Coherent Wave Optics, New Frontier of the Microwave Art (Abstract)

A.G. Fox. "Coherent Wave Optics, New Frontier of the Microwave Art (Abstract)." 1962 PGMTT National Symposium Program and Digest 62. 1 (1962 [MWSYM]): 177-177.

The present state of the art will be described and the importance of coherence discussed. It appears possible that coherent light will prove useful in communication systems. The role of the microwave engineer in the future development of this field will be suggested.
