) 13
Gamma globulin, see <i>Immunoglobulin</i>	
Ganglion, rat, redox transitions of cytochromes and pyridine nucleotides	8 (1970) 297
Gangliosides in developing rat brain	9 (1970) 267
Gas chromatography for determination of configuration of 2-hydroxy acids from brain cerebroside	5 (1969) 192
Gas chromatography-mass spectrometry, analysis of human milk fat	2 (1969) 255
Gel chromatographic separation of oligosaccharides at elevated temperatures	2 (1968) 74
Gel chromatography, use for differentiation between dehydrogenases	2 (1969) 163
Gene product P23, modification according to its use as subunit of either normal capsids of phage T4 or of polyheads	8 (1970) 140
Germ-free mitochondria (Review letter)	1 (1968) 203
Globin synthesis in reticulocytes, effect of cobalt	9 (1970) 61
Glomeruli, countercurrent distribution of supernatant of	9 (1970) 5
Glucagon, effect on state of lysosomal enzymes in perfused rat liver	10 (1970) 215
Glucan fraction (alkali-soluble) from cell walls of yeast <i>Saccharomyces carlsbergensis</i>	1 (1968) 67
β -Glucans synthesised enzymically from UDPglucose in wheat seedling	7 (1970) 224
Glucans from yeast cell wall, structures of two	4 (1969) 122
Glucoamylase, crystalline, incomplete conversion of glycogen and starch by	9 (1970) 85
Glucocorticosteroid, synthetic, (triamcinolone diacetate), effect on rat liver lipase	10 (1970) 301
Glucokinase, distribution between parenchymal and non-parenchymal cells of rat liver	3 (1969) 68
Glucokinase of rat liver microsomes, a possible regulator of glycolysis	8 (1970) 122
δ^2 and 6^3 - α -Glucomalto-oligosaccharides, the effect of α and β -amylases on,	6 (1970) 182
Gluconeogenesis control by divalent cations	10 (1970) 33
from L-lactate-2-T- 14 C in perfused rat liver	4 (1969) 33, 47
in <i>E. coli</i> , role of triose phosphate isomerase	4 (1969) 19
regulation of by switch mechanism in rat liver	6 (1970) 171
Glucosamine phosphate isolation from <i>Micromonospora</i>	7 (1970) 77
Glucosaminoglycan, non-sulphated, in embryonic cornea	6 (1970) 221
Glucose conversion to glycogen, pathway in liver homogenate	3 (1969) 41
metabolism in liver, effect of insulin and diet on steady state concentrations of intermediates of pentose phosphate pathway	1 (1968) 227
oxidation in explants of rabbit mammary glands, effect of prolactin	9 (1970) 177
repression of theophylline-induced tyrosine aminotransferase in livers of adrenalectomised rats	9 (1970) 105
stimulation of insulin synthesis by	10 (1970) 165
synthesis in rat kidney cell suspensions	3 (1969) 31
transport by rat small intestine, insulin deficiency on	2 (1969) 193
Glucose oxidase, preparation chemically attached to polystyrene and its use in automated analyses of glucose	9 (1970) 8
Glucose-6-phosphate dehydrogenase, human erythrocyte, isolation of protein involved in 6-phosphogluconate-induced inactivation	1 (1968) 176
Glucose-6-phosphate dehydrogenase from human erythrocytes, subunit structure and molecular weight of	1 (1968) 147
Glucose-6-phosphatase of microsomes, reactivation of CCl $_4$ -inhibition by phospholipids	3 (1969) 202
Glucose-6-phosphatase, quantitative dependence on phospholipids, effects of phospholipase C at 5 and 37 $^{\circ}$	10 (1970) 346
Glucose-6-phosphate as regulator of monosaccharide transport in baker's yeast	2 (1969) 333
7-O-(β -D-Glucosyl)-apigenin and 7-O-(β -D-glucosyl)-chrysoeriol, transfer of apiose to from UDP- apiose by an enzyme preparation from parsley	7 (1970) 164

Glucuronide synthesis, inhibition of by physiological metabolites in liver slices	6 (1970)	177
Glutamate biosynthesis in <i>Clostridium kluyveri</i> , unusual stereochemistry of	1 (1968)	74
Glutamate dehydrogenase, antagonistic homotropic interactions as possible explanation for coenzyme activation of	1 (1968)	349
Glutamate/oxoglutarate \times NH_4^+ ratio in guinea-pig liver, influence of alanine	9 (1970)	15
Glutaminase in rat liver, regulator significance of	1 (1968)	317
Glutamine synthetase in <i>E. coli</i> , independent genetic regulation and inactivating (adenylating) enzyme	3 (1969)	263
Glutaraldehyde oxidation by rat liver mitochondria	3 (1969)	112
Glutathione reductase from rat liver and yeast, active site of	7 (1970)	227
D-Glyceraldehyde-3-phosphate dehydrogenase		
concentration on reducibility of firmly bound NAD	2 (1968)	81
dehydrogenase excimer fluorescence	7 (1970)	280
in <i>Pseudomonas putida</i> , regulation	3 (1969)	65
reversible dinitrophenylation	8 (1970)	345
yeast		
inactivation by a bifunctional reagent	5 (1969)	153
saturation with NAD, X-ray small-angle scattering studies	4 (1969)	75
stereoselective reactivity of SH-groups	1 (1968)	25
Glycerolphosphate dehydrogenase system in muscle mitochondria, sensitivity to rotenone and ptericidin A	10 (1970)	109
Glycerol-1-phosphate oxidation in liver mitochondria of thyroxine treated rats, effect of succinate	5 (1969)	299
Glycerolphosphorylcholine in <i>Ascaris lumbricoides</i>	9 (1970)	351
Glycinin subunits, isolation by isoelectric focusing in urea-mercaptoethanol	4 (1969)	259
Glycogen		
incomplete conversion by crystalline glucoamylase	9 (1970)	85
in liver homogenate, pathway by which it is formed from glucose	3 (1969)	41
metabolism in insect flight muscle, activation of phosphorylase b kinase by Ca and P_i	7 (1970)	183
metabolism in perfused rat liver with long-chain fatty acids	2 (1969)	154
of muscle, dependence of hydrocortisone effect on insulin	4 (1969)	1
synthesis of rat liver microsomes, regulation by glucokinase	8 (1970)	122
synthetase kinase in muscle, effect of magnesium	5 (1969)	279
Glycogenolysis, anaerobic, in rat liver slices, effect of aerobic preincubation	6 (1970)	31
Glycolipid characterization in <i>Nocardia brasiliensis</i>	7 (1970)	64
Glycollate oxidising enzyme of algae	5 (1969)	341
N-Glycolyl muramic acid constituents of <i>Mycobacterium smegmatis</i> , identification by mass spectrometry	4 (1969)	87
Glycolysis		
in isolated rat diaphragm in absence of added glucose, effect of insulin	9 (1970)	317
regulation of by switch mechanism in rat liver	6 (1970)	171
in skeletal muscle, regulation by fructose-1,6-diphosphatase	7 (1970)	195
Glycoprotein:		
N-acetylglucosaminyl transferases in Simian virus	8 (1970)	29
<i>Aspergillus oryzae</i> , mannose incorporation into	6 (1970)	80
blood group specific, density gradient equilibrium methods	6 (1970)	117
hog submaxillary, effect of sialidase on blood group specificity of	8 (1970)	353
rat intestine	7 (1970)	86
ribosomal incorporation of hexosamine in mouse myeloma	8 (1970)	6
Glycosidic bonds in β -O-xylosyl-L-serine and β -O-xylosyl-L-threonine, hydrolysis of by enzyme preparations of <i>Helix pomatia</i>	1 (1968)	213
Glycyl peptidase in human serum and tissues	4 (1969)	42
Glycylhydroxamate formation in rat liver	6 (1970)	65
Glycyl-tRNA synthesis from rat liver	6 (1970)	65
Glyoxylases, partial purification and molecular weight determination by filtration on dextran gel	1 (1968)	159
Glyoxylate inhibition of pyruvate synthesis in <i>Clostridium kluyveri</i>	9 (1970)	271
Glyoxylate in <i>Rhodospirillum rubrum</i> , formation from α -hydroxyglutarate	7 (1970)	271
Goat antibody Fab fragments I and II and normal γ -globulins, ratio	6 (1970)	28
Gramicidin S biosynthesis		
in <i>Bacillus brevis</i> , ornithine activation	1 (1968)	63
nature of enzyme bound intermediates	7 (1970)	68
protein bound intermediates of	1 (1968)	339
starting point and direction	3 (1969)	169
Gramicidin S synthetase, role of phosphopantothenic acid	7 (1970)	287
Growth hormone of ox, N-terminus	3 (1969)	118
GTP complex from yeast, aminoacyl-tRNA-dependent interaction of transfer enzyme with	2 (1968)	49
GTP, effect on dissociation of 70 S ribosomes	4 (1969)	331
Guanidination of horse heart myoglobin	3 (1969)	141
Guanine nucleosides, pH induced changes	1 (1968)	183

Guinea-pig	
immunoglobulins, common and specific determinants of Fd fragments	10 (1970) 321
liver, effect of alanine on glutamate/oxoglutarate \times NH_4^+ ratio	9 (1970) 15
liver, inorganic pyrophosphate content	2 (1969) 209
spleen, a chondroitin sulphate protein from Kurloff cells in	4 (1969) 343
Haem	
catabolism and coupled oxidation of haemoproteins	5 (1969) 295
on haemoglobin A and F synthesis in human cord blood	1 (1968) 209
in liver microsomes, rapid loss caused by 2-allyl-2-isopropylacetamide	6 (1970) 343
stimulating effect on the synthesis of cytochrome <i>c</i> by liver slices	7 (1970) 248
synthesis in reticulocytes, effect of cobalt	9 (1970) 61
Haemocyanin, preservation under carbon monoxide	6 (1970) 125
Haemocytes of diptera, L-dopa decarboxylase in	7 (1970) 263
Haemoglobin	
blood, human cord, effect of haem and iron on	1 (1968) 209
<i>Bufo bufo</i> , preliminary isolation and characterisation of haemoglobin chains of	5 (1969) 196
2,3-diphosphoglycerate, binding isolation of peptides	5 (1969) 7
messenger RNP, interaction with small subparticle of reticulocyte ribosomes	9 (1970) 331
oxygen affinity curves, effect of familial diphosphoglyceratemutase deficiency	9 (1970) 37
rabbit reticulocytes, oscillation in the rate of synthesis	2 (1969) 217
<i>Rana esculenta</i>	
amino acid composition of soluble tryptic peptides from aminoethylated beta-like chain of	5 (1969) 271
amino acid sequence of (complete) β -chain	10 (1970) 136
amino acid sequence of <i>N</i> - and <i>C</i> -terminal residues of α -chain	1 (1968) 305
amino acid sequence of <i>N</i> -terminal residues of β -chain	8 (1970) 263
amino acid sequence of residues 35-98	9 (1970) 202
<i>Halobacterium cutirubrum</i> , effect of Na^+ and K^+ on cytochrome oxidase	7 (1970) 301
<i>Halobacterium cutirubrum</i> , phenylalanyl-tRNA properties	10 (1970) 225
Harderian gland of rat, isolation of tricarboxylic porphyrin	6 (1969) 9
Hare lactate dehydrogenase	4 (1969) 311
Heart	
beef, phospholipid exchange protein, purification	7 (1970) 44
horse	
cytochrome <i>c</i> , evidence for methionine 80 as haem ligand	6 (1970) 267
cytochrome <i>c</i> , nitration with tetranitromethane	4 (1969) 269
myoglobin, guanidination of	3 (1969) 141
mitochondria, see <i>Mitochondria, heart</i>	
pig	
aspartate aminotransferase from pig, characterisation by isoelectric focusing	5 (1969) 347
aspartate aminotransferase, microheterogeneity of	2 (1968) 115
lactate dehydrogenase, reactivity of amino acid residues in the presence of sulphite	1 (1968) 129
pyruvate dehydrogenase, inactivation by ATP and reactivation by magnesium	3 (1969) 271
rat, biosynthesis of cobalt porphyrins	6 (1970) 270
rat, effect of synthetic corticosteroids on RNase	4 (1969) 37
HeLa microsomes, histone messenger RNA in	6 (1970) 83
Helix coil transitions (cooperative) in half molecules of phenylalanine specific tRNA from yeast	5 (1969) 15
<i>Helix pomatia</i> , hydrolysis of glycosidic bonds of β - <i>O</i> -xyloxy-L-serine and β - <i>O</i> -xyloxy-L-threonine	
by cell free extracts of	1 (1968) 213
Hen egg-white lysozyme	
fluorescence study of binding dynamics of saccharides	10 (1970) 241
immunological studies, formylation of tryptophan residues	5 (1969) 324
spectrofluorometric study of tryptophan 108	7 (1970) 171
Heparin, lack of interaction with concanavalin A	9 (1970) 281
Hepatoma mitochondrial and nuclear DNA, zonal centrifugation studies of labelling patterns	5 (1969) 180
Hepatoma (rat) nucleoli devoid of perinucleolar chromatin, isolation in high ionic strength medium	6 (1970) 329
Hexokinase	
distribution between parenchymal and non-parenchymal cells of rat liver	3 (1969) 68
incorporation into glycoproteins by mouse myeloma ribosomes	8 (1970) 6
yeast, molecular weight and dissociation properties	4 (1969) 84
Higher plants, isolation and characterization of choliciferol	1 (1968) 59
Hill reagent, nitrate, in reconstructed chloroplast system	3 (1969) 57
Histidine ammonia lyase reaction, steric course of	6 (1970) 203
Histidine residues of aminopeptidase M, modification by diazonium-1-H-tetrazole	4 (1969) 265
Histone	
acetylation and methylation in rat liver nuclei	3 (1969) 99
binding to RNA and effect of chromatin acidic proteins on the binding	8 (1970) 133
fraction of developing chicken, quantitative development embryos in	2 (1969) 248
isolation from virus-induced tumours	4 (1969) 291

messenger RNA on HeLa cell microsomes	6 (1970) 83
on nuclear nucleosidase in Ehrlich ascites cells	1 (1968) 295
(11b) osmotic pressure studies on the association of acid extracted	1 (1968) 329
Hog submaxillary glycoproteins, effect of sialidase on blood group specificity of	8 (1970) 353
Homoserine and cysteine, cystathione synthesis from by rat liver homoserine dehydratase	4 (1969) 231
Homoserine dehydratase rat liver	4 (1969) 231
Homoserine dehydrogenase from <i>Rhodospirillum rubrum</i> , dissociation	3 (1969) 44
Hormone action, changes in concentrations of free amino acids in rat liver and muscle and rates of autolysis of muscle protein after fasting and hormone treatment	2 (1968) 97
Hormone induction of multiple forms of tyrosine aminotransferase in the neonate	5 (1969) 89
Horse	
heart, see <i>Heart, horse</i>	
kidney extract, pantethinase identification	1 (1968) 119
liver alcohol dehydrogenase isoenzymes, subunit structure of	5 (1969) 202
spleen apoferritin, structure of	6 (1970) 134
Horseradish peroxidase, binding of 1-anilo-8-naphthalene sulphonate to apo-enzyme	6 (1970) 158
House fly flight muscle mitochondria, formation of acetate from pyruvate	10 (1970) 292
Human	
Bence-Jones proteins of kappa type, isolation	10 (1970) 46
blood, adenosine inactivation	3 (1969) 133
blood (cord), effect of iron and haem on haemoglobin A and F in	1 (1968) 209
brain acetylcholinesterase, properties	2 (1969) 195
erythrocyte AMP pyrophosphorylase	1 (1968) 179
erythrocytes, glucose-6-phosphate dehydrogenase from	1 (1968) 147, 176
fetal mineralising tissues, alkaline phosphatase-like enzymes derived from	3 (1969) 153
fibrinogen, N-terminal amino acid sequence of intact	7 (1970) 143
IgG $\gamma 1$ chain of allotype Gm($a^{-}f^{+}$), N-terminal sequence of	5 (1969) 20
liver, distribution of pyruvate carboxylase and phosphoenolpyruvate carboxykinase	2 (1968) 26
lymphatic tissue, isolation of elongation factors	10 (1970) 121
lysozymes from normal and abnormal tissues, identity of	4 (1969) 337
macroglobulin, pancreatopeptidase E on	8 (1970) 319
meconium mono- and disulphate fractions, identification of 20,22-dihydroxycholesterol in	5 (1969) 99
milk fat, identification of cyclohexaneundecanoic acid and phytanic acid in by combination gas chromatography-mass spectrometry	2 (1969) 255
milk lactose synthetase A, purification and interaction with α -lactalbumin	9 (1970) 297
monoamine oxidase, isoenzymes of	1 (1968) 215
myelomas (G), isolation and antigenic characterization of pFc' fragments	6 (1970) 193
pancreatic juice, zymogens of	3 (1969) 355
pituitary gland, lipotropic hormone from	2 (1968) 42
placenta, RNA polymerase, Mn ²⁺ -dependent	10 (1970) 257
plasma	
low density lipoproteins, effect of sodium dodecyl sulphate	7 (1970) 59
low density lipoprotein, in obstructive jaundice, identification of the protein moiety	4 (1969) 113
in patients with Fabry's disease, absence of enzyme	7 (1970) 180
retinol transport in	2 (1969) 146
saliva, inhibition of arylaminopeptidases and proline iminopeptidases by benzethonium chloride	2 (1968) 101
serum	
albumin, dissociation constants for binding of bilirubin	5 (1969) 112
bilirubin, circular dichroism in aqueous solution	9 (1970) 53
and tissues, glycyl peptidase in	4 (1969) 42
tonsil ribosomes, catalysis of peptidyl transfer by	6 (1970) 198
tonsils, peptidyl-tRNA translocases and specificity required for peptide elongation	10 (1970) 159, 163
Hydrocortisone on the accumulation of amylase in embryonic chick pancreas	2 (1969) 323
Hydrocortisone effect on muscle glycogen content, dependence of insulin	4 (1969) 1
Hydrogen formation from NADH in cell-free extracts of <i>Clostridium kluyveri</i>	4 (1969) 108
Hydrogen formation from NADPH, ferredoxin-mediated, in cell-free system of <i>Clostridium kluyveri</i>	3 (1969) 144
Hydrogen peroxide produced by autooxidation of ferredoxin	10 (1970) 21
Hydrolytic enzyme kinetic analyses and consequences of non-productive binding	2 (1968) 69
2-Hydroxy acids from brain cerebroside, determination of configuration by gas chromatography	5 (1969) 192
α -Hydroxy fatty acids in <i>Actinomycetales</i>	4 (1969) 96
α -Hydroxyglutarate, formation of glyoxylate from in <i>Rhodospirillum rubrum</i>	7 (1970) 271
Hydroxylamine, resistance of sparcomycin-induced complex formation of <i>E. coli</i> ribosomal subunits to	7 (1970) 109
12 α -Hydroxylase of rat liver, effects of thyroidectomy and thyroxine treatment on	1 (1968) 13
14 α -Hydroxylation of testosterone and androst-4-ene in rat liver	1 (1968) 269
Hydroxymethylglutaryl-CoA reductase activity in rat liver	4 (1969) 117
2-Hydroxy-5-nitrobenzyl bromide reaction with bovine carboxypeptidase A	7 (1970) 72
Hydroxyproline-containing protein in bovine plasma	6 (1970) 19

Hydroxypyruvyl-tRNA formation	4 (1969) 222
6-Hydroxy-2,4,5-triaminopyrimidine accumulation by riboflavin mutants	5 (1969) 316
5-Hydroxytryptamine	
containing vesicles of synaptic membranes from rat brain	3 (1969) 80
interaction with diazepam	3 (1969) 97
uptake in blood platelets, dependence on sodium and chloride and inhibition by choline	3 (1969) 103
Hydroxyurea, use for obtaining synchronous cultures in <i>Cricetulus luciliae</i>	5 (1969) 291
Ig, see <i>Immunoglobulin</i>	
Ileum, rabbit, counter transport between sugars and amino acids	8 (1970) 153
Immune response, membrane aspects of (Meeting report)	9 (1970) 129
Immunochemical method for the characterisation of polynucleotide phosphorylase in <i>E. coli</i>	2 (1969) 321
Immunochemical studies on hen's egg-white lysozyme, effect of formylation of the tryptophan residues	5 (1969) 324
Immunoglobulin	
α_2 -globulin component present in sweat, saliva, tears, human milk, colostrum and cerumen	1 (1968) 77
Fd fragments, guinea-pig, common and specific determinants of	10 (1970) 321
Fab fragments I and II from goat antibody and normal immunoglobulins, ratio of	6 (1970) 28
G	
allotype markers Aa1 and Aa2 of rabbit locus <i>a</i> , cross reaction	2 (1969) 233
gamma-1 chain (human) of allotype Gm(<i>a</i> ⁻ <i>f</i> ⁻), N-terminal sequence of	5 (1969) 20
heavy chain of Ig2a, third subgroup of variability	8 (1970) 265
heavy and light chains of	5 (1969) 275
light chains of rabbit, correlation with allotypes and C-terminal sequence of	3 (1969) 341
kappa chains, basic sequence studies	2 (1969) 301
kappa chains, pig, sequence of 52 amino acid residues from the constant part	9 (1970) 33
lambda chains from pig Ig, sequence of N-terminal 46 residues	8 (1970) 269
lambda chains, sequence studies of a peptide from variable part	2 (1969) 309
pFc' fragments from human G myelomas, isolation and antigenic characterisation	6 (1970) 193
M heavy chains, C-terminal intra-subunit disulphide bridges between	7 (1970) 175
pi chains from pig Ig, N- and C-terminal sequences, assignment to kappa type	2 (1968) 93
Infants, hydroxylated cholesterol derivatives in the steroid monosulphate fraction	3 (1969) 129
Influenza virus, see <i>Virus</i>	
Infra red investigations of structural transitions of trypsinogen, trypsin, chymotrypsinogen and chymotrypsin	3 (1969) 195
Initiation factor	
B (f3) in T4-infected <i>E. coli</i>	9 (1970) 213, 218
C (f2), selective inactivation of its fMet-tRNA binding activity	6 (1970) 315
causing <i>E. coli</i> ribosomal dissociation	6 (1970) 297
associated with 30 S ribosomal subunits	3 (1969) 50
<i>Nostoc</i> and <i>Euglena gracilis</i> chloroplasts	10 (1970) 89
Initiator tRNAs from <i>E. coli</i>	1 (1968) 259
Insect flight muscle, activation of phosphorylase <i>b</i> kinase by calcium and P _i	7 (1970) 183
Insulin	
on adenylate kinase and glycolysis in isolated rat diaphragm in absence of added glucose	9 (1970) 317
alkaline-treated, formation of persulphide groups	10 (1970) 125
deficiency on transport of glucose by rat small intestine	2 (1969) 193
dependence on hydrocortisone effect on muscle glycogen content of	4 (1969) 1
on fatty acid synthesis of different cellular fractions of white adipose tissue in rat <i>in vivo</i>	5 (1969) 351
on fatty acid synthesis in mouse liver fractions	3 (1969) 125
fractionation and ultracentrifugation of proinsulin	2 (1968) 130
on pentose phosphate pathway in liver steady state concentrations of intermediates	1 (1968) 227
preparation by preparative polyacrylamide electrophoresis	6 (1970) 155
and proinsulin, bovine, comparison of antibodies	8 (1970) 157
synthesis, stimulation by glucose	10 (1970) 165
Intestinal (rat) alkaline phosphatase	7 (1970) 86
Intestinal response to sulphate ions, species differences	5 (1969) 157
Iodide transport in porcine thyroid slices, effect of lecithinase C	10 (1970) 219
Iodine content of submitochondrial particles of rat liver	1 (1968) 315
Iodoacetamide, reactivity of frozen-thawed lactate dehydrogenase towards	6 (1970) 253
Ion transport through biological membranes, physicochemical basis of (Meeting report)	10 (1970) 285
Ion transport in mitochondria, see <i>Mitochondria</i>	
Iron on haemoglobin A and F synthesis in human cord blood	1 (1968) 209
Iron-limited growth of <i>Torulopsis utilis</i>	1 (1968) 4
Islets of Langerhans, effect of glucose and actinomycin D on protein synthesis	10 (1970) 165
Isocitrate, conversion of citrate to in rat liver mitochondria	2 (1969) 259
Isocitrate dehydrogenase	
NAD-linked, in <i>Acinetobacter</i>	7 (1970) 324
NAD-linked, from muscle, effect of Ca ²⁺ and ADP	5 (1969) 124

pig liver, oxaloacetate reduction by	7 (1970) 157
Isocitrate lyase in <i>Aspergillus nidulans</i>	7 (1970) 231
Isoelectric focusing	
isolation of bovine thyrotrophins	3 (1969) 250
isolation of glycinin subunits	4 (1969) 259
of pig aspartate aminotransferase	5 (1969) 347
Isoelectric fractionation of proteins on polyacrylamide gel	1 (1968) 81
Isoelectric fractionation and properties of rabbit transferrin	3 (1969) 193
Isoleucine, alternative requirements for in <i>E. coli</i> mutants	5 (1969) 225
Isoleucyl-tRNA synthetase from <i>Bacillus stearothermophilus</i> and <i>E. coli</i> , thermal stability of aminoacyladenylate complexes	4 (1969) 239
Isopropyl-methylphosphorylated acetylcholinesterase, reactivation by α , ω -bis-(4-pyridinealldoxime)-2- <i>trans</i> -butene dibromide	10 (1970) 182
Jaundice, obstructive, identification of the protein moiety of low density lipoprotein	4 (1969) 113
Jimpy mouse brain, psychosine synthesis	3 (1969) 199
Jimpy mouse, UPD galactose:ceramide galactosyl transferase in	8 (1970) 213
Ketone body oxidation by rat brain mitochondria	6 (1960) 174
Kidney, horse, extract, panthetinase identification	1 (1968) 119
Kidney, rat, glucose synthesis in cell suspensions	3 (1969) 31
Kidney, rat, propionate activation in	5 (1969) 57
<i>Klebsiella aerogenes</i> , wild type variants of penicillinase from	1 (1968) 86
Krebs-II ascites carcinoma cells, magnesium induced errors of translation	5 (1969) 231
Krebs ascites tumour cells, transient and steady state intermediate concentrations of pentose pathway	1 (1968) 125
Kunitz inhibitor, role of carboxyl groups in reaction with trypsin	2 (1968) 17
Kurloff cells from guinea-pigs spleens, chondroitin sulphate protein	4 (1969) 343
Laccase, fungal copper requirement of	1 (1968) 50
Lac operon <i>E. coli</i> , effect of lac promoter deletion	10 (1970) 156
Lac permease sulphhydryl in <i>E. coli</i> membrane	5 (1969) 173
α -Lactalbumin, bovine, lack of concordance between primary structure and antigenicity	10 (1970) 237
α -Lactalbumin, interaction with purified human milk lactose synthetase A	9 (1970) 297
Lactate dehydrogenase-5	
electrophoretic differentiation in ionic strength and pH gradients	4 (1969) 151
hare	4 (1969) 311
mouse preimplantation ova	7 (1970) 277
oviducts, hormonal influence on the extracellular isoenzymes	6 (1970) 238
pig heart, reactivity of amino acid residues in the presence of sulphite	1 (1968) 129
pyruvate inhibition	3 (1969) 333
pyruvate kinase system in rabbit muscle, transient time of, <i>in vitro</i>	9 (1970) 73
transient dislocation of resulting in increased reactivity towards iodoacetamide	6 (1970) 253
Lactate, gluconeogenesis from in perfused rat liver	4 (1969) 33,47
Lactate oxygenase, spectral characteristics in aerobic and anaerobic reactions	3 (1969) 214
Lactose synthetase A protein from human milk, purification and demonstration of interaction with α -lactalbumin	9 (1970) 297
L-Lactyl-puromycin from <i>Bacillus subtilis</i> and yeast	1 (1968) 97
<i>Lampetra fluviatilis</i> , degree of association of liganded and non-liganded forms of deoxyhaemoglobin	7 (1970) 177
Laser Raman spectroscopy, structural analysis of polypeptides in dilute aqueous solutions	7 (1970) 330
Lecithinase C, effect on iodide transport in porcine thyroid slices	10 (1970) 219
Lecithin component of rat liver mitochondria, synthesis of	1 (1968) 42
Lectin from <i>Phaseolus lunatus</i>	9 (1970) 197
Lens, bovine, leucine aminopeptidase, zinc binding	10 (1970) 17
Leucine aminopeptidase of bovine lens, zinc binding	10 (1970) 17
Leucine incorporation into rat liver protein, diurnal variation	10 (1970) 78
Leucyl-tRNA	
from <i>Bacillus stearothermophilus</i>	5 (1969) 265
from <i>E. coli</i> , nucleotide sequence	9 (1970) 168
synthetase from <i>Bacillus stearothermophilus</i> and <i>E. coli</i> , thermal stability of aminoacyladenylate complexes	4 (1969) 239
Leukemia cells, effect of L-asparaginase on glycoprotein and protein synthesis	10 (1970) 85
Leukemic mice, physical properties of alkaline phosphatases	8 (1970) 87
Levallorphan inhibition of viral RNA synthesis	6 (1970) 190
Levator ani of rat, testosterone on sugar metabolism	4 (1969) 197
Ligamentum nuchae, pancreopeptidase hydrolysates of elastin from	1 (1968) 9
Linoleic acid hydroperoxide, ^{18}O -labelled, enzymic conversion into 12-oxo-13-hydroxy-octadec- <i>cis</i> -9-enoic acid by oxygen transfer	7 (1970) 188
Linolenic acid, enzymic conversion to ethylene by apple extracts	1 (1968) 283
Lipase	
pig liver, long-chain triglyceride	10 (1970) 117

rat pancreas, inhibiting protein factor from rat liver	9 (1970) 119
rat liver, effect of glucocorticosteroid (triamcinolone diacetate) and dibutyryl adenosine-3',5' (cyclic) monophosphate on	10 (1970) 301
Lipids	
on aminoacyl-tRNA synthesis in <i>E. coli</i>	6 (1970) 86
of erythrocytes, fluorescent probe interaction	6 (1970) 245
mannosyl, acting in reversible transfer of mannose	5 (1969) 81
membrane, retinol as a fluorescent probe	9 (1970) 287
of <i>Nocardia asteroides</i> , evolution of	5 (1969) 253
of <i>Nocardia asteroides</i> , preparation of	5 (1969) 253
Lipoate, reduced, fast oxidation by diamine	10 (1970) 343
Lipogenesis in mouse, effect of dibutyryl cyclic AMP	4 (1969) 213
Lipopolysaccharides	
<i>E. coli</i> , degradation studies of	1 (1968) 311
of <i>Pseudomonas aeruginosa</i> , two regions in the polysaccharide moiety of	9 (1970) 81
S and R form, isolation of 4-amino-4-deoxy-L-arabinose from	8 (1970) 161
Lipoprotein of low density	
human plasma, effect of sodium dodecyl sulphate	7 (1970) 59
identification of the protein moiety in obstructive jaundice	4 (1969) 113
polyanion interaction, elimination of by amino modifications	7 (1970) 41
Liporibonucleoprotein complex as integral part of animal cell membranes	6 (1970) 349
Lipotropic hormone from human pituitary gland	2 (1968) 42
Lithium chloride, dissociation of <i>E. coli</i> RNA polymerase in	6 (1970) 339
Liver	
abalone, fucoidan hydrolysis by α -L-fucosidase	9 (1970) 45
bovine, porphobilinogen kinetic studies	3 (1969) 223
chick embryo cell cultures, effect of inducer substances on porphyrin synthesis	2 (1968) 127
chick embryo, histopathological effects of aflatoxin B ₁ and palmotoxins B ₀ and G ₀	10 (1970) 198
embryo, free nucleotides during ontogenesis	7 (1970) 255
guinea-pig, effect of alanine on glutamate/oxoglutarate \times NH ₄ ⁺ ratio	9 (1970) 15
horse, alcohol dehydrogenase from subunit structure of isoenzymes	5 (1969) 202
human, distribution of pyruvate carboxykinase and phosphoenolpyruvate carboxykinase	2 (1968) 26
mouse	
homogenate, pathway of conversion of glucose to glycogen	3 (1969) 41
methylase, difference in specificity from myeloma methylase	4 (1969) 347
free ribonucleoside triphosphates in after α -amanitin injection	6 (1970) 295
effect of insulin and dibutyryl cyclic AMP on fatty acid synthesis	3 (1969) 125
pigeon NAD kinase, reaction with bromoacetyl pyridine	5 (1969) 96
pig	
isocitrate dehydrogenase, oxaloacetate reduction by	7 (1970) 157
long-chain triglyceride lipases	10 (1970) 117
sugar dehydrogenases, chromatographic and electrophoretic evidence	9 (1970) 57
protein kinase, use for microdetermination of cyclic AMP	8 (1970) 289
rat, see <i>Rat liver</i>	
Local anaesthetic induced changes of membrane-bound fluorochrome, link between ion uptake and membrane structure	3 (1969) 10
<i>Locusta migratoria</i> flight muscle mitochondria, amino acid incorporation in the presence of cycloheximide	2 (1969) 177
Locust fat-body, stearate desaturation by microsomes of	2 (1969) 286
Low-density lipoproteins of human plasma, effect of sodium dodecyl sulphate	7 (1970) 59
Low-density lipoprotein interactions, elimination by amino modifications	7 (1970) 41
Lupin seedlings, glutamine-dependent asparagine synthetase	10 (1970) 62
Luteinising hormone subunits, comparison with subunits of thyrotropin subunits	9 (1970) 20
Luteoskyrine, crystallographic studies on	2 (1969) 181
Lymphatic tissue, human, elongation factors	10 (1970) 121
Lysine orotate inhibition of ethanol toxicity	7 (1970) 291
Lysine sulphur analogue, S-(β -aminoethyl)-L-cysteine in cell-free extract of <i>Aerobacter aerogenes</i>	8 (1970) 301
Lysolecithin-induced cell fusion	4 (1969) 147
Lysosomal enzymes in perfused rat liver, effect of glucagon	10 (1970) 215
Lysosomes from rat liver, nucleoside diphosphatase	5 (1969) 355
Lysozymes	
hen egg-white	
fluorescence study of binding dynamics of saccharides	10 (1970) 241
immunological studies, formylation of tryptophan residues	5 (1969) 324
spectrofluorometric study of tryptophan 108	7 (1970) 171
human, from normal and abnormal tissues, identity of	4 (1969) 337
primary structure and antigenicity, lack of concordance between	10 (1970) 237

rat liver, preparation of	5 (1969) 233
T-even phage, from <i>E. coli</i> , isolation of inhibitor	4 (1969) 50
Lysyl tRNA, poly U-dependent binding of ribosomes from <i>Pseudomonas spheroides</i>	8 (1970) 240
α -Macroglobulin, trypsin and basic pancreatic inhibitor, evidence for tertiary complex between	4 (1969) 21
α_2 -Macroglobulins, human, effect on esterolytic and elastolytic activity of pancreatopeptidase E	8 (1970) 319
Magnesium	
on ATP-inactivated heart pyruvate dehydrogenase	3 (1969) 271
on (R)-citrate synthesis in <i>Clostridium kluyveri</i> and <i>Clostridium cylindrosporum</i>	4 (1969) 72
control of enzymes in gluconeogenesis	10 (1970) 33
induced errors of translation in a cell-free system from Krebs-II ascites carcinoma cells	5 (1969) 231
on muscle glycogen synthetase	5 (1969) 279
MAK chromatography at 35°, denaturation of 5 S RNA from <i>Salmonella typhimurium</i>	8 (1970) 45
Malate dehydrogenase, mitochondrial, interconversion of components	1 (1968) 241
Malondialdehyde, effect on template activity of DNA of rat liver	3 (1969) 205
Mammalian cells, chain length of ribosomal RNA	1 (1968) 104
Mammary glands, rabbit, effect of prolactin on glucose oxidation in explants	9 (1970) 177
Manganese	
on chloroplast oxygen evolution in the dark	6 (1970) 281
control of enzymes in gluconeogenesis	10 (1970) 33
dependent RNA polymerase from human placenta	10 (1970) 257
induced nuclear RNA synthesis in livers of normal and adrenalectomised rats	10 (1970) 169
pyruvate kinase activation from <i>Mucor rouxii</i>	6 (1970) 213
pyruvate carboxylase stimulation in rat liver mitochondria	6 (1970) 93
Mannose incorporation into glycoproteins of <i>Aspergillus oryzae</i>	6 (1970) 80
Mannosyl-lipid acting in reversible transfer of mannose	5 (1969) 81
Mass spectrometry	
amino acid sequence determination (Review letter)	7 (1970) 8
amino acid sequence determination of peptides	8 (1970) 207
<i>N</i> -glycyl muramic acid constituents of <i>Mycobacterium smegmatis</i> , identification	4 (1969) 87
of peptide derivatives, temporary protection of methionine as sulfoxide during permethylation	9 (1970) 235
of <i>N</i> -permethylated peptide derivatives; artifacts produced by <i>C</i> -methylation	5 (1969) 53
of proteins containing an <i>N</i> -terminal pyroglutamic acid residue	4 (1969) 25
Mast cells, neoplastic, cerebroside sulphate amine interaction	9 (1970) 337
Mast cells, neoplastic, timing of phospholipid biosynthesis	4 (1969) 161
Mathematical treatment of metal ions and enzyme equilibria	1 (1968) 100
Meconium, human, mono- and disulphate fractions, identification of 20,22-dihydroxycholesterol in	5 (1969) 99
Meconium of infants and newborns, hydroxylated cholesterol derivatives in the steroid monosulphate fraction	3 (1969) 129
Menaquinone, microbial, α -naphthol precursor	1 (1968) 323
Mercury activation of acetoacetyl-CoA reductase in extracts of <i>Rhodopseudomonas spheroides</i> and <i>Rhodomicrobium vannielii</i>	5 (1969) 246
H-Meromyosin, a peptide containing the reactive sulphhydryl group of Ca^{2+} -activated ATPase in	3 (1969) 309
Mesityl oxide as acetyl donor in the enzymic synthesis of acetylcholine	5 (1969) 338
Metaphosphate in <i>Chlorella</i>	1 (1968) 171
Methaemoglobin units, reactivation of	4 (1969) 217
Methionine	
acetone-sensitised photooxidation of	10 (1970) 129
activation of 3-phosphoglycerate dehydrogenase	7 (1970) 245
biosynthesis, kinetic evidence for enzyme-bound intermediate	1 (1968) 293
containing peptides, a method of purifying with radioactive labelling	4 (1969) 170
residues, protection as sulfoxide during permethylation	9 (1970) 232
synthesis in <i>E. coli</i> , reversibility of	4 (1969) 316
synthesis in isolated chloroplasts	7 (1970) 267
tRNA enzymatic hydrolysis of <i>N</i> -substituted	3 (1969) 253
5'-Methylammonium-5'-deoxyadenosine three-dimensional structure	10 (1970) 81
Methylases of liver and myelomas, specificity differences for <i>E. coli</i> tRNA	4 (1969) 347
Methyl hydrogen peroxide of compound II of catalase, electron spin resonance	9 (1970) 71
β -Methyl- δ -keto- $\Delta\alpha\beta$ -hexenoic acid as acetyl donor in the enzymic synthesis of acetylcholine	5 (1969) 338
Methylmethacrylate, metabolic pathways of	2 (1969) 206
<i>N</i> -Methylnicotinamide chloride reaction with bovine carboxypeptidase A	7 (1970) 72
<i>N</i> -Methyl- <i>N'</i> -nitro- <i>N</i> -nitrosoguanine, mechanism of mutagenesis by	9 (1970) 175
5-Methyl-4-oxo-octane-1,8-dioic acid as a microbiological degradation product of cholic acid	4 (1969) 288
<i>Micrococcus denitrificans</i> , respiratory control in membrane particles from	10 (1970) 246
Microdisc electrophoresis of proteins in pilocarpine-induced sweat	4 (1969) 28
<i>Micromonospora</i> , glucosamine phosphate isolation from	7 (1970) 77
Microsomes	
adrenals, substrate binding to cytochrome <i>P</i> -450	6 (1970) 249

HeLa cells, histone messenger RNA in	6 (1970)	83
locust fat-body, stearate desaturation by	2 (1969)	286
membranes binding to polysomes as measured by disulphide exchange enzyme, effect of aflatoxin B ₁ and steroid hormones	4 (1969)	103
rat liver		
CO and phenobarbital on hydroxylation of bile acids by	4 (1969)	177
cytochrome <i>P</i> -450 and haem loss caused by 2-allyl-2-isopropylacetamide	6 (1970)	343
cytochrome <i>P</i> -450, substrate binding to	6 (1970)	249
electron transfer chains, rat liver, effect of thyroidectomy and thyroid treatment on	1 (1968)	13
isolation of two classes of rough vesicles	2 (1969)	227
glucokinase as regulator of glycogen synthesis	8 (1970)	122
glucose-6-phosphatase, reactivation of CCl ₄ -inhibition by phospholipids	3 (1969)	202
perfused with and without phenobarbital induction, amobarbital action on	2 (1969)	170
photochemical action spectrum of CO-inhibited hydroxylation of cyclohexane by	4 (1969)	99
stearoyl-CoA desaturase of	1 (1968)	320
stereospecificity of NADP-linked reactions	1 (1968)	89
succinate dehydrogenase activity and mechanism of incorporation of succinate into fatty acids <i>in vitro</i>	7 (1969)	32
Milk, human, identification of cyclohexaneundecanoic and phytanic acids by gas chromatography mass spectrometry	2 (1969)	255
Milk, human, lactose synthetase A, purification and interaction with α -lactalbumin	9 (1970)	297
Mitochondria		
adipose tissue (rat brown) fatty acid synthesis in	6 (1970)	241
adrenal cortex (beef), distribution of cytochrome <i>P</i> -450 and steroid 11- β -hydroxylase	5 (1969)	135
adrenal cortex (bovine), two forms of cytochrome <i>P</i> -450	9 (1970)	41
Arum spadix, energy conservation	4 (1969)	164
ATPase, dinitrophenol on	1 (1968)	247
bacterial-like protein synthesis	4 (1969)	55
biogenesis, germ-free mitochondria (Review letter)	1 (1968)	203
brain (rat)		
aspartate aminotransferase	4 (1969)	151
ketone oxidation by	6 (1970)	174
malate dehydrogenase, interconversion of components of	1 (1968)	241
protein synthesis in	10 (1970)	273
calcium transport	10 (1970)	1
conformational basis of energy transduction (Review letter)	5 (1969)	241
heart		
beef membrane fragments, comparison of fluorescence probes and light scattering readout of structural states	4 (1969)	181
beef quinol phosphate oxidation, stimulation by polylysine	2 (1969)	327
pidgeon NADH oxidation	2 (1969)	157
hepatoma (rat) zonal centrifugation studies of labelling patterns	5 (1969)	180
liver (rat)		
ammonia protective effect of	9 (1970)	309
anion distribution across the membrane, elucidation by ionophores of the pH control of	8 (1970)	105
aspartate aminotransferase, differential electrophoresis	4 (1969)	151
ATPase, effect of aurovertin on affinity for ATP and ADP	6 (1970)	309
ATPase, aurovertin-sensitive phosphate activation of	9 (1970)	305
atractylate binding affinity to inner membrane	8 (1970)	328
bathophenanthroline inhibition of oxidative phosphorylation and dinitrophenol stimulated ATPase	6 (1970)	109
calcium on ADP-ATP exchange reaction	7 (1970)	339
chloramphenicol on biogenesis <i>in vivo</i>	3 (1969)	208
citrate conversion to isocitrate and accumulation of citrate in	2 (1969)	259
citrate formation in response to calcium ions	3 (1969)	190
cycloheximide-resistant amino acid incorporation <i>in vivo</i>	9 (1970)	232
DNA, zonal centrifugation studies of labelling patterns	5 (1969)	180
Donnan relation of ion distribution	10 (1970)	6
enzyme origin, cytochrome <i>c</i> distribution	2 (1968)	105
enzyme origin, cytochrome <i>c</i> synthesis by endoplasmic reticulum	1 (1968)	38
enzymes tightly bound, site of synthesis	1 (1968)	187
fatty acids incorporation into the outer and inner membranes	3 (1969)	121
glutaraldehyde energy-linked oxidation of	3 (1969)	112
inhibitors of the dicarboxylate and anion transporting systems on oxidation	5 (1969)	301
lecithin component of inner and outer membranes synthesis of	1 (1968)	42
nucleophylic sites of energised membranes	10 (1970)	13
oligomycin and ADP sensitivity of alkylation of SH-groups <i>in vitro</i>	9 (1970)	274

oligomycin and dicyclohexylcarbodiimide energy-dependent interaction of with the membrane	7 (1970) 135
2-oxoglutarate entry, inhibition by L-aspartate	4 (1969) 247
perfused action of sodium azide on respiratory carriers and respiration	5 (1969) 319
perfused, respiratory state	2 (1969) 170
phosphate carriers, location in membranes	10 (1970) 265
³² P-phosphate incorporation into phosphatides	2 (1968) 118
phosphate transport, action of uncouplers on	6 (1970) 1
potassium-induced proton release	10 (1970) 133
potassium proton exchange located in outer membrane	8 (1970) 210
preparation of submitochondrial particles by drastic sonication	1 (1968) 315
proteins of inner membrane	10 (1970) 276
proteins of inner and outer membranes, quantitative relation between	6 (1970) 105
proteins of inner and outer membrane, turnover	1 (1968) 153
protein synthesis, phylogenetic differences in sensitivity to antibiotics	2 (1969) 330
proton conducting systems on protamine-inhibited respiration	8 (1970) 149
proton shift associated with valinomycin-induced potassium uptake	5 (1969) 50
proton translocation system of inner membrane	10 (1970) 295
pyrimidine biosynthesis, effect on the terminal stages of	3 (1969) 147
pyruvate carboxylase, manganese stimulation	6 (1970) 93
regenerating, DNA polymerase in	4 (1969) 13
regenerating, euflavin and ethidium bromide as inhibitors of mitochondriogenesis	7 (1970) 347
RNA polymerase, effect of rifampicin	10 (1970) 54
RNA synthesis stimulation by thyroid hormone	10 (1970) 269
succinate oxidation and transport, inhibition of by metal-complexing agents	8 (1970) 325
succinate uptake kinetics of	4 (1969) 251
swelling with <i>N</i> -(<i>N</i> -acetyl-4-sulphamoylphenyl)-maleimide	1 (1968) 142
swelling induced by a thermostable factor in crude staphylococcal α -toxin preparations	7 (1970) 35
thiol-blocking agents on anion-exchange reactions involving phosphate	8 (1970) 41
thiol proteins from outer membrane, isolation	9 (1970) 108
thiophene derivatives, cyclic response of energy-linked functions to uncoupling by	6 (1970) 217
of thyroxine treated rats, competitive effect of succinate on glycerol-7-phosphate oxidation	5 (1969) 299
triethyl tin on ion accumulation	5 (1969) 331
tyrosine aminotransferase, postnatal development of	8 (1970) 99
metabolite transport (Review letter)	6 (1970) 145
muscle	
house fly flight formation of acetate from pyruvate	10 (1970) 292
<i>Locusta migratoria</i> , amino acid incorporation in the presence of cycloheximide	2 (1969) 177
ox or Pietran pig, α -glycerophosphate oxidase system	10 (1970) 109
rat preparation from muscle without the use of an homogeniser	8 (1970) 109
<i>Neurospora crassa</i>	
cycloheximide-resistant protein synthesis <i>in vivo</i>	4 (1969) 243
electrophoretic pattern of and amino acid incorporation into insoluble protein of wild type	
and mi-1	1 (1968) 235
peptide chain elongation factors	10 (1970) 25
ribosomes in poly-U dependent cell-free systems	4 (1969) 140
plant, lack of phospholipase D activity	9 (1970) 284
polarity of inner membrane	3 (1969) 242
ubiquinone requirement after pentane extraction	10 (1970) 92
yeast	
<i>Candida utilis</i> ribosomes, isolation and characterisation	
<i>Saccharomyces cerevisiae</i>	3 (1969) 177
-asynchronous development of different functions	2 (1969) 198
-enzyme synthesis, a new hypothesis	1 (1968) 255
-NAD kinase	10 (1970) 97
-ribosomes of	4 (1969) 234
<i>Torulopsis utilis</i>	
-energy conservation site I, interrelationship between piericidin A sensitivity and	
EPR spectra	5 (1969) 207
-iron deficient growth on site I energy conservation	1 (1968) 4
-NADH ₂ oxidation pathways, grown on acetate	7 (1970) 132
-spectroscopic resolution of iron-flavin trough of respiratory chain of submitochondrial	
particles	8 (1970) 333
Mitomycin C on induction of Crown-gall tumours	3 (1969) 115
Molecular basis of recombination (Meeting report)	10 (1970) 73
Molecular weight determination	
chromatography on Sepharose 4B	2 (1969) 242
evaluation from single sedimentation experiments	9 (1970) 124
of glyoxylases by filtration on dextran gel	1 (1968) 159

by surface areas on protein films on PVC membranes	9 (1970) 117
Monamine oxidase of rat liver and human, isoenzymes of	1 (1968) 215
Monocarboxylic acid cycle, ferredoxin-dependent, in <i>Clostridium kluyveri</i> , synthesis of one-carbon units from CO ₂	8 (1970) 304
Monosaccharide transport in baker's yeast, glucose-6-phosphate regulation	2 (1969) 333
Morphogenetic factor, activation by electrophoresis	2 (1969) 251
Mouse,	
dibutyryl cyclic AMP on lipogenesis and neoglucogenesis	4 (1969) 213
immunoglobulin G2a, third subgroup of variability for the heavy chain pool	8 (1970) 265
Jimpy brain, psychosine synthesis	3 (1969) 199
Jimpy, UDPgalactose:ceramide transferase in	8 (1970) 213
leukemic, alkaline phosphatases of various tissues	8 (1970) 87
liver	
free ribonucleoside triphosphates after α -amanitin injection	6 (1970) 295
homogenate, pathway of conversion of glucose to glycogen	3 (1969) 41
insulin and dibutyryl cyclic AMP on fatty acid synthesis	3 (1969) 125
methylase, difference in specificity from myeloma methylase	4 (1969) 347
myeloma ribosomes, incorporation of hexosamine into glycoproteins	8 (1970) 6
phosphorylase kinase deficiency in	10 (1970) 328
plasmocytoma cells, low buoyant density active complex for protein synthesis	9 (1970) 141
preimplantation ova, lactate dehydrogenase	7 (1970) 277
reticulocyte RNA, fractionation by polyacrylamide gel electrophoresis	1 (1968) 279
serum proteins, effect of cobalt on electrophoretic patterns	9 (1970) 277
5 S ribosomal RNA from 2 cell lines	3 (1969) 306
<i>Mucor rouxii</i> pyruvate kinase, activation by manganese ions	6 (1970) 213
Mucosa of rat, in methanol, formation of methyl esters by	2 (1969) 265
Murein of <i>Propionibacterium peterssonii</i> , glycine crosslinkages in	1 (1968) 287
Murine transplantation antigens, purification by isoelectric focusing	8 (1970) 167
Muscle	
AMP deaminase, time dependence of activation by substrate and potassium ion	2 (1968) 65
creatine kinase and adenylate kinase equilibria	7 (1970) 239
cytosol, adenylate kinase in adenine nucleotide interconversion	7 (1970) 221
flight of insect, activation of phosphorylase <i>b</i> kinase by Ca and P _i	7 (1970) 183
frog, exchange of actin-bound ADP during activity	5 (1969) 41
glycogen, dependence of hydrocortisone effect on insulin	4 (1969) 1
glycogen synthetase kinase, effect of magnesium	5 (1969) 279
heart, see <i>Heart</i>	
isocitrate dehydrogenase, NAD-linked, effect of Ca ²⁺ and ADP	5 (1969) 124
of ox or Pietran pig, mitochondria α -glycerophosphate oxidase system	10 (1970) 109
phosphorylase <i>b</i> , rabbit, slow transition leading to cooperative binding of 5'-AMP at 5°	9 (1970) 152
polysomes, isolation in high yield after nitrogen cavitation	2 (1968) 1
rabbit and sturgeon, amino acid sequence homology of aldolases	10 (1970) 49
rabbit, transient time of pyruvate kinase lactate dehydrogenase system <i>in vitro</i>	9 (1960) 73
rat, AMP aminohydrolase, reaction with metal ions	10 (1970) 101
rat, hormones and fasting on concentration of free amino acids and rate of protein autolysis	2 (1968) 97
reversibility of biochemical reactions during absorption of negative work	10 (1970) 233
skeletal	
resolution of activities of 5-mononucleotides and non-specific phosphatase	2 (1969) 189
ribosomes, peptidyl-tRNA and peptidyl transferase activity, effect of diabetes	10 (1970) 35
role of fructose-1,6-diphosphatase in regulation of glycolysis	7 (1970) 195
Mycobacteria, study of structure of adjuvant active waxes D from; isolation of a peptidoglycan	2 (1968) 7
<i>Mycobacterium butyricum</i> , complex formation between NADase and protein inhibitor	6 (1970) 337
<i>Mycobacterium phlei</i> , C-methylation of desmethylmenaquinones, specificity of enzymatic systems	2 (1969) 336
<i>Mycobacterium phlei</i> , isolation of UDP-N-glycolylmuramyl-(Ala, Glu, Dap) from	6 (1970) 55
<i>Mycobacterium smegmatis</i> , identification of N-glycolyl muramic acid constituents by mass spectrometry	4 (1969) 87
<i>Mycobacterium smegmatis</i> , salicylic acid uptake into mycobactin S in growing cells of	10 (1970) 309
<i>Mycobacterium tuberculosis</i> , isolation of a digalactoside and a mycolate of diarabinose from a human virulent form of	2 (1968) 20
Mycobactin S, uptake of salicylic acid into by growing cells of <i>Mycobacterium smegmatis</i>	10 (1970) 309
<i>Mycoplasma laidlawii</i> cells, pH-dependent changes in density of plasma membranes	10 (1970) 261
Mycoplasma membranes, solubilisation by Triton X-100	3 (1969) 217
Myelin phospholipids, fatty acids of	10 (1970) 317
Myelin proteins of rat brain, extraction with sodium dodecyl sulphate and electrophoresis of	9 (1970) 209
Myeloma methylase, difference in specificity from liver methylase	4 (1969) 347
Myelomas (G) from humans, isolation and characterisation of pFc' fragments	6 (1970) 193
Myoglobin, of dolphin, chymotrypsin digests, structure of peptides	1 (1968) 108

Myoglobin of horse heart, guanidination of	3 (1969) 141
Myokinase, see <i>Adenylate kinase</i>	
Myosin, cow carotid, subfragment I	10 (1970) 194
Myxomycetes slime, chemical composition of	7 (1970) 80
NAD	
analogue, 3-cyano pyridine AD ⁺	7 (1970) 199
-ase and protein inhibitor from <i>Mycobacterium butyricum</i> , complex formation between	6 (1970) 337
D-glyceraldehyde-3-phosphate on reducibility	2 (1968) 81
kinase from pigeon liver, reaction with bromoacetyl pyridine	5 (1969) 96
kinase, yeast mitochondria	10 (1970) 97
saturation of yeast glyceraldehyde-3-phosphate dehydrogenase, X-ray small-angle scattering studies	4 (1969) 75
synthetase, rat liver	9 (1970) 183
NADH	
dependent oxidoreductases, inhibition by the 6-aminonicotineamide analogue of NADP	6 (1970) 225
electron donor for pyruvate synthesis from acetyl-CoA and CO ₂	2 (1969) 342
hydrogen formation from in cell-free extracts of <i>Clostridium kluyveri</i>	4 (1969) 108
measurement by adapted atomic absorption photometer	4 (1969) 160
nitrate reducing system, in <i>Chlorella</i> role of FAD	9 (1970) 157
oxidation by intact heart mitochondria	2 (1969) 157
oxidation pathways in mitochondria of acetate-grown <i>Torulopsis utilis</i>	7 (1970) 132
NADP	
analogue, selenonicotinamide-adenine dinucleotide phosphate	2 (1969) 267
electron donor for pyruvate synthesis from acetyl-CoA and CO ₂	2 (1969) 342
linked reactions in rat liver microsomes, stereospecificity of	1 (1968) 89
NADPH	
ferredoxin-mediated hydrogen formation from in <i>Clostridium kluyveri</i>	3 (1969) 144
mixed function oxidations in perfused rat liver, redox potential	9 (1970) 205
α -Naphthol as precursor of microbial menaquinone	1 (1968) 323
Natural products, chemistry of, reports of a Pre-symposium, Riga June 19-20 1970	10 (1970) 209, 285; 11 (1970) 1, 73
NBD-chloride, reactivity with SH-groups	6 (1970) 346
Neocarcinostatin, N- and C-terminal sequences	9 (1970) 301
Neoglucogenesis in mouse, effect of dibutyl cyclic AMP	4 (1969) 213
Neonate, hormonal induction of tyrosine aminotransferase in	5 (1969) 89
Neoplastic cells, effect of temperature on transcellular migration in	3 (1969) 343
Neoplastic mast cells, cerebroside sulphate amine interaction	9 (1970) 337
Neoplastic mast cells, timing of phospholipid synthesis	4 (1969) 161
Nerve, sciatic, encephalitogenic basic protein from	4 (1969) 9
Netropsin, nucleic acid complexes, optical rotatory dispersion properties of	10 (1970) 339
Neuraminidases	
chromogenic substrate for	3 (1969) 72
N-formyl- and N-succinyl-D-neuraminic acid synthesis on specificity	4 (1969) 335
of <i>Vibrio cholerae</i> and influenza viruses, synthetic inhibitors of	8 (1970) 17
Neurochemical correlates of learning and environmental changes	5 (1969) 305
<i>Neurospora crassa</i>	
cytoplasmic mutant, cytochrome oxidase of	4 (1969) 193
ferrochelataase in wild-type and cytoplasmic mutants of mitochondria, see <i>Mitochondria</i> , <i>Neurospora crassa</i>	5 (1969) 28
mi-1 mutant, electrophoretic mobility of and amino acid incorporation into insoluble protein of	1 (1968) 235
poly-U-dependent cell-free system, specificity of mitochondrial and cytoplasmic ribosomes from	4 (1969) 140
Neurotoxins from scorpions, a family of homologous proteins	10 (1970) 349
Newborns, hydroxylated cholesterol derivatives in the steroid monosulphate fraction from meconium	3 (1969) 129
<i>Nicotiana tabacum</i> , incorporation of 3- ³ H-demesteryl propionate	3 (1969) 257
Nicotinamide nucleotide synthesis, ATP on	1 (1968) 206
Nisin, the number and nature of α,β -unsaturated amino acids in	2 (1968) 61
Nitrate as Hill reagent in reconstructed chloroplast system	3 (1969) 57
Nitrate reductase, membrane bound respiratory, from <i>Aerobacter aerogenes</i> , purification and properties of	5 (1969) 249
4'-Nitrobenzyl-4-guanidinobenzoate inhibition of trypsin, plasmin and thrombin	8 (1970) 170
Nitrogenase, <i>Azobacter</i> , effect of cytochrome c and non-haem iron on activity and oxygen sensitivity	8 (1970) 281
Nitrogen cavitation for isolation of high yields of liver and muscle polysomes	2 (1968) 1
Nitrophenyl group antibodies, effect of limited nitration	2 (1969) 45
p-Nitrophenyl-p'-guanidinobenzoate, reaction kinetics with bovine thrombin	1 (1968) 343
p-Nitrophenylhippurate, ficin-catalysed hydrolysis of	4 (1969) 299
Nitroxide (organic) free radical, covalent binding to radiation-induced DNA radical	8 (1970) 33
NMR	
⁸¹ Br and ³⁵ Cl, of <i>E.coli</i> alkaline phosphatase	9 (1970) 189
characterisation of an acetyl group at the N-terminal position of α -amylase	9 (1970) 341

phosphorus spectra used for determination of spin-spin coupling constants of ADP and ATP	8 (1970) 125
<i>Nocardia asteroides</i> lipids, evolution of	5 (1969) 253
<i>Nocardia brasiliensis</i> , glycolipid characterization of	7 (1970) 64
<i>Nocardia kировani</i> , subcellular fractionation of	6 (1970) 37
Non-productive binding, consequences of in kinetic analysis of hydrolytic enzymes	2 (1968) 69
<i>Nostoc</i> , peptide chain initiation in	10 (1970) 89
Nuclear	
DNA from rat liver and hepatomas, zonal centrifugation studies of labelling patterns	5 (1969) 180
dRNA fractions, polyphosphate groups at the 5'-ends	8 (1970) 186
envelopes isolated from rat liver, respiration in	5 (1969) 34
magnetic resonance, see NMR	
nucleosidase in Ehrlich ascites cells with ATP-ribose transferase activity, histones and spermine influence on	1 (1968) 295
Nuclei, rat liver	
Cd ²⁺ , Mn ²⁺ and Zn ²⁺ -induced RNA synthesis in normal and adrenalectomised rats	10 (1970) 169
cortisol and actinomycin D on RNA polymerase	1 (1968) 275
cortisol stimulation <i>in vitro</i> , independent effects on the acetylation and methylation of histones	3 (1969) 99
RNA polymerase I and II assay with use of α -amanitin	8 (1970) 57
zinc-induced RNA synthesis	7 (1970) 356
Nucleic acid sequences, see Sequences	
Nucleoli devoid of perinucleolar chromatin from rat hepatoma, isolation in high ionic strength medium	6 (1970) 329
Nucleosidase, nuclear, in Ehrlich ascites cells with ADP-ribose transferase activity	1 (1968) 295
Nucleoside	
diphosphatase in purified preparations of rat liver lysosomes	5 (1969) 355
diphosphates, viscosity changes during polymerisation	8 (1970) 95
gel formation by 8-bromoguanosine	4 (1969) 173
2'(3')-phosphate 5'-triphosphates, synthesis of	1 (1968) 326
5'-Nucleotidase, resolution of activity from skeletal muscle	2 (1969) 189
Nucleotide	
free	
of rat liver during ontogenesis	7 (1970) 255
of rat liver, heterogeneity of ³² P-phosphate incorporation into α Pi	2 (1969) 141
in retina	8 (1970) 119
sequences, see Sequences	
5'-Nucleotidase of sheep brain, effect of pH on allosteric properties	7 (1970) 129
5'-Nucleotides in RNA of different mammalian tissues, unequal ³² P-labelling of	6 (1970) 52
Numerical simulation of biochemical systems	7 (1960) 47
Nylon tube, preparation of urease chemically attached to	10 (1970) 325
Oestradiol binding to receptor substances in extracts of calf uterus	5 (1969) 161
Oligomycin	
on mitochondria, see Mitochondria	
resistance in yeast, extrachromosomal inheritance	6 (1970) 302
resistant mutants of <i>Saccharomyces cerevisiae</i>	10 (1970) 202
Oligonucleotides of uridine, kinetics of hydrolysis with snake venom phosphodiesterase	2 (1969) 185
Oligosaccharide	
components of <i>Cryptococcus laurentii</i> cell walls, biosynthesis of	5 (1969) 145
separation by gel chromatography at elevated temperatures	2 (1968) 74
of starch containing single glucose side chains, action of pancreatic amylase	5 (1969) 257
Olivomycin, effect on RNA synthesis in Ehrlich ascites tumour cells	5 (1969) 73
Ontogenesis in liver, free nucleotides during	7 (1970) 255
Optical rotational dispersion of complexes of distamycin A and netropsin with nucleic acids	10 (1970) 339
L-Ornithine activation by cell-free extracts of <i>Bacillus brevis</i> catalysing synthesis of	
gramicidin S	1 (1968) 63
Ornithine activity, carbamoyltransferase activity, control by arginase in <i>Saccharomyces cerevisiae</i>	3 (1969) 47
Oscillation and membrane instabilities (Meeting report)	7 (1970) 311
Ova, preimplantation mouse, lactate dehydrogenase	7 (1970) 277
Oxidative lactate dehydrogenase, hormonal influences on the extracellular isoenzymes	6 (1970) 238
Ovomucoid-Sepharose resin, purification of trypsin by affinity chromatography	7 (1970) 353
Ox, see Bovine	
Oxaloacetate reduction by pig liver isocitrate dehydrogenase	7 (1970) 157
Oxidative phosphorylation, mechanism derived from studies of trimethyl- and triethyltin (Review letter)	4 (1969) 61
Oxidative phosphorylation in mitochondria, see Mitochondria	
Oxidative phosphorylation uncoupler, 2,4-bis-(<i>p</i> -chloroanilino)-pyrimidine	4 (1969) 157
Oxidoreductases, NADPH-dependent, inhibition by the 6-aminonicotinamide analogue of NADP	6 (1970) 225
12-Oxo-13-hydroxy-octadec- <i>cis</i> -9-enoic acid, formation by enzymic conversion of linoleic acid hydroperoxide by oxygen transfer	7 (1970) 188

2-Oxoglutarate	
aminotransferase from <i>Streptomyces noursei</i>	1 (1968) 262
in biological hydroxylations	2 (1968) 29
citrate synthesis, regulation by	3 (1969) 265
entry into rat liver mitochondria, inhibition by L-aspartate	4 (1969) 247
Oxygen evolution by chloroplasts, see <i>Chloroplasts</i>	
Oxyhaemoglobin, binding of 2,3-diphosphoglycerate	8 (1970) 37
Oxytocinase, significance in degradation of oxytocin during pregnancy (Review letter)	4 (1969) 135
Palmotoxins B ₀ and G ₀ , histopathological effects on developing chick liver embryo	10 (1970) 198
Pancreas	
amylase action on starch oligosaccharides containing single glucose side chains	5 (1969) 257
α -amylase on 6 ² - and 6 ³ - α -glucomalto-oligosaccharides	6 (1970) 182
bovine, see <i>Bovine pancreas</i>	
chick embryos, effect of hydrocortisone on the accumulation of amylase by	2 (1969) 323
juice of humans, zymogens of	3 (1969) 355
lipase, inhibiting protein factor from rat liver	9 (1970) 119
proteins, kinetics of structural transitions	3 (1969) 60
ribonuclease, 2',3'-O-cyclophosphorothioate as substrate	2 (1968) 85
ribonuclease S-peptide, conformation transitions of	1 (1968) 298
ribonucleotide digestion products of <i>E. coli</i> ribosomal RNA, nucleotide sequences of	7 (1970) 51
tRNA, tryptophan, complex with ATPase and tryptophanyl adenylate	9 (1970) 163
trypsin inhibitor, basic	
interaction with trypsinogen	3 (1969) 137
primary structure	4 (1969) 155
evidence for basic tertiary complex between	4 (1969) 21
Pancreatopeptidase E, effect of human α_2 -macroglobulin on elastolytic and esterolytic activity	8 (1970) 319
Pancreatopeptidase E hydrolysates of elastin from <i>Ligamentum nuchae</i>	1 (1968) 9
Pantethinase in horse kidney extract, identification of	1 (1968) 119
Papain, convenient active site titration in the presence of other thiols	9 (1970) 113
Papain, kinetics of inhibition by TLCK and TPCK in the presence of BAEE as substrate	2 (1969) 143
Parenchymal cells of rat liver, distribution of hexokinase and glucokinase	3 (1969) 68
Parmitoylcarnitine and tricarboxylic acid cycle oxidations	2 (1969) 281
Parsley enzyme preparation for transfer of apiose from UDP-apiose	7 (1970) 164
Pea plant chloroplasts, see <i>Chloroplasts, pea plant</i>	
Penicillinase, wild type variants from <i>Klebsiella aerogenes</i>	1 (1968) 86
<i>Penicillium cyclopium</i> Westling, mixed functional oxidations during synthesis of alkaloids	3 (1969) 292
Pentose pathway in Krebs ascites tumour cells, transient and steady state intermediate concentrations	1 (1968) 125
Pentose phosphate pathway in liver, effect of insulin and diet on steady state concentrations of intermediates	1 (1968) 227
Pepsin	
polyvinylpyrrolidone on <i>in vitro</i> activity	9 (1970) 194
sequence around an aspartyl residue in the active site	1 (1968) 211
size and property of active site	10 (1970) 222
Peptide	
chain initiation in <i>Nostoc</i> and <i>Euglena gracilis</i> chloroplasts	10 (1970) 89
derivative mass spectrometry, temporary protection of methionine as sulfoxide during permethylation	9 (1970) 235
determination of amino acid sequences by mass spectrometry	8 (1970) 207
and proteins, method for isolation of C-terminal fragments	6 (1970) 34
Peptidoglycan, isolation from Mycobacteria	2 (1968) 7
Peptidolipid, stable conformation of	4 (1969) 210
Peptidyl transfer, catalysis of by human tonsil ribosomes	6 (1970) 198
Peptidyltransferase centre of <i>E. coli</i> ribosomes, antibiotic and substrate binding sites	6 (1970) 273
Peptidyltransferase centre of ribosomes, 3'(2')-O-aminoacylnucleotides as the polypeptide acceptors	7 (1970) 112
Peptidyl-tRNA and peptidyl transferase, of skeletal muscle ribosomes, effect of diabetes	10 (1970) 35
Peptidyl-tRNA translocases of rat liver and human tonsils	10 (1970) 159
Perfused rat liver, see <i>Rat liver, perfused</i>	
N-Permethyated derivatives, mass spectrometry of; artifacts produced by C-methylation	5 (1969) 53
Phage, see <i>Virus</i>	
Phallacidin conjugate with bovine serum albumin	4 (1969) 341
<i>Phaseolus lunatus</i> , properties of its lectins	9 (1970) 197
Phenobarbital on hydroxylation of bile acids by rat liver microsomes	4 (1969) 177
Phentolamine repression of induction of liver tyrosine aminotransferase in adrenalectomised rats	8 (1970) 316
Phentolamine repression of theophylline-induced tyrosine aminotransferase in livers of adrenalectomised rats	9 (1970) 105
Phenylalanyl-tRNA, see <i>Transfer RNA, phenylalanine</i>	
Phenylethanol, influence on isolated DNA polymerase and DNase from <i>E. coli</i>	8 (1970) 116
Phenylthiocyanate, action on enzymes	2 (1969) 149
Phosphatase (non-specific), resolution of activity from skeletal muscle	2 (1969) 189

Phosphate	
in anion exchange reactions, sulphhydryl blocking agents on in rat liver mitochondria	8 (1970) 41
carrier in rat liver mitochondria, discrimination between inner and outer location	10 (1970) 265
incorporation in αPO_3^- in free rat liver nucleotides	2 (1969) 141
insect flight muscle phosphorylase <i>b</i> kinase, activation	7 (1970) 183
transport across inner membrane of spinach chloroplasts	10 (1970) 143
transport by rat liver mitochondria, action of uncouplers	6 (1970) 1
Phosphatides, incorporation of ^{32}P -phosphate into in rat liver mitochondria	2 (1968) 118
Phosphodiesterase, snake venom, kinetics of hydrolysis of uridylic oligonucleotides	2 (1969) 185
Phosphodiesterase, venom, aminoacyl-tRNA hydrolysis by	1 (1968) 156
Phosphoenolpyruvate	
carboxykinase, control by bivalent cations	10 (1970) 33
carboxykinase, distribution of in human liver	2 (1968) 26
dependent phosphotransferase system of <i>Staphylococci</i> , solubilisation of membrane-bound	
lactose specific component	8 (1970) 277
synthase of <i>acetobacter</i> , properties and physiological role	3 (1969) 156
Phosphofructokinase	
activity under conditions simulating glycolysing yeast extract	3 (1969) 5
<i>E. coli</i> tetrameric structure	2 (1968) 109
stimulation of protein-dependent interconversion of two forms by a heat stable factor from yeast	5 (1969) 199
subunits of	8 (1970) 20
yeast kinetics and molecular reaction of	1 (1968) 137
6-Phosphogluconate-induced inactivation of glucose-6-phosphate dehydrogenase isolation of protein	
involved	1 (1968) 176
3-Phosphoglycerate dehydrogenase, activation by methionine	7 (1970) 245
Phosphohydrolase, MgATP, in isolated rat liver plasma membranes, kinetic properties of	2 (1969) 317
Phospholipase C, effect on glucose-6-phosphohydrolase at 5 and 37°	10 (1970) 346
Phospholipase D, lack of activity in plant mitochondria and plastids	9 (1970) 284
Phospholipid	
composition of subcellular particles of cancer cells, dedifferentiation of	2 (1968) 87
dependence of glucose-6-phosphohydrolase on	10 (1970) 346
exchange protein from beef heart, purification of	7 (1970) 44
of myelin, fatty acids of	10 (1970) 317
reactivation of CCl_4 -inhibited microsomal glucose-6-phosphatase	3 (1969) 202
synthesis in neoplastic mast cells	4 (1969) 161
Phosphopantothenic acid, role in gramicidin S synthetase	7 (1970) 287
Phosphorylase <i>b</i> of rabbit muscle, slow transition leading to cooperative binding of 5'-AMP at 5°	9 (1970) 152
Phosphorylase kinase deficiency in mice	10 (1970) 328
Phosvitin kinase from chick embryo	1 (1968) 244
Photochemical action spectrum of carbon monoxide-inhibited hydroxylation of cyclohexane by rat	
liver microsomes	4 (1969) 99
Photolysis kinetics by frequency double laser emission	3 (1969) 287
Photooxidation of acridan derivative of riboflavin	7 (1970) 101
Photophosphorylation	
in chloroplasts, see <i>Chloroplasts</i>	
cyclic, in <i>Anabaena variabilis</i> , increased rate in presence of diphenylamine	10 (1970) 253
Dio-9 action	3 (1969) 247
Photoreactivation spectrum of co-inhibited taurochenodeoxycholate 6 β -hydrolase system	2 (1968) 124
Photoreduction of flavocoenzymes by pyruvic acid	1 (1968) 335
Photosynthesis	
biophysical aspects of (Meeting report)	6 (1970) 289
chlorophyll catalysis and Einstein's photochemical law	3 (1969) 221
in chloroplasts, see <i>Chloroplasts</i>	
Report of Seminar held in Gwatt, Switzerland 21-26 July 1969	5 (1969) 93
Photosynthetic bacteria, isolation of desmethylmenaquinol derivative	6 (1970) 40
<i>Physarium polycephalum</i> , cyclic-dependent variation of X-ray effects on synchronous mitosis and	
thymidine kinase induction in	10 (1970) 185
Physostigmine on specific binding of acetylcholine to acetylcholinesterase	2 (1968) 77
Phytanic acid in human milk fat, identification by gas chromatography-mass spectrometry	2 (1969) 255
Phytoene, hydroxy-derivatives, occurrence in diphenylamine-inhibited cultures of	
<i>Rhodospirillum rubrum</i>	6 (1970) 334
Phytofluene, hydroxy-derivatives, occurrence in diphenylamine-inhibited cultures of	
<i>Rhodospirillum rubrum</i>	6 (1970) 334
Phytohaemagglutinin (<i>Pisum sativum</i>) precipitation of polysaccharides and red blood cell	
agglutination, relationship between	9 (1970) 345
Phytohaemagglutinins, a new class of metalloproteins	9 (1970) 197

Piericidin A	
effect on energy conservation of site I of <i>Torulopsis utilis</i> mitochondria	1 (1968) 4
sensitivity of α -glycerophosphate oxidase system in muscle mitochondria	10 (1970) 109
sensitivity, relationships with mitochondrial energy conservation site I and EPR spectra in <i>Torulopsis utilis</i>	5 (1969) 207
Pig	
adenylate kinase, purification and properties	10 (1970) 333
articular cartilage, differences in composition and size of protein polysaccharides	4 (1969) 16
heart see <i>Heart, pig</i>	
immunoglobulin	
kappa-chains, sequence of 52 amino acid residues from the constant part	9 (1970) 33
lambda-chains, sequence of <i>N</i> -terminal 46 residues	8 (1970) 269
pi-chains, <i>N</i> - and <i>C</i> -terminal sequences; assignment to the K type	2 (1968) 93
liver	
isocitrate dehydrogenase, oxaloacetate reduction by	7 (1970) 157
long-chain triglyceride lipases	10 (1970) 117
sugar dehydrogenases, chromatographic and electrophoretic evidence	9 (1970) 57
Pietran mitochondria, α -glycerophosphate oxidase system	10 (1970) 109
thyroid cartilage, effect of temperature on chondroitin-4-sulphate synthesis <i>in vitro</i>	9 (1970) 145
Pigeon heart mitochondria, NADH oxidation	2 (1969) 157
Pigeon liver NAD kinase, reaction with bromoacetyl pyridine	5 (1969) 96
Pilocarpine-induced sweat, microdisc electrophoresis of proteins	4 (1969) 28
Ping-pong mechanism in diamine oxidase reaction	4 (1969) 31
<i>Pisum sativum</i> phytohaemagglutinin polysaccharide precipitation, relation to red blood cell agglutination	9 (1970) 345
Pituitary gland from human, lipotropic hormone from	2 (1968) 42
Placenta, human, RNA polymerase Mn^{2+} -dependent	10 (1970) 257
Plant mannosyl lipid acting in reversible transfer of mannose	5 (1969) 81
Plasma	
bovine, hydroxyproline-containing protein	6 (1970) 19
human	
abnormal, identification of the protein moiety of low density lipoprotein in obstructive jaundice	4 (1969) 113
galactosylgalactosylglucosylceramide:galactosyl hydrolase in and its absence in patients with Fabry's disease	7 (1970) 180
low density lipoproteins, effect of sodium dodecyl sulphate	7 (1970) 59
retinol transport in	2 (1969) 146
membranes, rat liver, kinetic properties of the MgATP phosphohydrolase	2 (1969) 317
membranes, rat liver, subfractionation	3 (1969) 237
Plasmin, inhibition by benzyl- and 4'-nitrobenzyl-4-guanidinobenzoate	8 (1970) 170
Plasmocytoma cells, mouse, low buoyant density active complex for protein synthesis	9 (1970) 141
Plastids, plant, lack of phospholipase D activity	9 (1970) 284
Platelets, dependence of 5-hydroxytryptamine uptake on sodium and chloride and inhibition by choline	3 (1969) 103
Poly-A complexing with poly-U, effect on rate of the slow $^1H \rightarrow ^3H$ exchange in adenylic acid	3 (1969) 211
Poly-A, thermodynamics of the melting acid form of	4 (1969) 57
Poly-C-directed <i>in vitro</i> synthesis of C-proline peptides, effect of chloramphenicol	8 (1970) 129
Poly-I and poly-C, evidence of three stranded complex between	1 (1968) 173
Poly-U	
complexing with poly-A, effect on rate of the slow $^1H \rightarrow ^3H$ exchange in adenylic acid	3 (1969) 211
dependent cell-free system of <i>Neurospora crassa</i> , specificity of mitochondrial and cytoplasmic cell-free systems	4 (1969) 140
dependent ribosomal binding of Lys-tRNA ^{lys}	8 (1970) 240
programmed cell-free extracts of <i>E. coli</i> , active complex formation	7 (1970) 217
Polyacrylamide gel	
electrophoresis of RNA	1 (1968) 279
isoelectric fractionation of proteins	1 (1968) 81
molecular weight determination using a linear gel gradient	5 (1969) 221
for separating nucleotides	5 (1969) 185
Polyglycerophospholipids of <i>Euglena gracilis</i>	7 (1970) 259
Polylysine, stimulation of mitochondrial oxidation of quinolphosphate	2 (1969) 327
Poly 2'-O-methyluridylic acid, role in polynucleotide conformation	8 (1970) 52
Polymyxin B-treated <i>E. coli</i> , release of periplasmic RNase	7 (1970) 49
Polynucleotide phosphorylase from <i>E. coli</i> , dADP as substrate	4 (1969) 79
Polynucleotide phosphorylase, immunochemical method for the characterisation of in <i>E. coli</i>	2 (1969) 321
Polynucleotides containing D- or L-ribonucleosides, chemically synthesised, optical properties of	9 (1970) 261
Polynucleotides, single and double stranded, conformation of 4-thiouridine-5'-phosphate	2 (1969) 305

Polypeptide synthesis in cell-free system, new assay using 1-fluoro-2,4-dinitrobenzene	5 (1969)	60
Polypeptide synthesis in <i>E. coli</i> cell-free system by influenza viral protein	7 (1970)	201
Polyphenylalanine synthesis by reassociated fractionated rabbit reticulocyte ribosomal subunits	3 (1969)	348
Polyphosphate groups at the 5'-ends of nuclear dRNA fractions	8 (1970)	186
Poly(L-prolyl-L-prolylglycyl) of defined molecular weights, hydroxylation by protocollagen proline hydroxylase	2 (1969)	221
Polypyrrolic substrate in soybean callus tissue for uroporphyrinogen III cosynthetase	6 (1970)	285
Polyribonucleotide-containing thiophosphate backbone	2 (1969)	262
Polyribonucleotides, analysis at subnanomolar level by conversion to tritiated nucleoside derivatives	2 (1968)	10
Polysaccharides, O-specific of <i>Shigella flexneri</i>	8 (1970)	293
Polysomal cell-free system of thyroid, covalent association of thyroglobulin	8 (1970)	137
Polysome		
attached to membranes of animal cells, function of (Review letter)	7 (1970)	1
<i>E. coli</i>		
chloramphenicol and fusidic acid on	3 (1969)	34
ribosome distribution on isogenic RCstr and RCrel in	6 (1970)	5
rat liver		
binding to microsomal membranes measured by disulphide exchange enzyme, effect of		
aflatoxin B ₁ and steroid hormones	4 (1969)	103
bound peptidyl-tRNA effect of cycloheximide on puromycin reaction	8 (1970)	249
CCl ₄ -induced damage	9 (1970)	93
contamination by non-ribosomal protein	4 (1969)	196
decreased stability after Sephadex gel filtration	9 (1970)	17
isolation centrifugation time and homogenate concentration, effect of fasting	6 (1970)	114
and muscle, isolation in high yield after nitrogen cavitation	2 (1968)	1
Polyvinylpyrrolidone, effect on pepsin <i>in vitro</i>	9 (1970)	194
Porcine		
chymotrypsinogen B	1 (1968)	117
submaxillary gland homogenates, ultrafilterable peptides from	6 (1970)	326
thyroid slices, effect of lecithinase on iodide transport	10 (1970)	219
Porphobilinogenase of soybean callus, negative homotropic kinetics	9 (1970)	180
Porphobilinogen, kinetic studies in bovine liver	3 (1969)	223
Porphyrin		
in liver cell cultures, inducer substances on synthesis	2 (1968)	127
of rat liver erythrocytes and heart, biosynthesis of cobalt porphyrins	6 (1970)	270
tricarboxylic, isolation from rat Harderian gland	6 (1970)	9
Potassium		
on cytochrome oxidase from <i>Halobacterium cutirubrum</i>	7 (1970)	301
dependent stimulation of transcellular migration in normal and neoplastic cells, effect of		
temperature	3 (1969)	343
ion activation of muscle aminohydrolase, time dependence of	2 (1968)	65
on protein synthesis by rabbit reticulocyte ribosomes	6 (1970)	61
uptake into mitochondria induced by valinomycin, associated proton shift	5 (1969)	50
Pregnancy, significance of oxytocinase (Review letter)	4 (1969)	135
Proinsulin and insulin, bovine, comparison of antibodies	8 (1970)	157
Proinsulin, ultracentrifugation of	2 (1968)	130
Prolactin, effect on glucose oxidation pathways in explants from rabbit mammary gland	9 (1970)	177
Proline		
hydroxylation in collagen of chick embryos	2 (1969)	173
iminopeptidases of human saliva, inhibition by benzethonium chloride	2 (1968)	101
oxidase, localisation in rat liver	3 (1969)	283
¹⁴ C-peptides synthesised <i>in vitro</i> directed by poly-C, effect of chloramphenicol	8 (1970)	129
peroxidation, products of	4 (1969)	200
Propionate activation in rat kidney	5 (1969)	57
<i>Propionibacterium peterssonii</i> , glycine crosslinkages in LL-diaminopimelic acid containing		
murein of	1 (1968)	287
<i>Propionibacterium shermanii</i> vitamin B ₁₂ synthesis, riboflavin as precursor of 5,6-dimethyl-		
benzimidazole moiety	6 (1970)	187
Prostaglandin E ₂ , stimulatory effect on adenylyl cyclase in the bovine corpus luteum	7 (1970)	283
Prostaglandins, biosynthesis in rabbit renal medulla	5 (1969)	127
Protamine, displacement by for ribosomal protein extraction	1 (1968)	16
Protamine-inhibited respiration by rat liver mitochondria, effect of some proton conducting systems	8 (1970)	149
Protein		
chemistry (Review letter)	1 (1968)	197
films, relation between molecular weight and area of films immobilised on PVC membranes	9 (1970)	117
hydrolysis during dialysis and ultrafiltration	6 (1970)	89
isoelectric fractionation on polyacrylamide gels	1 (1968)	81
isolation of C-terminal fragments	6 (1970)	34
polysaccharides from pig articular cartilage, differences in composition and size	4 (1969)	16

synthesis	
in mitochondria, see <i>Mitochondria</i>	
in mouse plasmocytoma cells, a low buoyant density active complex	9 (1970) 141
in murine leukemia cells, effect of L-asparaginase	10 (1970) 85
by ribosomes, see <i>Ribosomes</i>	
in synaptosomes	10 (1970) 273
Proteolipid from cerebral cortex, interaction with atropine sulphate studied by light scattering measurements	4 (1969) 4
Protocollagen hydroxylase, stability studies of	1 (1968) 223
Protocollagen proline hydroxylase, hydroxylation of poly(L-prolyl-L-prolylglycyl) of defined molecular weights	2 (1969) 221
Proton transfer of vitamin B ₆ compounds	5 (1969) 327
<i>Pseudomonas aeruginosa</i>	
effect of a constitutive mutant on rapidly-labelled RNA	2 (1969) 273
two regions in polysaccharide moiety of lipopolysaccharide	9 (1970) 81
tRNA ^{Met}	8 (1970) 9
<i>Pseudomonas putida</i> , glyceraldehyde-3-phosphate dehydrogenase in	3 (1969) 65
<i>Pseudomonas sphaeroides</i> ribosomes, poly U-dependent binding of Lys-tRNA ^{Lys}	8 (1970) 240
Psoralen and DNA, inter-strand crosslinkages occurring in the photoreaction between	9 (1970) 121
Psychosine, enzymic synthesis in Jimpy mouse brain	3 (1969) 199
Pteroylglutamates and methionine synthesis in isolated chloroplasts	7 (1970) 267
Pullulan, relation between molecular weight and fine structure	10 (1970) 190
Pullulanase, mechanism of action	5 (1969) 85
Purine deoxyribonucleotide formation, evidence for more than one pathway	1 (1968) 35
Purine nucleoside interaction with actinomycin C ₁	3 (1969) 330
Puromycin in conversion of cholesterol into bile acids in bile fistula rats	1 (1968) 219
Puromycin reaction with polysome-bound peptidyl tRNA, effect of cycloheximide in rat liver	8 (1970) 249
Pyruvate dehydrogenase from heart, inactivation by ATP and reactivation by magnesium	3 (1969) 271
Pyridine nucleotide	
dependent dehydrogenases (Meeting report)	8 (1970) 309
rat ganglion, redox transitions	8 (1970) 297
in yeast, synthesis of	4 (1969) 167
Pyridoxine, alternative requirements for in <i>E.coli</i> mutants	5 (1969) 225
Pyrimidine biosynthesis, effect of mitochondria on terminal stages of	3 (1969) 147
Pyrimidine cyclonucleosides, n- π^* transitions	7 (1970) 337
Pyroglutamic acid residue, mass spectrometry analysis of proteins with N-terminal pyroglutamic acid residue	4 (1969) 25
Pyrophosphate content of adult guinea-pig liver	2 (1969) 209
Δ -Pyrroline-5-carboxylic acid dehydrogenase, localisation in rat liver	3 (1969) 283
Pyruvate	
acetate formation from in house fly flight muscle mitochondria	10 (1970) 292
carboxylase	
control by bivalent cations	10 (1970) 33
distribution of in human liver	2 (1968) 26
in perfused rat liver, suppression	8 (1970) 91
reinterpretation of kinetics	2 (1969) 245
decarboxylase	
of <i>E.coli</i> , subunit structure of	6 (1970) 257
in mitochondria, Mn stimulation	6 (1970) 93
yeast, allosteric properties	9 (1970) 293
yeast cytoplasm, amino acid composition	4 (1969) 275
yeast cytoplasm, subunit size	4 (1969) 273
kinase	
elution from CM-cellulose columns by its allosteric effector	4 (1969) 307
lactate dehydrogenase system of rabbit muscle, transient time of, <i>in vitro</i>	9 (1970) 73
of <i>Mucor rouxii</i> , activation by manganese ions	6 (1970) 213
from rat liver, activation by fructose-1-phosphate	6 (1970) 43
lactate dehydrogenase inhibition	3 (1969) 333
photoreduction of flavoenzymes by	1 (1968) 335
synthesis	
from acetyl-CoA and carbon dioxide with NADH or NADPH as electron donors	2 (1969) 342
in <i>Clostridium kluyveri</i> , glyoxylate inhibition	9 (1970) 271
Quinol phosphate, stimulation of mitochondrial oxidation by polylysine	2 (1969) 327
Rabbit	
arsonic antibody, N-terminus of light chains of	7 (1970) 99
chromatins, role of non-histone components in determining organ specificity	9 (1970) 242
ileum, counter transport between sugars and amino acids	8 (1970) 153
immunoglobulin G light chains with allotypes, C-terminal sequence of	3 (1969) 341

locus <i>a</i> , cross reaction between allotype markers Aa1 and Aa2	2 (1969) 233
mammary gland explants, effect of prolactin on glucose oxidation	9 (1970) 177
muscle	
aldolases, amino acid sequences	10 (1970) 49
phosphorylase <i>b</i> , slow transition leading to cooperative binding of 5'-AMP at 5°	9 (1970) 152
transient time of pyruvate kinase-lactate dehydrogenase system <i>in vitro</i>	9 (1970) 73
renal medulla, prostaglandin biosynthesis	5 (1969) 127
reticulocyte	
oscillation in the rate of haemoglobin synthesis	2 (1969) 217
ribosomal subunits, fractionated, reassociation into particles active in polyphenylalanine synthesis	3 (1969) 348
ribosomes, interaction of haemoglobin messenger RNP with the small subparticle	9 (1970) 331
ribosomes, protein synthesis in	6 (1970) 61
transferrin, isoelectric fractionation of	3 (1969) 193
Radiation-induced DNA radicals, covalent binding of an organic nitroxide free radical	8 (1970) 33
<i>Rana esculenta</i> haemoglobin, see <i>Haemoglobin, Rana esculenta</i>	
Rapid reaction techniques, recent advances in the study of biological systems (Review letter)	3 (1969) 161
Rat adipose tissue (brown), fatty acid synthesis in cell sap and mitochondria	6 (1970) 241
Rat adipose tissue (white), effect of insulin on fatty acid synthesis <i>in vivo</i>	5 (1969) 351
Rat bile fistula, effect of actinomycin D and puromycin on the conversion of cholesterol into bile acids	1 (1968) 219
Rat brain mitochondria, see <i>Mitochondria, brain</i>	
Rat diaphragm, isolated, effect of insulin on adenylate kinase and glycolysis in absence of added glucose	9 (1970) 317
Rat ganglion, isolated, redox transitions of cytochromes and pyridine nucleotides	8 (1970) 297
Rat Harderian gland, isolation of tricarboxylic porphyrin	6 (1970) 9
Rat heart, biosynthesis of cobalt porphyrins	6 (1970) 270
Rat heart, effect of synthetic corticosteroids on RNase	4 (1969) 37
Rat hepatoma nucleoli devoid of perinucleolar chromatin, isolation in high ionic strength medium	6 (1970) 329
Rat intestinal alkaline phosphatase	7 (1970) 86
Rat kidney cell suspensions, glucose synthesis in	3 (1969) 31
Rat kidney, propionate activation in	5 (1969) 57
Rat levator ani, testosterone action on sugar metabolism	4 (1969) 197
Rat liver	
adenine nucleotides, effect of ethanol	2 (1968) 121
aminoacyl-tRNA synthesis, effect of cholesteryl esters	9 (1970) 161
asparaginase, inhibitors of	3 (1969) 313
cell-free extracts, impairment of albumin synthesis	6 (1970) 137
CoA-SS-glutathione reductase, NADPH-dependent, active site of	7 (1970) 227
corticosteroids (synthetic) on RNase	4 (1969) 37
L-cysteine-glutathione mixed disulphide reduction of	7 (1970) 26
cytochrome <i>c</i> , subcellular distribution of	2 (1968) 105
cytoplasm, light ribonucleoprotein particles	2 (1969) 230
cytoplasmic RNA non-ribosomal, incorporation of labelled 5-fluoroorotate	6 (1970) 206
cytosol phosphoproteins, isolation and enzymatic phosphorylation of	5 (1969) 77
DNA nuclear, zonal centrifugation studies of labelling patterns	5 (1969) 180
DNA, template activity in rats fed with malondialdehyde	3 (1969) 205
endoplasmic reticulum, cytoplasmic location of certain small molecules after their metabolism	10 (1970) 306
erythrocytes, biosynthesis of cobalt porphyrins	6 (1970) 270
fatty acid synthesis <i>in vivo</i> , importance of different cellular fractions	2 (1969) 289
ferritin content of free ribosome content	1 (1968) 308
glutaminase allosteric, regulatory significance of	1 (1968) 317
glycolysis and gluconeogenesis switch mechanism in regulation of	6 (1970) 171
glycyl-tRNA synthetase in	6 (1970) 65
hexokinase and glucokinase, distribution between parenchymal and non-parenchymal cells	3 (1969) 68
homogenate, ultrafilterable peptides	6 (1970) 321
homoserine dehydratase	4 (1969) 231
gluconeogenesis from lactate-2-T- ¹⁴ C	4 (1969) 33, 47
glycogen metabolism in	2 (1969) 154
and haemoglobin-free, reduction kinetics and content of cytochrome <i>P</i> -450 determined by dual wavelength techniques	2 (1969) 167
phenobarbital induction, amobarbital action on microsomal and mitochondrial respiratory state	2 (1969) 170
pyruvate carboxylase suppression	8 (1970) 91
redox potential of extramitochondrial NADP(H) system mixed function oxidations	9 (1970) 205
hormone and fasting on free amino acid level	2 (1968) 97
hydroxymethylglutaryl-CoA reductase	4 (1969) 117
insulin and diet, effect of, on steady state concentrations of intermediates of pentose phosphate pathway	1 (1968) 227

lysosomes, nucleoside diphosphatase in	5 (1969) 355
lysosomes, preparation of	5 (1969) 233
lipase, effect of glucocorticosteroid (triamcinolone diacetate) and dibutyryl adenosine-3', 5'-(cyclic) monophosphate on	10 (1970) 301
microsomes, see <i>Microsomes, rat liver</i>	
mitochondria, see <i>Mitochondria, liver (rat)</i>	
monoamine oxidase, isoenzymes of	1 (1968) 215
NAD synthetase	9 (1970) 183
nuclear DNA polymerase, role of and distribution in various classes of liver nuclei	10 (1970) 113
nuclear envelopes, respiration in	5 (1969) 34
nuclear RNA, after adrenalectomy, Cd^{2+} , Mn^{2+} and Zn^{2+} -induced synthesis	10 (1970) 169
nuclei, see <i>Nuclei, rat liver</i>	
nucleotides, free, heterogeneity of ^{32}P -phosphate incorporation into αPi	2 (1969) 141
peptidyl tRNA translocases and specificity of factors required for peptide elongation perfused	10 (1970) 159,163
with galactosamine, changes in uridine nucleotides	4 (1969) 278
glucagon on state of lysosomal enzymes	10 (1970) 215
plasma membranes, kinetic properties of MgATP phosphohydrolase	2 (1969) 317
plasma membranes, subfractionation	3 (1969) 237
polysomes, see <i>Polysomes, rat liver</i>	
proline oxidase and Δ -pyrroline-5-carboxylic acid dehydrogenase localisation	3 (1969) 283
protein factor inhibiting lipase activity of pancreas	9 (1970) 119
protein, diurnal incorporation of leucine	10 (1970) 78
pyruvate kinase, activation by fructose-1-phosphate	6 (1970) 43
ribonucleoprotein particles, 40 S properties of proteins	4 (1969) 327
ribosomes, see <i>Ribosomes, rat liver</i>	
dRNA nuclear fractions, polyphosphate groups at 5' ends	8 (1970) 186
RNA synthesis after <i>in vivo</i> cortisol treatment as detected by DNA hybridisation	8 (1970) 61
L-serine dehydratases evidence for two forms of	2 (1969) 298
serine dehydratase, reversible inactivation by its substrates	7 (1970) 29
slices, effect of aerobic preincubation on anaerobic glycogenolysis	6 (1970) 31
slices, haemin stimulation of cytochrome c synthesis	7 (1970) 248
slices, inhibition of glucuronide synthesis by physiological metabolites	6 (1970) 177
testosterone and androst-4-ene, 14α -hydroxylation of	1 (1968) 269
transfer RNA, see <i>Transfer RNA, rat liver</i>	
tyrosine aminotransferase	
after adrenalectomy, selective repression of tryptophan or benzoate-mediated induction by phenolamine	8 (1970) 316
after adrenalectomy, glucose and phenolamine repression of thiophylline-induced	9 (1970) 105
α -amanitin inhibition of cortisol-induced	9 (1970) 103
multiple forms of	5 (1969) 89; 6 (1970) 46
xanthine oxidase, activation by proteolytic enzymes	2 (1968) 83
Rat mucosa in methanol, formation of methyl esters by	2 (1969) 265
Rat muscle	
AMP aminohydrolase, reaction with metal ions	10 (1970) 101
hormones and fasting on concentrations of free amino acids and rate of protein autolysis	2 (1968) 97
mitochondria, preparation without the use of a homogeniser	8 (1970) 109
Rat seminal vesicle, increased yield of ribosome dimers following castration	8 (1970) 337
Rat skin collagen, restricted reactivity of side-chain amino groups towards formaldehyde	9 (1970) 49
Rat skin collagen, two antigenic determinants in C-terminal region	9 (1970) 11
Rat small intestine, insulin deficiency on glucose transport	2 (1969) 193
Rat small intestine, isolation of brush borders	1 (1968) 46
Recombination, molecular basis of (Meeting report)	10 (1970) 73
Rectal gland of spiny dogfish, sphingolipid composition, sulphatides and sodium ion transport of	2 (1968) 4
Renal medulla of rabbit, prostaglandin biosynthesis	5 (1969) 127
Respiratory control in membrane particle from <i>Micrococcus denitrificans</i>	10 (1970) 246
Respiratory control in mitochondria, see <i>Mitochondria</i>	
Reticulocytes	
cobalt on globin and haem synthesis	9 (1970) 61
mouse, RNA fractionation by polyacrylamide gel electrophoresis	1 (1968) 279
rabbit	
haemoglobin synthesis, oscillations in the rates of	2 (1969) 217
ribosomal subunits, fractionated, reassociation into particles active in polyphenylalanine synthesis	3 (1969) 348
ribosomes, interaction of haemoglobin messenger RNP with the small subparticle of	9 (1970) 331
ribosomes, protein synthesis in	6 (1970) 61

Retina, free nucleotides of	8 (1970) 119
Retinol, a fluorescent probe for membrane lipids	9 (1970) 287
Retinol transport in human plasma	2 (1969) 146
Review letters 1 (1968) 83,197; 1(1969) 203; 3(1969) 161; 4 (1969) 135; 5(1969) 1,241,305; 6 (1970) 145; 7 (1970) 1,8; 8 (1970) 1,69; 9 (1970) 245.	
<i>Rhodomicrobium vannielii</i> acetoacetyl-CoA reductase, activation by Hg ²⁺	5 (1969) 246
<i>Rhodopseudomonas spheroides</i>	
acetate utilisation of	4 (1969) 52
acetoacetyl-CoA reductase, activation by Hg ²⁺	5 (1969) 246
chromatophores, high-energy state	4 (1969) 185
5,6-dimethylbenzimidazolyl cobamide coenzyme, isolation from	10 (1970) 249
<i>Rhodospirillum rubrum</i>	
chromatophores, partial resolution of energy-linked reactions in	3 (1969) 27
glyoxylate formation from α -hydroxyglutarate	7 (1970) 271
homoserine dehydrogenase from	3 (1969) 44
phytoene and phytofluene hydroxy-derivatives in cultures inhibited by diphenylamine	6 (1970) 334
<i>Rhodotorula gracilis</i> , enzymes of	3 (1969) 322
Riboflavin	
biosynthesis, mutants accumulating 6-hydroxy-2,4,5-triaminopyrimidine	5 (1969) 316
photooxidation of acridan derivative	7 (1970) 101
precursor in the biosynthesis of 5,6-dimethylbenzimidazole moiety of vitamin B ₁₂	6 (1970) 187
Ribonuclease	
<i>E. coli</i> periplasmic, release into the medium from <i>E. coli</i> treated with polymyxin B pancreas	8 (1970) 49
<i>N</i> -acetylhomocysteinyl-substituted, inhibition by Ag ⁺	8 (1970) 243
conformational transitions of S-peptide	1 (1968) 298
2',3'-O, O-cyclophosphorothioate as substrate	2 (1968) 851
digestion products of <i>E. coli</i> ribosomal RNA, nucleotide sequences of	7 (1970) 51
spectrophotometric assay of	1 (1968) 29
rat heart, effect of synthetic corticosteroids	4 (1969) 37
Ribonucleoprotein light particles in rat liver cytoplasm	2 (1969) 230
Ribonucleoprotein particles, 40 S, of rat liver, properties of protein	4 (1969) 327
Ribonucleoside triphosphates, free, in mouse liver after α -amanitin injection	6 (1970) 295
Ribosomes	
aminopeptidase bound in <i>E. coli</i> , role in protein synthesis	6 (1970) 235
<i>Bacillus stearothermophilus</i> , GTP on dissociation of 70 S	4 (1969) 331
chick embryo, aggregates in tissues after exposure to low temperature	6 (1970) 128
<i>E. coli</i>	
aminopeptidase bound, role in protein synthesis	6 (1970) 235
5-azacytidine on synthesis	1 (1968) 55
50 S, characterisation of an acidic protein	8 (1970) 192
dense internal region in 50 S subparticles	9 (1970) 324
70 S, dissociation by enzymatic digestion	9 (1970) 97
70 S, GTP on dissociation	4 (1969) 331
initiation factors	6 (1970) 297
on membrane-bound enzyme catalysing thiol-disulphide interchange, activity of	2 (1968) 133
peptidyltransferase centre	5 (1970) 273 ; 7 (1970) 112
programmed with viral tRNA, requirements for tRNA binding	5 (1969) 313
protein altered in spectinomycin resistant mutant	6 (1970) 69
protein, new approach to fractionation	7 (1970) 214
proteins, secondary structure studied by circular dichroism	8 (1970) 197
protein stripping of	2 (1968) 13
mRNA and aminoacyl-tRNA binding to, method of measuring fast kinetics of	2 (1969) 293
30 S, mRNA binding to	6 (1970) 315
RNA, specific dimer formation with viral RNA in the presence of formaldehyde	7 (1970) 55
RNA, nucleotide sequence (3'-terminal)	6 (1970) 102
RNA, nucleotide sequences of pancreatic RNA digestion products	7 (1970) 51
subunits, interaction with Ac-Phe-tRNA, sparcomycin-induced complex formation	7 (1970) 103,109
subunits, interconversion between inactive and active forms	3 (1969) 85
30 S subunits, association of a polypeptide initiation factor	3 (1969) 50
termination ribosomes as 70 S particles	10 (1970) 153
<i>Euglena gracilis</i> , cytoplasmic and chloroplast	10 (1970) 149
mitochondrial	
<i>Candida utilis</i> , isolation	3 (1969) 177
<i>Neurospora crassa</i> , specificity of poly-U dependent cell-free system	4 (1969) 140
<i>Saccharomyces cerevisiae</i> mitochondria	4 (1969) 234
mouse myeloma, incorporation of hexosamine into glycoprotein in	8 (1970) 6
muscle (skeletal), peptidyl-tRNA and peptidyl transferase activity, effect of diabetes	10 (1970) 35

<i>Neurospora crassa</i> in poly-U dependent cell-free systems, specificity of peptidyltransferase centre	4 (1969) 140
proteins	6 (1970) 273 ; 7 (1970) 112
alteration in spectinomycin-resistant <i>E. coli</i> mutant	6 (1970) 69
extraction by displacement with protamine	1 (1968) 16
new approach to fractionation	7 (1970) 214
proteins, secondary structure studied by circular dichroism	8 (1970) 197
stripping	2 (1968) 13
synthesis after treatment with KCl (rabbit reticulocyte)	6 (1970) 61
<i>Pseudomonas spheroides</i> , poly-U-dependent binding of Lys-tRNA ^{Lys}	8 (1970) 240
rat liver	
ferritin content	1 (1968) 308
phosphorylation of proteins and activation by cyclic AMP	10 (1970) 105
proteins, extraction by displacement with protamine	1 (1968) 16
removal of structural proteins by treatment with sodium deoxycholate in the presence of EDTA	7 (1970) 211
subunit protein, partial separation by carboxymethyl-cellulose column chromatography	5 (1969) 68
reticulocyte	
protein synthesis after treatment with KCl	6 (1970) 61
small subparticle, interaction of haemoglobin messenger RNP with	9 (1970) 331
subunits fractionated, reassociation into particles active in polyphenylalanine synthesis	3 (1969) 348
RNA	
<i>E. coli</i> , nucleotide sequences of pancreatic ribonuclease digestion products	7 (1970) 51
<i>E. coli</i> , nucleotide sequence (3'-terminal)	6 (1970) 102
<i>E. coli</i> , specific dimer formation with viral RNA in the presence of formaldehyde	7 (1970) 55
mammalian cells, chain length of	1 (1968) 104
2 mouse cell lines	3 (1969) 306
seminal vesicles, increased yield after castration	8 (1970) 337
<i>Streptomyces aureofaciens</i> B-96, aureovocin binding	5 (1969) 131
tonsils (human) catalysis of peptidyl transfer by	6 (1970) 198
Rifampicin	
on algae	9 (1970) 171
on rat liver mitochondrial RNA polymerase	10 (1970) 54
resistant RNA polymerase from <i>E. coli</i> altered in the β -subunit	5 (1969) 104
on yeast RNA polymerase	7 (1970) 220
Rifamycin, effect on algae	9 (1970) 171
Rifamycin insensitivity of RNA synthesis in yeast	6 (1970) 58
Rotenone, effect of on energy conservation of site I of <i>Torulopsis utilis</i> mitochondria	1 (1968) 4
Rotenone, sensitivity of α -glycerophosphate oxidase system in muscle mitochondria	10 (1970) 109
RNA	
<i>Agrobacterium tumefaciens</i> , release into tomato cells and transcription of host cell DNA	8 (1970) 349
bone marrow, binding to histones, effect of chromatin acidic proteins	8 (1970) 133
complexes with distamycin A and netropsin, optical rotational dispersion of	10 (1970) 339
<i>E. coli</i>	
(mRNA) binding to 30 S ribosomes	6 (1970) 315
(mRNA) binding to ribosomes, method of measuring fast kinetics	2 (1969) 293
release into tomato cells and transcription of host cell DNA	8 (1970) 349
synthesis, inhibition by diamine	9 (1970) 100
viral-infected, inhibition of synthesis by levallorphan	6 (1970) 190
Ehrlich ascites tumours, effect of echinomycin and olivomycin on synthesis	5 (1969) 73
<i>Euglena gracilis</i> , isolation of DNA complex	7 (1970) 217
HeLa cell microsomes	6 (1970) 83
islets of Langerhans, synthesis in relation to glucose stimulation of proinsulin synthesis	10 (1970) 165
mammalian tissues, unequal 32P-labelling of 5'-nucleotides	6 (1970) 52
mitochondria, rat liver, thyroid hormone stimulation of synthesis	10 (1970) 269
(dRNA) nuclear fractions, rat liver, polyphosphate groups at the 5'-ends	8 (1970) 186
nuclei, rat liver, Cd ²⁺ , Mn ²⁺ and Zn ²⁺ -induced synthesis in normal and adrenalectomised rats	10 (1970) 169
nuclei, rat liver, zinc induction of synthesis	7 (1970) 356
<i>Pseudomonas aeruginosa</i> , effect of constitutive mutant on labelling	2 (1969) 273
reticulocyte, mouse, fractionation by polyacrylamide gel electrophoresis	1 (1968) 279
rat liver, non-ribosomal cytoplasmic, incorporation of 5-fluoroorotate	6 (1970) 206
rat liver, synthesis in cortisol-treated rats as detected by DNA hybridisation	8 (1970) 61
ribosomal, see <i>Ribosomal RNA</i>	
(5 S) <i>Salmonella typhimurium</i> , denaturation by MAK chromatography at 35°	8 (1970) 45
toluidine blue complexes studied by gel electrophoresis and spectrophotometry	4 (1969) 143
transfer, see <i>Transfer RNA</i>	
viral	
bacteriophage MS2, sequence of 5'-tetranucleotide	1 (1968) 93

bacteriophage MS2, 3'-terminal nucleotide sequence	9 (1970) 222
dimer formation of ribosomal and viral in the presence of formaldehyde	7 (1970) 55
encephalomyocarditis virus, circular structures in preparation of the replicative form	8 (1970) 13
programmed <i>E. coli</i> ribosomes, requirements for formylmethionyl-tRNA binding	5 (1969) 313
levallophan inhibition	6 (1970) 190
yeast	
analysis at the subnanomolar level by conversion to tritiated nucleoside derivatives	2 (1968) 10
high resolution mapping of tritium labelled derivatives	5 (1969) 31
synthesis, insensitivity to rifampicin	6 (1970) 58
RNA polymerase	
from <i>E. coli</i> and <i>Anacystis nidulans</i> , differential transcription of T4-DNA by	3 (1969) 76
<i>Bacillus megaterium</i> , substrate-dependent heterogeneity of initiation	9 (1970) 186
<i>Bacillus subtilis</i> , isolation of a stimulating factor	5 (1969) 288
<i>Bacillus thuringiensis</i> exotoxin inhibition	8 (1970) 233
calf thymus, amanitin binding	9 (1970) 258
human placenta, Mn ²⁺ -dependent	10 (1970) 257
<i>E. coli</i>	
6-chloro-8-aza-9-cyclopentylpurine inhibition	7 (1970) 119
dissociation in LiCl	6 (1970) 339
dissociation and reconstitution	8 (1970) 236
distamycin A on structure and template activity	7 (1970) 90
DNA breakage in the region bound to RNA polymerase <i>in vitro</i>	2 (1968) 53
rifampicin-resistant, altered in the β -subunit	5 (1969) 104
showdomycin inhibition	7 (1970) 125
structure and properties of subunits	3 (1969) 260
transcription of T4-DNA by	3 (1969) 76
unprimed synthesis of polymers with	8 (1970) 205
UV absorption spectrum	9 (1970) 255
rat liver mitochondria, effect of rifampicin	10 (1970) 54
rat liver nuclei	
assay nuclei treated with α -amanitin	8 (1970) 57
cortisol and actinomycin D on	1 (1968) 275
cortisol stimulation <i>in vitro</i> ; independent effects on the acetylation and methylation of histones	3 (1969) 99
yeast, effect of α -amanitin and rifampicin	7 (1970) 220
yeast, photoinactivation by furocoumarins	10 (1970) 29
Saccharide binding to hen egg-white lysozyme, fluorescence study of binding dynamics	10 (1970) 241
<i>Saccharomyces carlsbergensis</i> , or <i>cerevisiae</i> , see Yeast	
Salicylate	
binding to albumin	1 (1968) 332
hydroxylase reaction kinetics	6 (1970) 305
reduction catalysed by arylaldehyde:NADP oxidoreductase, enzyme-substrate complex	5 (1969) 177
uptake into mycobactin S by growing cells of <i>Mycobacterium smegmatis</i>	10 (1970) 309
Saliva, human, inhibition of arylaminopeptidases and proline iminopeptidases by benzethonium chloride	2 (1968) 101
<i>Salmonella typhimurium</i> , denaturation of 5 S RNA by MAK chromatography at 35°	8 (1970) 45
Sciatic nerve, encephalitogenic basic protein from	4 (1969) 9
Scorpion neurotoxins, a family of homologous proteins	10 (1970) 349
Seedlings, lupin, glutamine-dependent asparagine synthetase	19 (1970) 62
Selenonicotinamide-adenine dinucleotide phosphate, an analogue of NADP	2 (1969) 267
Seminal vesicles, rat, increased ribosomal yield after castration	8 (1970) 337
Sephacrose 4B chromatography, molecular weight determination by	2 (1969) 242
Sequence analysis	
aldolase active sites, rabbit and sturgeon muscle	10 (1970) 49
Bence-Jones proteins Rad, Fr 4 and B 6	2 (1969) 301
cold agglutinin kappa chain N-terminal	2 (1968) 36
fibrinogen (human), N-terminal	7 (1970) 143
haemoglobin, <i>Rana esculenta</i> , see Haemoglobin, <i>Rana esculenta</i>	
immunoglobulins	
human γ -1 chain of allotype Gm(a ⁻ f ⁺), N-terminal	5 (1969) 20
mouse Ig2a, variable region	8 (1970) 265
pig λ -chains, N-terminal	8 (1970) 269
pig κ -chain, 52 residues of constant part	9 (1970) 33
rabbit light chain C-terminal, correlation with allotypes	3 (1969) 341
mass spectrometric determination of amino acid sequence	7 (1970) 8 ; 8 (1970) 207
neocarzinostatin, N- and C-terminal	9 (1970) 301
pepsin, around active aspartyl residue	1 (1968) 211
phenylalanyl-tRNA from <i>E. coli</i>	3 (1969) 275 ; 6 (1970) 77

rabbit arsonic antibody, <i>N</i> -terminal	7 (1970)	99
RNA		
5 S from two mouse cell lines	3 (1969)	306
MS2. 5'-terminal	1 (1968)	93
MS2. 3'-terminal	9 (1970)	222
16 S ribosomal, <i>E. coli</i> , pancreatic digestion products	7 (1970)	51
23 S ribosomal, <i>E. coli</i> , 3'-terminal	6 (1970)	102
thiolase, around reactive cysteine residues	1 (1968)	150
Serine		
<i>O</i> -acylation by <i>N</i> α -acylamino acid amides	4 (1969)	255
dehydratase		
in <i>E. coli</i>	6 (1970)	73
in rat liver, evidence for two forms	2 (1969)	298
rat liver, reversible inhibition by its substrates	7 (1970)	29
tRNA		
co-crystallisation with Cd and Cu ions in water-dioxane	2 (1968)	112
conformational model proposed on the basis of electron microscopy	3 (1969)	182
from <i>E. coli</i> , characterisation of 2-thiocytidine	7 (1970)	207
Serum		
albumin from humans, dissociation constants for binding of bilirubin	5 (1969)	112
humans, glycyl peptidase in	4 (1969)	42
proteins, mice, effect of cobalt on electrophoretic patterns	9 (1970)	277
Sheep brain 5'-nucleotidase, effect of pH on allosteric properties of	7 (1970)	129
<i>Shigella flexneri</i> 1 b(I) and smooth mutant Z(III), <i>O</i> -specific polysaccharides	8 (1970)	293
Showdomycin inhibition of <i>E. coli</i> RNA polymerase	7 (1970)	125
Sialidase, effect on blood group specificity of hog submaxillary glycoproteins	8 (1970)	353
Sialoglycoproteins, in developing rat brain	9 (1970)	267
Silkgland of <i>Bombyx mori</i> , functional adaptation of tRNAs to fibroin synthesis	7 (1970)	327
Silver ions, inhibition of <i>N</i> -acetylcysteinyl-RNase	8 (1970)	243
Skeletal muscle,		
role of fructose-1, 6-diphosphatase in regulation of glycolysis	7 (1970)	195
resolution of activities of 5'-mononucleotidase and non-specific phosphatases	2 (1969)	189
ribosomes, peptidyl-tRNA and peptidyltransferase activity, effect of diabetes	10 (1970)	35
Skin, calf, see <i>Calf skin</i>		
Skin collagen, rat, 2 antigenic determinants in C-terminal region	9 (1970)	11
Skin collagen, rat restricted reactivity of side-chain amino groups towards formaldehyde	9 (1970)	49
Slime from 3 species of myxomycetes, chemical composition of	7 (1970)	80
Small intestine of rat, insulin deficiency on glucose transport by	2 (1969)	193
Small intestine of rat, isolation of brush borders	1 (1968)	46
Snake venom phosphodiesterase hydrolysis of uridylic oligonucleotides, kinetics of	2 (1969)	185
Sodium		
on cytochrome oxidase from <i>Halobacterium cutirubrum</i>	7 (1970)	301
dodecyl sulphate, effect of low density lipoproteins of human plasma	7 (1970)	59
on 5-hydroxytryptamine uptake by blood platelets	3 (1969)	103
ion transport, sphingolipid composition of the rectal gland of the spiny dogfish	2 (1968)	4
ions, affinity of antamanide for	9 (1970)	89
Soybean		
callus porphobilinogenase, negative homotropic kinetics	9 (1970)	180
callus tissue, effect of succinyl-CoA isolated from on tetrapyrrole synthesis	9 (1970)	30
callus tissue, polypyrrolic substrate for uroporphyrinogen III cosynthetase	6 (1970)	285
trypsin inhibitor C, an active derivative composed of two non-covalently bonded peptide fragments	10 (1970)	313
Sparcomycin-induced complex formation in <i>E. coli</i> ribosomes	7 (1970)	103, 109
Specificity factors for peptide elongation in rat liver and human tonsil	10 (1970)	163
Spectinomycin resistant <i>E. coli</i> , mutant, altered ribosomal protein	6 (1970)	69
Spermine on nuclear nucleosidase in Ehrlich ascites cells	1 (1968)	295
Sphingolipid composition of the rectal gland of the spiny dogfish	2 (1968)	4
Spin probes for binding site polarity	8 (1970)	286
Spin-spin coupling constants of ADP and ATP as determined by phosphorus NMR spectra	8 (1970)	125
Spinach chloroplasts, see <i>Chloroplasts, spinach</i>		
Spiny dogfish rectal gland, sulphatides and sodium ion transport, sphingolipid composition of the rectal gland of	2 (1968)	4
<i>Spirodela oligorrhiza</i> , glycolipids and fatty acids of normal and glucose enriched cultures of	5 (1969)	335
Spleen		
bovine, proteolytic activity at neutral pH	1 (1968)	69
horse apoferritin, structure of	6 (1970)	134
guinea-pigs, a chondroitin sulphate protein from Kurloff cells from	4 (1969)	343
Staphylococcal		
nuclease, use of affinity chromatography for purification of affinity labelled peptides from	7 (1970)	161

PEP-dependent phosphotransferase system, solubilisation of the membrane-bound lactose specific component	8 (1970) 277
α -toxins, swelling induced in rat liver mitochondria by thermostable factor of	7 (1970) 35
Starch	
debranching enzymes, specificity	9 (1970) 136
incomplete conversion by crystalline dextrin-1,6-glucosidase	9 (1970) 85
oligosaccharides containing single glucose side chains, action of pancreatic amylase on	5 (1969) 257
Stearate desaturation by microsomes on the locust fat-body	2 (1969) 286
Stearoyl-CoA desaturase of rat liver microsomes	1 (1968) 320
Stereochemistry of glutamate biosynthesis in <i>Clostridium kluyveri</i>	1 (1968) 74
Stereoselective reactivity of SH-groups of yeast glyceraldehyde dehydrogenase	1 (1968) 25
Stereospecificity of NADP-linked reactions in rat liver microsomes	1 (1968) 89
Steroid	
hormones, effect on polysome binding to microsomal membranes as measured by an enzyme catalysing disulphide exchange	4 (1969) 103
11 β -hydroxylase distribution in membranes of beef adrenal cortex mitochondria	5 (1969) 135
in newborns and infants	3 (1969) 129
in newborns and infants, identification of 20,22-dihydroxycholesterol from the mono- and disulphate fraction of human meconium	5 (1969) 99
Stomach, ox, creatine kinase, isolation of isozyme BB	10 (1970) 57
<i>Streptococcus thermophilus</i> aminoacyl-tRNA synthetases, formation	9 (1970) 252
<i>Streptomyces aureofaciens</i> B-96, aureovocin binding to ribosomes	5 (1969) 131
<i>Streptomyces noursei</i> , isolation of 2-oxoglutarate aminotransferase from	1 (1968) 262
Sturgeon muscle aldolase, amino acid sequence	10 (1970) 49
Submaxillary glands	
bovine and porcine, homogenates, ultrafilterable peptides from	6 (1970) 326
hog, glycoproteins, effect of sialidase on blood group specificity	8 (1970) 353
ovine, effect of acetyl choline and atropine on labelling of smooth and rough membranes	5 (1969) 107
Submitochondrial particles, see <i>Mitochondria</i>	
Succinate dehydrogenase	
endor studies of the covalently bound flavin at the active centre	5 (1969) 237
flavocoenzyme, structure of	3 (1969) 37
on glycerol-1-phosphate oxidation in liver mitochondria from thyroxine-treated rats	5 (1969) 299
incorporation into fatty acids of rat liver microsomes <i>in vitro</i>	7 (1970) 32
of rat liver microsomes	7 (1970) 32
uptake by rat liver mitochondria	4 (1969) 251
Succinyl-CoA synthetase isolated from soybean callus tissue system, effect on tetrapyrrole synthesis	9 (1970) 30
N-Succinyl-D-neuraminic acid, effect on the specificity of neuraminidase	4 (1969) 335
Sugar	
accumulation in <i>E. coli</i> , regulation of	3 (1969) 53
dehydrogenases of pig liver, chromatographic and electrophoretic evidence	9 (1970) 57
metabolism in rat levator ani, testosterone action	4 (1969) 197
Sulphate ions, effect on intestines from different species	5 (1969) 157
Sulphatides and sodium ion transport, sphingolipid composition of the rectal gland of the spiny dogfish	2 (1968) 4
Sulphite, effect on the reactivity of amino acid residues of pig heart lactate dehydrogenase	1 (1968) 129
Sulphoethyl-Sephadex purification of a basic encephalitogenic protein	7 (1970) 317
Sweat, pilocarpine-induced, microdisc electrophoresis of proteins	4 (1969) 28
Sweet potato β -amylase on 6 ² and 6 ³ - α -glucosamto-oligosaccharides	6 (1970) 182
Synaptic membranes from rat brain, 5-hydroxytryptamine-containing vesicles	3 (1969) 80
Synaptosomes, protein synthesis in	10 (1970) 273
Synchronous mitosis in <i>Physarium polycephalum</i> , X-ray effect on	10 (1970) 185
Taurochenodeoxycholate 6 β -hydrolase system co-inhibited, photoreactivation spectrum of	2 (1968) 124
Tay-Sachs disease, β -N-acetylhexosaminidase pattern	4 (1969) 351
Tay-Sachs disease, fractionation of brain N-acetyl- β -hexosaminidase on DEAE-cellulose	9 (1970) 1
TDF, irreversible binding to acetylcholinesterase in electrogenic tissue	2 (1969) 224
TDP-glucose and TDP-rhamnose in <i>E. coli</i>	7 (1970) 314
Teichoic acid, lipid intermediate in biosynthesis of	1 (1968) 114
Testosterone action on sugar metabolism in rat levator ani	4 (1969) 197
Testosterone in rat liver, 14 α -hydroxylation of	1 (1968) 269
Tetranitromethane,	
on activity of anti-tobacco mosaic virus antibodies	8 (1970) 229
modification of active tyrosine in aminopeptidase M	4 (1969) 262
nitration of horse heart cytochrome c	4 (1969) 269
nitration reagent for tyrosyl residues	9 (1970) 239
reaction with tryptophan	7 (1970) 167
5'-Tetranucleotide sequence of RNA of bacteriophage MS2	1 (1968) 93
Tetrapyrrole synthesis, effect of succinyl-CoA isolated from soybean callus tissue system	9 (1970) 30

Theophylline-induced tyrosine aminotransferase in livers from adrenalectomised rats, repression by glucose and phentolamine	9 (1970) 105
Threonine pyrophosphate-induced changes in absorbancy of baker's yeast transketolase	9 (1970) 265
Thiamine synthesis in <i>Saccharomyces cerevisiae</i> . new intermediate	9 (1970) 27
2-Thiocytidine, isolation and characterisation from an <i>E. coli</i> tRNA ^{Ser}	7 (1970) 207
Thiokinase (ATP-dependent fatty acid), effect of atracylate and AMP	3 (1969) 279
Thiol-disulphide interchange catalysed by membrane-bound enzyme, effect of ribosomes on activity of	2 (1968) 133
Thiol-disulphide interchange enzyme in rat liver	7 (1970) 26
Thiol groups, reactivity with a fluorogenic reagent, NBD-chloride	6 (1970) 346
Thiophene derivatives, uncoupling effect on energy-linked functions of rat liver mitochondria	6 (1970) 217
Thiophosphate backbone of polyribonucleotide	2 (1969) 262
4-Thiouridine-5'-phosphate, conformation of in single and double stranded polynucleotides	2 (1969) 305
4-Thiouridine residues of tRNA ^{Leu} , conversion to radioactive N-4-methylcytidine for sequence analysis	6 (1970) 77
L-Threonine dehydratase in <i>E. coli</i>	6 (1970) 73
Threonine dehydratase of yeast, allosteric behaviour of	5 (1969) 141
Thrombin, bovine reaction kinetics of reaction with <i>p</i> -nitrophenyl- <i>p</i> '-guanidinobenzoate and 7-amino-1-chloro-3-toluene- <i>p</i> -sulphonamido-2-butanone	1 (1968) 343
Thrombin, inhibition by benzyl- and 4'-nitrobenzyl-4-guanidinobenzoate	8 (1970) 170
Thymidine kinase induction in <i>Physarium polycephalum</i> , cyclic-dependent variation of X-ray effect on	10 (1970) 185
Thymidylate kinase of Chang cells, stimulation by deoxyadenosine	2 (1969) 345
Thymus, calf, see <i>Calf thymus</i>	
Thyroglobulin, partial characterisation of a labelled 6 S precursor	4 (1969) 323
Thyroglobulin subunits, covalent association in thyroid polysomal cell-free system	8 (1970) 137
Thyroid	
cartilage, pig, temperature effect of chondroitin-4-sulphate synthesis <i>in vitro</i>	9 (1970) 145
hormone stimulation of RNA synthesis in rat liver mitochondria	10 (1970) 269
polysomal cell-free system, covalent association of thyroglobulin subunits	8 (1970) 137
slices, porcine, effect of lecithinase on iodide transport	10 (1970) 219
Thyroidectomy, effect on 12 α -hydroxylase and microsomal electron transfer chains of rat liver	1 (1968) 13
Thyrotrophins, bovine, isolation by isoelectric focusing	3 (1969) 250
Thyrotropin, bovine, subunits, isolation and comparison with subunits of luteinising hormone	9 (1970) 20
Thyroxine treated rats, liver mitochondria of, succinate effect on glycerol-1-phosphate oxidation	5 (1969) 299
Thyroxine treatment, effect on 12 α -hydroxylase and microsomal electron transfer chains of rat liver	1 (1968) 13
TMP incorporation into DNA in <i>Saccharomyces cerevisiae</i>	8 (1970) 113
Tobacco mosaic virus, tetranitromethane on anti-antibodies	8 (1970) 229
Tobacco <i>Nicotiana tabacum</i> , incorporation of 3- ³ H-demesteryl propionate	3 (1969) 257
Tomato cells, release of DNA and RNA from bacteria into them and transcription of host cell DNA	8 (1970) 349
Tonsils, human, peptidyl-tRNA translocases and specificity factors required for peptide elongation	10 (1970) 159,163
Tonsils ribosomes from humans, catalysis of peptidyl transfer by	6 (1970) 198
<i>Torulopsis utilis</i> , see <i>Yeast</i>	
Tosylglycylchloromethylketone, kinetics of papain inhibition with benzoylarginine ethyl ester as substrate	2 (1969) 143
Tosyllysylchloromethylketone, kinetics of papain inhibition with benzoylarginine ethyl ester as substrate	2 (1969) 143
T phages, see <i>Virus</i>	
Transaldolase, 1-anilino-8-naphthalene sulphonate binding as a probe for substrate-mediated change in conformation of	7 (1970) 235
Transferrin, rabbit, isoelectric fractionation of	3 (1969) 193
Transfer RNA	
acridine orange, polarised fluorescence of	8 (1970) 201
aminoacyl, see <i>Aminoacyl-tRNA</i>	
<i>E. coli</i>	
formylmethionyl	
-active complex which lacks the dihydrouridine-containing loop	7 (1970) 343
-binding activity to initiation factor C (f2)	6 (1970) 315
-and N-substituted Met-RNA _M , enzymic hydrolysis of	3 (1969) 253
fragments, self assemble	7 (1970) 95
hybridisation with rat liver and yeast tRNA	5 (1969) 218
hydroxypyruvyl, formation	4 (1969) 222
initiators	1 (1968) 259
isoleucyl and leucyl-tRNA synthetases, thermal stability of aminoacyladénylate complexes	4 (1969) 239
leucyl, nucleotide sequence	9 (1970) 168
oligo-C binding	9 (1970) 327

phenylalanyl, conversion of 4-thiouridine residues into <i>N</i> -4-methylcytidine for sequence analysis	6 (1970)	77
phenylalanyl, sequence determination of	3 (1969) 275 ; 6 (1970)	77
seryl, characterisation of 2-thiocytidine	7 (1970)	207
specificity differences between methylases of myeloma and liver for	4 (1969)	347
subunits, interaction of Ac-Ph-tRNA; sparsomycin-induced complex formation	7 (1970)	103, 109
tyrosyl mutant	3 (1969)	1
<i>N</i> -formylmethionyl		
in bean chloroplasts	4 (1969)	285
binding to viral programmed <i>E. coli</i> ribosomes	5 (1969)	313
<i>E. coli</i> , binding activity to initiation factor C (f2), selective inactivation	6 (1970)	315
in <i>E. coli</i> which lacks the dihydrouridine-containing loop	7 (1970)	343
enzymic hydrolysis of	3 (1969)	253
in <i>Pseudomonas aeruginosa</i>	8 (1970)	9
fragments, self assembly	7 (1970)	95
glycyl role in glycylhydroxamate formation in rat liver	6 (1970)	65
hybridisation of heterologous fragments of from yeast, rat liver and <i>E. coli</i>	5 (1969)	218
hydroxypyruvyl, formation	4 (1969)	222
isoleucyl, from <i>Bacillus stearothermophilus</i> and <i>E. coli</i>	4 (1969)	239
leucyl		
from <i>Bacillus stearothermophilus</i> and <i>E. coli</i> , thermal stability of aminoacyladenylate complexes	4 (1969)	239
<i>E. coli</i> , nucleotide sequence	9 (1970)	168
lysyl, poly U-dependent binding to ribosomes of <i>Pseudomonas spheroides</i>	8 (1970)	240
<i>N</i> -substituted, enzymic hydrolysis of	3 (1969)	253
oligo-C binding	9 (1970)	327
peptidyl translocases of rat liver and human tonsil	10 (1970)	159
phenylalanyl		
<i>E. coli</i> , sequence of	3 (1969)	275
<i>Halobacterium cutirubrum</i> , properties of	10 (1970)	225
4-thiouridine residues conversion, into radioactive <i>N</i> -4-methylcytidine for sequence analysis of	6 (1970)	77
yeast, chemical modification of aminoacyl groups	2 (1968)	136
yeast, cooperative helix-coil transitions in half molecules of	5 (1969)	15
yeast, five conformational transitions	10 (1970)	352
yeast and wheat germ, association and dissociation of half molecules of	5 (1969)	23
polysome-bound peptidyl-, effect of cycloheximide of puromycin reaction with in rat liver	8 (1970)	249
rat liver		
role in glycylhydroxylamine formation	6 (1970)	65
peptidyl translocases	10 (1970)	159
polysome-bound peptidyl-, effect of cycloheximide and puromycin	8 (1970)	249
seryl		
coccrystallisation of with Cd and Cu ions in water-dioxane	2 (1968)	112
conformational model proposed on the basis of electron microscopy	3 (1969)	182
<i>E. coli</i> , characterisation of 2-thiocytidine	7 (1970)	207
silkgland of <i>Bombyx mori</i> , functional adaptation to fibroin synthesis	7 (1970)	327
tertiary structure of	3 (1969)	185
tryptophanyl, complex with ATPase and tryptophanyl adenylate beef pancreas	9 (1970)	163
tyrosyl, mutant from <i>E. coli</i>	3 (1969)	1
valyl		
acceptor activity of incomplete aggregate molecules consisting of four fragments	4 (1969)	281
from baker's yeast, enzymic aminoacylation of dissected molecules	3 (1969)	268
yeast, exposed cytosine residues	10 (1970)	229
yeast		
hybridisation with rat liver and <i>E. coli</i> tRNA	5 (1969)	218
phenylalanyl,	2 (1968) 136 ; 5 (1969) 15, 23 ; 10 (1970)	352
seryl	2 (1968)	112
tertiary structure	3 (1969)	185
transfer enzyme, aminoacyl-tRNA-dependent interaction with GTP	2 (1968)	49
tRNA, valyl	3 (1969) 268 ; 4 (1969) 281 ; 10 (1970)	229
Transketolase, baker's yeast, calcium cofactor	6 (1970)	49
Transketolase, baker's yeast, thiamine pyrophosphate-induced changes in optical properties	9 (1970)	265
Translation, errors induced by Mg ²⁺ in Krebs-II ascites carcinoma cells	5 (1969)	231
Triamcinolone diacetate, effect on rat liver diacetate		
Tricarboxylic acid cycle and parmitoylcarnitine oxidations	2 (1969)	281
<i>N</i> -Trideuteriomethyl- <i>N</i> ¹ -nitro- <i>N</i> -nitrosoguanine, methylation of DNA	9 (1970)	175
Triethyl tin,		
evaluation of the mechanism of oxidative phosphorylation	4 (1969)	61

on mitochondrial ion accumulation	5 (1969) 331
Triose phosphate isomerase in <i>E. coli</i>	4 (1969) 19
Triton X-100 solubilisation of Mycoplasma membranes	3 (1969) 217
Trypsin	
active tyrosine residues	3 (1969) 107
basic pancreatic inhibitor, interaction with trypsinogen	3 (1969) 137
benzyl- and 4'-nitrobenzyl-4-guanidinobenzoate inhibition	8 (1970) 170
carboxyl groups of Kunitz inhibitor in complex formation with	2 (1968) 17
cow colostrum inhibitor, role of lysine 18 in active centre	8 (1970) 84
cow colostrum inhibitor, effect of modification of lysine residue on antitryptic and antichymotryptic activity	8 (1970) 274
infra-red investigations of structural transitions	3 (1969) 195
-like protease of crayfish <i>Astacus leptodactylus</i> with serine at active centre	6 (1970) 229
α -macroglobulin and basic pancreatic inhibitor, evidence for tertiary complex of	4 (1969) 21
pancreas and cow colostrum inhibitors, comparison of primary structures	4 (1969) 155
purification by affinity chromatography on ovomucoid-Sepharose resin	7 (1970) 353
soybean inhibitor C, active derivative composed of two non-covalently bonded peptide fragments	10 (1970) 313
tRNA, complex with ATPase and tryptophanyl adenylate	9 (1970) 163
Trypsinogen,	
bovine, aspartic acid residue 177	8 (1970) 176
infra-red investigations of structural transitions	3 (1969) 195
interaction with basic pancreatic trypsin inhibitor	3 (1969) 137
Tryptic peptides of aminoethylated beta-like chain of <i>Rana esculenta</i> haemoglobin major component, amino acid composition of	5 (1969) 271
Tryptophan	
excimer fluorescence	7 (1970) 280
108 in hen egg-white lysozyme, spectrofluorometric study	7 (1970) 171
reaction with tetranitromethane	7 (1970) 167
residues of lysozyme, effect of formylation on immunological studies	5 (1969) 324
Tryptophanyl adenylate, complex with tRNA ^{Trp}	9 (1970) 163
Tyrosine	
aminopeptidase M, active residues, modification by tetranitromethane	4 (1969) 262
aminotransferase	
induction by theophylline and repression by phentolamine and glucose in livers of adrenalectomised rats	9 (1970) 105
inhibition by α -amanitin of cortisol induction in rat liver	9 (1970) 103
multiple forms from rat liver	6 (1970) 46
multiple forms of in rat liver and their hormonal induction in the neonate	5 (1969) 89
rat liver mitochondria, postnatal development of	8 (1970) 99
suppression of benzoate or tyrosine-mediated induction by phentolamine in adrenalectomised rat liver	8 (1970) 316
calf skin collagen residues, fluorescent properties of	5 (1969) 187
excimer fluorescence	7 (1970) 280
tetranitromethane as nitrating reagent	9 (1970) 239
tRNA mutant of <i>E. coli</i>	3 (1969) 1
trypsin active residues	3 (1969) 107
UAG suppressor in <i>E. coli</i> coded by T4	6 (1970) 99
Ubiquinone-depleted submitochondrial particles	3 (1969) 21
Ubiquinone requirement in mitochondria after pentane extraction	10 (1970) 92
UDP-apiose, transfer of apiose from to 7-O-(β -D-glucosyl)-apigenin and -chrysoeriol by an enzyme preparation from parsley	7 (1970) 164
UDP galactose:ceramide galactosyl transferase in Jimpy mouse	8 (1970) 213
UDP glucose, β -glucans synthesised enzymically from it in wheat seedlings	7 (1970) 224
UDP glucose isolation from diaphragm by paper chromatography	1 (1968) 291
UDP-N-glycolylmuramyl-(Ala, Glu, Dap) from <i>Mycobacterium phlei</i>	6 (1970) 55
Ultracentrifugation of proinsulin	2 (1968) 130
Ultrafilterable peptides from <i>E. coli</i> and rat liver homogenates	6 (1970) 321
Ultrafilterable peptides from homogenates of bovine and porcine submaxillary glands	6 (1970) 326
Ultrafiltration, protein hydrolysis during	6 (1970) 89
UMP pyrophosphorylase from <i>E. coli</i>	5 (1969) 211
Urate oxidation by cupric ion	2 (1969) 339
Urea amidolyase, sensitivity to avidin	3 (1969) 233
Urease, preparation chemically attached to a nylon tube	10 (1970) 325
5- ³ H-Uridine, incorporation into DNA	2 (1968) 91
Uridine nucleotides, changes during liver perfusion with D-galactosamine	4 (1969) 278

Uridine-2', 3'-O, O-cyclophosphorothioate as substrate for pancreatic ribonuclease (1)	2 (1968) 85
Uridine phosphorylase, <i>Bacillus cereus</i> , regulation of	10 (1970) 67
Uridylic oligonucleotides, kinetics of hydrolysis with snake venom phosphodiesterase	2 (1969) 185
Uridyl-(3', 5')-adenosine as substrate for ribonuclease assay	1 (1968) 29
Uroporphyrinogen III cosynthetase, evidence for polypyrrolic substrate in soybean callus tissue	6 (1970) 285
Uroporphyrinogen decarboxylase from chicken erythrocytes	5 (1969) 149
Uterus of calf, oestradiol binding to extracts of	5 (1969) 161
UV irradiation, effect on catalytic and allosteric properties of fructose-1, 6-diphosphatase	4 (1969) 93
tobacco mosaic, effect of tetranitromethane on anti-antibodies	8 (1970) 229
Valine tRNA	
acceptor activity of incomplete aggregate molecules consisting of 4 fragments	4 (1969) 281
aminoacylation of dissected molecules	3 (1969) 268
yeast, exposed cytosine residues	10 (1970) 229
Valinomycin	
induced potassium uptake into mitochondria, proton shift associated with	5 (1969) 50
stimulated post-illumination ATP synthesis in spinach chloroplasts	9 (1970) 313
uncoupler in isolated chloroplasts	1 (1968) 21
<i>Verongia aerophoba</i> , high molecular weight DNase	5 (1969) 165
Venom phosphodiesterase, aminoacyl-tRNA hydrolysis by	1 (1968) 156
<i>Vibrio cholerae</i> neuraminidase, synthetic inhibitors of	8 (1970) 17
Virus	
encephalomyocarditis, circular structures in preparation of the replicative form of RNA	8 (1970) 13
fd mutants, coat proteins of	7 (1970) 83
induced tumours, isolation of histones	4 (1969) 291
influenza, neuraminidases, synthetic inhibitors of	8 (1970) 17
influenza, protein, inhibition of polypeptide synthesis in cell-free <i>E. coli</i> system	7 (1970) 201
mengovirus, inhibition by levallorphan	6 (1970) 190
MS2	
RNA, dimer formation with ribosomal RNA in the presence of formaldehyde	7 (1970) 55
RNA, 3'-terminal nucleotide sequence	9 (1970) 222
RNA, 5'-terminal nucleotide sequence	1 (1968) 93
plant or phage, programmed <i>E. coli</i> ribosomes, requirement for fMet-tRNA	5 (1969) 313
Simian, glycoprotein: N-acetylglucosaminyl transferases	8 (1970) 29
T-even phage lysozyme from <i>E. coli</i> , isolation of inhibitor	4 (1969) 50
T4 phage	
DNA, differential transcription of by RNA polymerase from <i>E. coli</i> and <i>Anacystis nidulans</i>	3 (1969) 76
infected <i>E. coli</i> , initiation factor B (F3)	9 (1970) 213, 218
modification of gene product P-23	8 (1970) 140
tRNA, amino acid acceptor activity of	2 (1968) 39
UAG suppressor	6 (1970) 99
T5 phage-infected bacteria, DNAase from	5 (1969) 214
Vitamin	
B ₆ compounds, hydration and proton transfer of	5 (1969) 327
B ₁₂ and ratio of mono-unsaturated to methyl-branched fatty acids in <i>Corynebacterium simplex</i>	
cells grown on hydrocarbons, relationship between	5 (1969) 343
B ₁₂ , riboflavin as precursor of 5,6-dimethylbenzimidazole moiety	6 (1970) 187
D, a "second messenger" for	2 (1969) 313
Wheat	
chloroplast DNA isolated by a new "laceration technique"	3 (1969) 89
germ Phe-tRNAs, association and dissociation of half molecules of	5 (1969) 23
seedlings, structural features of the β -glucans enzymatically synthesised from UDP glucose	8 (1970) 224
seeds, germinating, biosynthesis of α - and β -amylases	7 (1970) 191
White adipose tissue from rat, effect of insulin on fatty acid synthesis <i>in vivo</i>	5 (1969) 351
Xanthine oxidase from rat liver, activation by proteolytic enzymes	
X-prolyl-aminopeptidase, influence of serum albumin on activity	2 (1968) 83
X-ray effects on synchronous mitosis and thymidine kinase induction in <i>Physarium polycephalum</i>	9 (1970) 225
cyclic-dependent variation of	10 (1970) 185
X-ray small-angle scattering of yeast glyceraldehyde-3-phosphate dehydrogenase as a function of saturation with NAD	4 (1969) 75
β -O-Xylosyl-L-serine and β -O-xylosyl-L-threonine, hydrolysis of glycosidic bonds in by enzyme preparations from <i>Helix pomatia</i>	1 (1968) 213
Yeast	
alcohol dehydrogenase, cobalt incorporation	1 (1968) 133
baker's	

cell wall, structures of two glucans from	4 (1969) 122
glucose-6-phosphate regulation of monosaccharide transport	2 (1969) 333
tRNA ¹ Val, enzymic aminoacylation of dissected molecules	3 (1969) 268
transketolase, calcium cofactor	6 (1970) 49
transketolase, thiamine pyrophosphate-induced changes in optical properties	9 (1970) 265
<i>Candida utilis</i> mitochondrial ribosomes, isolation and characterisation	3 (1969) 177
CoA-SS-glutathione reductase, NADPH-dependent, active site	7 (1970) 227
fatty acid synthetase, dissociation and reassociation of the stable multienzyme complex	5 (1969) 45
glyceraldehyde dehydrogenase, stereoselective reactivity of SH groups	1 (1968) 25
glyceraldehyde-3-phosphate dehydrogenase saturation with NAD, X-ray small-angle scattering studies	4 (1969) 75
hexokinase, molecular weight and dissociation properties	4 (1969) 84
mitochondria, asynchronous developments of different functions	2 (1969) 198
oligomycin resistance, extrachromosomal inheritance	6 (1970) 302
oligomycin-resistant mutants	10 (1970) 202
phenylalanyl-tRNA	
association and dissociation of half molecules	5 (1969) 23
chemically modified aminoacyl groups	2 (1968) 136
cooperative helix-coil transitions in half molecules of	5 (1969) 15
tRNA, five conformational transitions	10 (1970) 352
phosphofructokinase	
kinetics of	1 (1968) 137
stimulation of protein-dependent interconversion of two forms by a heat stable factor from yeast	5 (1969) 199
subunits of	8 (1970) 20
pyridine nucleotides, synthesis of	4 (1969) 167
pyruvate decarboxylase	
allosteric properties	9 (1970) 293
amino acid composition	4 (1969) 275
subunit size	4 (1969) 273
<i>Rhodotorula gracilis</i> , enzymes of	3 (1969) 322
RNA	
analysis at the subnanomolar level by conversion to tritiated nucleoside derivatives	2 (1968) 10
high resolution mapping of tritiated derivatives	5 (1969) 31
polymerase, effect of α -amanitin and rifampicin on	7 (1970) 220
polymerase, photoinactivation by furocoumarins	10 (1970) 29
synthesis, rifamycin insensitivity	6 (1970) 58
<i>Saccharomyces carlsbergensis</i>	
isolation of alkali-soluble glucan fraction from cell walls	1 (1968) 67
phosphofructokinase activity under conditions simulating glycolysing yeast extract	3 (1969) 5
pyruvate decarboxylase	4 (1969) 273, 275 ; 9 (1970) 293
<i>Saccharomyces cerevisiae</i>	
acylglucoses	8 (1970) 322
asynchronous development of different functions	2 (1969) 198
dinitrophenol uptake by anaerobic cells and its relation to energy transduction by these cells	1 (1968) 252
incorporation of exogenous TMP into DNA	8 (1970) 113
L-lactyl-puromycin isolation	1 (1968) 97
mitochondria, enzyme synthesis, new hypothesis	1 (1968) 255
mitochondria, NAD kinase	10 (1970) 97
mitochondria, ribosomes of	4 (1969) 234
oligomycin-resistant mutants	10 (1970) 202
ornithine carbamoyltransferase control by arginase	
RNA synthesis, insensitivity of rifamycin	6 (1970) 58
thiamine biosynthesis new intermediate	9 (1970) 27
threonine deaminase, allosteric behaviour of	5 (1969) 141
<i>Torulopsis utilis</i>	
iron-limited growth on reversible loss of mitochondrial energy at site I	1 (1968) 4
grown on acetate, mitochondrial NADH oxidation pathways	7 (1970) 132
interrelationships between mitochondrial energy conservation site I, piericidin A sensitivity and ESR spectra	5 (1969) 207
submitochondrial particles, spectroscopic resolution of iron-flavin trough of respiratory chain	8 (1970) 333
transfer RNA, see <i>Transfer RNA</i>	
Zinc	
binding to leucine aminopeptidase	10 (1970) 17
induced RNA synthesis in rat liver nuclei	7 (1970) 356

induced synthesis of RNA in livers of normal and adrenalectomised rats	10 (1970) 169
interaction with rat muscle aminohydrolase	10 (1970) 101
Zonal centrifugation studies of labelling patterns of mitochondrial and nuclear DNA in rat liver and hepatoma	5 (1969) 180
Zymogens of human and pancreatic juice	3 (1969) 355
